FULL BOARD MEETING
Friday, August 19, 2016

Hilton Sacramento Arden West
2200 Harvard Street
Sacramento, CA 95815
BOARD MEETING AGENDA
August 19, 2016
Hilton Sacramento Arden West
2200 Harvard Street, Sacramento, CA 95815
916-604-3993 (Hotel) or 916-263-2300 (Board Office)

Members of the Board
Steven Morrow, DDS, MS, President
Judith Forsythe, RDA, Vice President
Steven Afriat, Public Member, Secretary
Fran Burton, MSW, Public Member
Yvette Chappell-Ingram, Public Member
Katie Dawson, RDH
Kathleen King, Public Member
Ross Lai, DDS
Huong Le, DDS, MA
Meredith McKenzie, Public Member
Thomas Stewart, DDS
Bruce Whitcher, DDS
Debra Woo, DDS

During this two-day meeting, the Dental Board of California will consider and may take action on any of the agenda items, unless listed as informational only. It is anticipated that the items of business before the Board on the first day of this meeting will be fully completed on that date. However, should an item not be completed, it may be carried over and heard beginning at 9:00 a.m. on the following day. Anyone wishing to be present when the Board takes action on any item on this agenda must be prepared to attend the two-day meeting in its entirety.

Public comments will be taken on agenda items at the time the specific item is raised. All times are approximate and subject to change. Agenda items may be taken out of order to accommodate speakers and to maintain a quorum. The meeting may be cancelled without notice. Time limitations for discussion and comment will be determined by the President. For verification of the meeting, call (916) 263-2300 or access the Board’s website at www.dbc.ca.gov. This Board meeting is open to the public and is accessible to the physically disabled. A person who needs a disability-related accommodation or modification in order to participate in the meeting may make a request by contacting Karen M. Fischer, MPA, Executive Officer, at 2005 Evergreen Street, Suite 1550, Sacramento, CA 95815, or by phone at (916) 263-2300. Providing your request at least five business days before the meeting will help to ensure availability of the requested accommodation.

While the Board intends to webcast this meeting, it may not be possible to webcast the entire open meeting due to limitations on resources or technical difficulties that may arise.
Friday August 19, 2016

9:00 A.M. OPEN SESSION – FULL BOARD

15. Call to Order/Roll Call/Establishment of Quorum.

   - Staffing Update – Vacancies and New Hires
   - Update on the Republic of Moldova Dental School Application
   - Update on Controlled Substance Utilization Review and Evaluation System (CURES) Registration
   - Follow-up on Ethnicity Statistics for California Dental School Students
   - Update on the California Society of Periodontists Request for the Dental Board of California’s Endorsement of their Efforts in the Creation of a Periodontal Disease Awareness Month
   - Collection of Email Addresses/Answering Phones and Callbacks
   - Update on Registered Dental Assistant Candidate Guide
   - Update on Section 1115 Medicaid Waiver

17. Report of Dental Hygiene Committee of California (DHCC) Activities

18. Subcommittee Report Regarding the Progress of the Pediatric Anesthesia Study Requested by Senator Jerry Hill; Review and Discussion of “Working Document”.

19. Legislation:
   A. 2016 Tentative Legislative Calendar
   B. Discussion and Possible Action on the Following Legislation
      - AB 2235 (Thurmond) Board of Dentistry: Pediatric Anesthesia: Committee
      - AB 2331 (Dababneh) Dentistry: Applicants to Practice
      - AB 2485 (Santiago) Dental Corps Loan Repayment Program
      - AB 2859 (Low) Professions and vocations: retired category: licenses
      - SB 482 (Lara) Controlled Substances: CURES database
      - SB 1155 (Morrell) Professions and Vocations: Licenses: Military Service
      - SB 1348 (Cannella) Licensure Applications: Military Experience
      - SB 1444 (Hertzberg) State Government: Computerized Personal Information Security Plans
      - SB 1478 (Senate Committee Business Professions and Economic Development) Healing Arts
   C. Update on Pending Regulatory Packages
      - Abandonment of Applications (Cal. Code of Regs., Title 16, Section 1004)
      - Dental Assisting Comprehensive Regulatory Proposal; (Cal. Code of Regs., Title 16, Division 10, Chapter 3)
Elective Facial Cosmetic Surgery Permit Application and Renewal Requirements (New Regulation)

Licensure By Credential Application Requirements (New Regulation)

Continuing Education Requirements and Basic Life Support Equivalency Standards (Cal. Code of Regs., Title 16, Sections 1016 and 1017)

Mobile Dental Clinic and Portable Dental Unit Registration Requirements (Cal. Code of Regs., Title 16, Section 1049)

Dental and Dental Assistant Fee Increase (Cal. Code Regs., Title 16, Sections 1021 and 1022)

Definitions for Filing and Discovery (New Regulation)

D. Discussion and Possible Action Regarding Fiscal Year 2016/17 Regulatory Priorities

E. Discussion of Prospective Legislative Proposals. Stakeholders Are Encouraged to Submit Proposals in Writing to the Board Before or During the Meeting for Possible Consideration by the Board at a Future Meeting

20. Fee Increase:
   A. Discussion and Possible Action Regarding Comments Received During the 45-Day Public Comment Period and During the Regulatory Hearing for the Board’s Proposed Rulemaking to Amend California Code of Regulations, Title 16, Sections 1021 and 1022 Relevant to a Fee Increase.

   B. Discussion and Possible Action Regarding Adoption of Proposed Amendments to California Code of Regulations, Title 16, Sections 1021 and 1022 Relevant to a Fee Increase.

21. Public Comment on Items Not on the Agenda. The Board may not discuss or take action on any matter raised during the Public Comment section that is not included on this agenda, except whether to decide to place the matter on the agenda of a future meeting (Government Code §§ 11125 and 11125.7(a)).

22. Board Member Comments on Items Not on the Agenda. The Board may not discuss or take action on any matter raised during the Board Member Comments section that is not included on this agenda, except whether to decide to place the matter on the agenda of a future meeting (Government Code §§ 11125 and 11125.7(a)).

23. Adjournment.
Call to Order

Roll Call

Establishment of Quorum
MEMORANDUM

DATE August 1, 2016

TO Members, Dental Board of California

FROM Karen Fischer, Executive Officer

SUBJECT Agenda Item 16: Executive Officer Report

**Staffing Update – Vacancies and New Hires as of August 1, 2016**

**Administration Unit ~ 1 vacancy**
Associate Governmental Program Analyst (AGPA) – Perm/FT; current incumbent separated as of 05/13/16 and recruitment is in process.

**Licensing & Examination Unit ~ 2 vacancies**
Staff Services Analyst – Perm/FT; to be filled with a Limited Term/FT incumbent (date to be determined).
Staff Services Analyst – Perm/PT; previous incumbent accepted a promotion within the Board with a separation date of 07/24/16 and recruitment will be initiated to fill behind.

**Dental Assisting Program ~ 2 vacancies**
Management Services Technician (MST) – Perm/FT; current incumbent separated as of 07/14/16 and recruitment is in process.
Office Assistant (General) (OT G) – Limited Term/FT; current incumbent accepted a promotion within the Board at Limited Term/FT with a separation date to be determined. Additionally, there is 1 employee out on an extended leave of absence and recruitment to fill behind at Limited Term/FT is in process.

**Enforcement Division**

**Complaint & Compliance Unit ~ currently fully staffed**
Recently hired:
Staff Services Manager I (SSM I) – Perm/FT effective 06/06/16
Office Technician (Typing) (OT T) – Perm/FT effective 07/01/16
Associate Governmental Program Analyst (AGPA) – Perm/FT effective 08/03/16

**Discipline Coordination Unit ~ currently fully staffed**
Recently hired:
Associate Governmental Program Analyst (AGPA) – Perm/PT effective 07/25/16
Investigative Analysis Unit ~ 1 upcoming vacancy
Associate Governmental Program Analyst (AGPA) – Perm/FT; current incumbent gave notice to separate as of 08/31/16 and recruitment will be initiated to fill behind.
Recently hired:
Special Investigator (Sp Inv) – Perm/FT effective 08/02/16
Staff Services Manager I (SSM I) – Perm/FT effective 08/15/16

Sacramento Field Office ~ 1 vacancy
Investigator (INV) – Perm/FT; candidate currently in the final hiring phase with effective date to be negotiated within a week.

Orange Field Office ~ 3 vacancies and 1 upcoming vacancy
3 Investigators (INV) – Perm/FT; currently there are 3 potential candidates nearing the first phase of background for these vacancies.
Investigator (INV) – Perm/FT; current incumbent gave notice to separate as of 08/07/16 and recruitment will be initiated to fill behind.

Total number of hires/separations since May 1, 2016:
Hires – 6
Separations – 3

Update on the Republic of Moldova Dental School Application
The Site Visit of the Moldova Dental School is scheduled for October 1-8, 2016. Travel arrangements are being made for the four members of the Site Evaluation Team. Members include Dr. Steven Morrow, Dr. Timothy Martinez, and Dr. Octavia Plesh. Zachary Raske is the staff member who will be accompanying the team. Prior to the site visit, the Team will meet twice, August 23 and September 20, to review the application and prepare for the site visit.

Update on Controlled Substance Utilization Review and Evaluation System (CURES) Registration
A verbal report will be given at the meeting.

Follow-up on Ethnicity Statistics for California Dental School Students
At the May meeting, following the President’s report regarding a snapshot of dental education nationally in 2015-2016, a member asked for additional statistics relating specifically to ethnicity in California dental schools. An attachment containing this information is included following this memo.

Update on the California Society of Periodontists Request for the Dental Board of California’s Endorsement of their Efforts in the Creation of a Periodontal Disease Awareness Month
In February 2016, the Dental Board received a letter from Mark Fagan, DDS, MS, and President of the California Society of Periodontists (CSP) requesting the Board’s endorsement of CSP’s efforts to create a periodontal disease awareness month. The goal is to raise awareness of the prevalence and significance of periodontal disease and to provide education on how best to prevent, recognize, and appropriately treat this disease that affects the majority of the adult population. Dr. Nicolas Kaplanis, President Elect of
CSP attended the May board meeting to present the request. There was discussion by board members and in the end, Dr. Morrow asked that staff research options and bring a recommendation back to the August meeting.

Laura Purcell, Executive Director of CSP notified me that her organization is working with other associations to gather support. Additional information will be available for discussion at a future meeting.

**Collection of Email Addresses/Answering Phones and Callbacks**
The statutory deadline for licensees (dentists, registered dental assistants (RDAs), and registered dental assistants in extended functions (RDAEFs) to register an email address with the Board was July 1st; and the Board has collected over 30,000 email addresses. We will be sending out an insert in the license/permit renewals – reminding licensees of this requirement. Staff is collecting email addresses at every opportunity including at a booth at the upcoming CDA Presents in San Francisco, when speaking with callers about other issues, and when walk-ins come to the office to conduct business.

Regarding phone calls and callbacks – staff has been checking the voicemail buckets hourly. The expectation is that staff returns calls within 1-2 business days. Messages are being tracked and reviewed by the management team.

**Update on Registered Dental Assistant Candidate Guide**
Board staff worked with the Office of Professional Examination Services (OPES) to develop a Registered Dental Assistant Candidate Guide which will be released August 15th; and will be available on the Board’s website. The Guide will be distributed to candidates when scheduling letters are mailed. Program Directors will also receive a copy of the Guide.

**Update on Section 1115 Medicaid Waiver**
The California State Dental Director has been asked to provide an update on this issue.

<td><strong>Agenda Item 18:</strong> Subcommittee Report Regarding the Progress of the Pediatric Anesthesia Study Requested by Senator Jerry Hill; Review and Discussion of “Working Document”.</td>
</tr>
</tbody>
</table>

The Subcommittee completed its first draft of the Pediatric Anesthesia Report; and mailed the “working document” to interested parties on July 18, 2016. Included with the document was an invitation to attend a workshop in Sacramento on July 28th to discuss the draft. The workshop was webcast and has been archived for future viewing. Those in attendance included legislative consultants from Senator Hill’s office and Assembly member Thurmond’s office, the public, the Media (NBC and ABC), and representatives from the following organizations:

- American Academy of Pediatrics
- California Association of Nurse Anesthetists
- California Dental Association
- California Society of Anesthesiologists
- California Society of Dental Anesthesiologists
- Oral and Facial Surgeons on California

Many participants acknowledged the Board for the work put into the working document so far. There are no recommendations for statutory and/or regulatory changes from the Subcommittee at this time. The Subcommittee anticipates that consensus recommendations will be developed through additional meetings with stakeholders and interested parties before bringing any recommendations before the full board for consideration.

The Subcommittee will lead the discussion of the working document.
PEDiatric ANESthesia STUDY
Introduction

In February 2016 The Dental Board received a request from Senator Jerry Hill to form a subcommittee to investigate whether California’s present laws, regulations and policies are sufficient to guard against unnecessary use of general anesthesia in the treatment of pediatric patients, and whether these laws assure patient safety.

In addition the letter requested that the subcommittee review all incident reports related to pediatric anesthesia for the past 5 years, and to review other states' and dental associations policies.

The subcommittee has reviewed and is reporting on the following:

1. The present laws, regulations, and policies in California; and a comparison of these laws, regulations and policies to those of other states and dental associations.

2. All incident reports related to pediatric sedation, including conscious sedation, oral conscious sedation, and general anesthesia as well as administration of local anesthetic in California for the past six years (2010-2015).

3. Review of relevant dental and medical literature

Background

History of Anesthesia and the Scope of Practice of Dentistry

Although both dentists and physicians contributed to early developments in the field of anesthesiology, each profession evolved differently. Advances in medical anesthesiology evolved slowly until 1923 when a few physicians had the novel idea of creating a separate department of anesthesia in medical schools. This advance allowed all teaching, training, and research endeavors to be organized and supervised by one department head. This marked the beginning of medical anesthesiology as a scientific discipline.
The practice of anesthesiology in dentistry took a different path, with dentists practicing various forms of anesthesia as a technique taught by practitioners to one another. This approach did not initially provide an environment for formal research. Anesthesia techniques developed specifically for dentistry became more widely accepted by the profession in the middle of the 20th century. Drs. Morgan Allison, Adrian Hubbell, Leonard Monheim and others first utilized new techniques and new anesthetics that became available at the time. Other dentists developed what was then a new technique, termed “conscious sedation” which utilized sub anesthetic doses of general anesthetic drugs along with local anesthesia. These new anesthesia concepts and ideas led to the establishment of the American Dental Society of Anesthesiology (ADSA) in 1953. Among the chief goals of these pioneer dentists was to provide education in advanced pain and anxiety control for all dentists.

Case law has clarified the place of anesthesia within the scope of dental practice. The courts that have reviewed anesthesia scope of practice cases have consistently viewed anesthesiology as being within the scope of practice of dentistry as well as other health care disciplines. However the courts have ruled that individual providers are limited to their scope of practice as defined by state law. Anesthesia should therefore be administered according to the statutes and regulations that each state uses to govern an individual’s core license to practice.  

History and Function of the Dental Board of California Board

The California legislature created the Dental Board of California (DBC or Board) in 1885 to regulate the practice of dentistry. Today, the Board regulates the approximately 86,000 licensed dental healthcare professionals in California, including approximately 40,000 dentists, 44,000 registered dental assistants (RDAs) and 1,500 registered dental assistants in extended functions (RDAEFs). In addition, the Board is responsible for setting the duties and functions of approximately 50,000 unlicensed dental assistants. The Board’s last sunset review was in 2014.

The practice of dentistry is defined in Business and Professions Code section 1625 as:

“the diagnosis or treatment, by surgery or other method, of diseases and lesions and the correction of malpositions of the human teeth, alveolar process, gums, jaws, or associated structures; and such diagnosis or treatment may include all necessary related procedures as well as the use of drugs, anesthetic agents, and physical evaluation.”

The Board meets at least four times throughout the year to address work completed by the various committees, and as noticed on the agenda, may meet in closed session as authorized by Government Code Section 11126 et. seq.

The mission of the Dental Board is defined in Business and Professions Code section 1601.2, which states:

“Protection of the public shall be the highest priority for the Dental Board of California in exercising its licensing, regulatory, and disciplinary functions. Whenever the protection of the public is inconsistent with other interests sought to be promoted, the protection of the public shall be paramount.”

To meet its obligations, the Board implements regulatory programs and performs a variety of functions. These programs and activities include setting licensure requirements for dentists and dental assistants, including examination requirements, and issuing and renewing licenses, including a variety of permits and certifications. The Board also has its own enforcement division, with sworn and non-sworn staff, which is tasked with investigating both criminal and administrative violations of the Dental Practice Act (Act) and other laws. As part of the disciplinary function of the Board, it also monitors dentists and RDAs who may be on probation, and manages a Diversion Program for licensees whose practice may be impaired due to abuse of dangerous drugs or alcohol.

**Board Membership and Committees**
The Board is composed of 15 members: eight practicing dentists, one registered dental hygienist (RDH), one RDA, and five public members, which account for one-third of the membership. The Governor appoints the dentists, the RDH, the RDA, and three public members. The Speaker of the Assembly and the Senate Rules Committee each appoint one public member. Of the eight practicing dentists, one must be a member of the faculty of any California dental school, and one is required to be a dentist practicing in a nonprofit community clinic. Members of the Board are appointed for a term of four years, and each member may serve no more than two full terms.

**Purpose of State Laws**

State laws and regulations are general rules governing people's rights or conduct. Laws and regulations do not contain recommendations, model procedures, lists of resources, or information about practice or procedures, otherwise known as guidance documents.
Laws are developed following a legislative plan that includes an analysis of the existing law, an analysis of the necessity of legislation, a statement that no other regulatory choice would be effective; analysis of potential danger areas (constitutional, legal, practical); and an analysis of the practical implications of the legislative proposal. Regulations are developed to implement, interpret, and make specific the law. Statutes and regulations are of necessity concise and in the case of dental laws, establish the minimum standards for the safe practice of dentistry. Laws and regulations are usually applied literally and can limit the ability of the licensee to exercise discretion.

Dental Board Enforcement Unit

The Dental Board utilizes its disciplinary process to enforce the Dental Practice Act. The board has broad authority over its licensees and may issue administrative citations, impose fines, and reprimand, revoke, suspend, or place conditions upon a dental license. All complaints against a licensee are reviewed and if there is sufficient evidence of professional misconduct an accusation is filed.

Accusations may be based on specific acts or omissions of those duties described in the Practice Act, or as established by expert testimony of gross negligence or incompetence sufficient to require discipline. This provision makes it unnecessary to state every conceivable practice standard, as to do so would clearly be impractical.

Definitions Used in Dental Sedation and Anesthesia

The American Society of Anesthesiology developed new definitions of levels of sedation in 1999. These definitions were subsequently adopted by most other organizations involved in the provision of sedation and anesthesia care. The Dental Board first suggested adoption of these definitions into its laws in 2005 and again in 2010.

Appendix 1 Table 1 includes a side by side comparison of California’s current definitions of oral conscious sedation, parenteral conscious sedation, and general anesthesia with contemporary definitions.

- **analgesia** – the diminution or elimination of pain.
- **anxiolysis** – the diminution or elimination of anxiety.
- **conscious sedation** – a minimally depressed level of consciousness that retains the patient’s ability to independently and continuously maintain an airway and respond appropriately to physical stimulation or verbal command and that is produced by a pharmacological or non-pharmacological method or a combination thereof.
• **deep sedation** – an induced state of depressed consciousness accompanied by partial or complete loss of protective reflexes, including the inability to continually maintain an airway independently and/or to respond purposefully to physical stimulation or verbal command, and is produced by a pharmacological or non-pharmacological method or a combination thereof.

• **ental** – any technique of administration in which the agent is absorbed through the gastrointestinal (GI) tract or oral mucosa.

• **general anesthesia** – an induced state of unconsciousness accompanied by partial or complete loss of protective reflexes, including the inability to continually maintain an airway independently and respond purposefully to physical stimulation or verbal command, and is produced by a pharmacological or non-pharmacological method or combination thereof.

• **incremental dosing** – administration of multiple doses of a drug until a desired effect is reached, but not to exceed the maximum recommended dose (MRD).

• **inhalation** – a technique of administration in which a gaseous or volatile agent is introduced into the lungs and whose primary effect is due to absorption through the gas/blood interface.

• **local anesthesia** – the elimination of sensation, especially pain, in one part of the body by the topical application or regional injection of a drug.

• **maximum recommended dose (MRD)** – maximum FDA-recommended dose of a drug, as printed in FDA-approved labeling for unmonitored home use.

• **minimal sedation** - a minimally depressed level of consciousness produced by a pharmacological method, that retains the patient’s ability to independently and continuously maintain an airway and respond normally to tactile stimulation and verbal command. Although cognitive function and coordination may be modestly impaired, ventilatory and cardiovascular functions are unaffected. In accord with this particular definition, the drug(s) and/or techniques used should carry a margin of safety wide enough never to render unintended loss of consciousness. Further, patients whose only response is reflex withdrawal from repeated painful stimuli would not be considered to be in a state of minimal sedation.

• **moderate sedation** – a drug-induced depression of consciousness during which patients respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation. No interventions are required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained.

• **parenteral** – a technique of administration in which the drug bypasses the gastrointestinal tract.

• **recovery** – the ability to regain full health, or a return to baseline status.
supplemental dosing - during minimal sedation, supplemental dosing is a single additional dose of the initial dose of the initial drug that may be necessary for prolonged procedures.

titration – the administration of small incremental doses of a drug until a desired clinical effect is observed.

transdermal – a technique of administration in which the drug is administered by patch or iontophoresis through skin.

transmucosal – a technique of administration in which the drug is administered across mucosa such as intranasal, sublingual, or rectal.

Dental Board General Anesthesia, Conscious Sedation and Oral Conscious Sedation Permit Program

Legislative history

The California Dental Practice Act regulates the use of sedation and general anesthesia by California dentists. These laws and regulations may be accessed through the Dental Board of California’s website. There is an annual publication of the California Dental Practice Act that is available from the legal and professional document publisher Lexis Nexis.

The Dental Board of California has long sought to improve the safety of sedation and anesthesia in California. The Board, working with the California Dental Association, co sponsored SB 386 (Keene, 1979), the first legislation to regulate the use of general anesthesia by dentists in California. This bill included a requirement for mandatory office inspections that were based on a voluntary program originally developed by Southern California oral surgeons. Conscious sedation laws, AB 1276 (Tucker, 1986) also sponsored by the Board and CDA, followed as did AB 2006 (Keeley, 1998) and AB 1386 (Laird, 2005), the most recent update of sedation laws. None of this legislation was prompted by a crisis related to the administration of sedation or anesthesia. These laws were sponsored as proactive measures to improve patient safety. An exception was AB 564 (Keene, 2001), a bill that established reporting requirements for patient deaths, that was introduced at the request of a mother whose son suffered brain damage after he was given chloral hydrate, an oral sedative, by his dentist.

In 2002 the Board called for a review of anesthesia laws and patient outcomes to see if any improvements could be made to the existing regulatory program. To accomplish this goal the Board appointed the Blue Ribbon Panel on Anesthesia, an ad hoc committee composed of general dentists and dental specialists who were recognized experts in the field. The Blue
Ribbon Panel reviewed laws in other states, dental association guidelines, death statistics provided by the Dental Board, closed claims from an insurance carrier, as well as current laws.

The Blue Ribbon Panel’s recommendations were approved by the Board and ultimately enacted through statute and regulation beginning in 2006. There is no record of any significant opposition to the recommended changes which included the addition of an adult oral conscious sedation permit, new requirements for pre anesthetic physical evaluation of patients, and improvements to the office inspection program. The Panel did not recommend that a specific number of personnel be present, nor was there any recommendation for staff training other than Basic CPR. There was no recommendation for pre operative dietary instructions due to controversy about appropriate requirements. At the time the board was aware of the need to update anesthesia terminology to achieve consistency with new definitions adopted by the American Dental Association, but chose to defer this until a later date, and recommended that these changes be made during sunset review.

In 2010 the Board president appointed a subcommittee to study the definitions, to make recommendations for their adoption and to review the relevant statues and regulation for currency. The 2010 subcommittee recommended that the anesthesia and sedation laws be reviewed and updated every 5 years and suggested strategies for accomplishing this task. Once statues were amended other changes could be implemented by regulation. A series of informal stakeholder meetings followed and the subcommittee submitted a legislative proposal to the board in November 2013. This item was noticed for discussion and possible action at the November 22, 2013 meeting. The California Society of Pediatric Dentists stated support but provided no specific comments. No action was taken due to other pressing business and the proposal was identified as a future board priority.

**Current California Sedation and Anesthesia Laws**

A summary of California’s current dental sedation and anesthesia laws is provided in the attached Appendix 2, Tables 2-8. California Business and Professions Code sections 1646.2, 1646.4, 1646.9, 1647.3, 1647.5, 1647.7 describe educational qualifications and other requirements necessary for a dentist to become eligible for a permit to administer general anesthesia or sedation and to renew such permit. These laws include a requirement for general anesthesia and conscious sedation permit holders to undergo an office inspection every 5 - 6 years; completion of continuing education every 2 years; a list of violations that are considered unprofessional conduct; and requirements for a physician and surgeon to obtain a permit to administer general anesthesia in a dental office. Business and Professions Code sections 1680

---

and 1682 describe acts that constitute unprofessional conduct specifically related to sedation and anesthesia.

Business and Profession Code 1647 addresses conscious sedation and includes the statement that “the drugs and techniques used shall have a margin of safety wide enough to render unintended loss of consciousness unlikely”. This broad approach to limiting the use of potent sedatives recognizes that almost any drug or combination of drugs, when used in sufficient quantity, can produce loss of consciousness, particularly in the very young, very old and medically compromised patients.

The duties of dental assistants are described in Business and Professions Code section 1750.1. This section includes patient monitoring and other sedation related duties they may perform. California Code of Regulations Section 1070 and 1070.2 specify the educational course and program requirements and approval process for dental assistants, including the Dental Sedation Assistant.

California Code of Regulations sections 1043 and 1044 provide requirements for supervision of sedated patients, definitions of levels of sedation, and additional details of permit requirements. The California Code of Regulations section 1043.3 and 1043.4 provide the details of the office inspection program including composition of the inspection team; office facility requirements; equipment requirements, including patient monitors; preoperative evaluation; records; emergency drugs; conduct of the evaluation including a demonstration of general anesthesia and performance of the 13 simulated emergencies; and administrative procedures for the office evaluation process. The Dental Board of California presently issues the following permits:

1. Pediatric oral conscious sedation
2. Adult oral conscious sedation
3. Parenteral conscious sedation
4. General anesthesia
5. Physician anesthesiologist dental anesthesia

Dental Sedation and Anesthesia Laws in Other States

Compilations of dental sedation and anesthesia laws for all 50 states are available from the American Dental Association\(^3\)\(^4\), the American Dental Society of Anesthesia\(^5\) and the American Association of Oral and Maxillofacial Surgeons\(^6\). These publications provide summaries of all laws and regulations relevant to general anesthesia and deep sedation as well as moderate and minimal sedation in all 50 states. We obtained additional information related to minimal and moderate enteral sedation laws from DOCS Education (Dental Organization for Conscious Sedation).\(^7\) The Canadian provinces have adopted the American model for dental sedation and anesthesia and utilize a similar regulatory framework. The subcommittee did not review provincial laws for this report.

Laws in California and most other states reference guidelines published by the American Dental Association\(^8\)\(^9\) and the educational standards of the Commission on Dental Accreditation of the American Dental Association\(^10\), and frequently incorporate some but not all of the recommendations included in these guidance documents.

Comparison of California Laws with Laws in Other States

Methods

We summarized information from compilations of state laws for this report. Where information was incomplete or missing, we downloaded the practice act for that state from the state board web site and reviewed the relevant sections. If necessary we contacted the individual dental board to obtain additional information. For some states there were questions that required legal interpretation that could not be completely resolved. Texas, South Carolina, and Alaska have rulemaking in progress so we reviewed their existing rules.

Certain state laws and regulations were relatively uniform across all 50 states. We have described these in the narrative. Other state laws were less consistent and we compiled this information into spreadsheets for analysis and presentation in graphical form. Please see Appendix 1 for a graphical summary of state requirements.

The subcommittee made every effort to verify the accuracy of information presented, however due to the variability, complexity, and ever changing nature of state laws and regulations this report may include some inaccuracies. We welcome the opportunity to provide additions or corrections to this information.

The comparison is organized according to the areas outlined below as well as by permit type. We limited the permit types we reviewed to minimal sedation, moderate oral sedation, moderate parenteral sedation, and deep sedation/general anesthesia. Some states issue permits for additional categories.

Areas of comparison

Narrative comparison

- Permitting of practice locations
- Education
- Preoperative evaluation
- Personnel
- Facility
- Monitoring and Equipment
- Records
- Emergency Drugs
- Continuing education
- Pediatric sedation
Permit types

- Minimal sedation
- Moderate enteral sedation
- Moderate parenteral sedation
- Deep Sedation/General Anesthesia

Permitting of practice locations

For the majority of states, including California, the permit to administer sedation or general anesthesia is assigned to the individual dentist and not to a facility. The California Dental Board maintains broad authority over its licensees and may conduct an inspection of any dental facility at its own discretion. Although the majority of states, including California, require a periodic facility inspection, only a single facility utilized by the permit holder is usually inspected. The permit holder is assigned the responsibility for assuring that all facilities where they administer sedation are appropriately equipped and staffed as required by law.

We identified nine (9) states that require of permitting individual practice locations in addition to the dentist. This has the advantage of assuring that facilities are properly equipped but requires a significantly greater number of inspections. In contrast, the Medical Board of California is responsible for the accreditation of all locations where sedation or anesthesia, other than local anesthesia, is administered. Accreditation is done by three different board approved accrediting entities. Practitioners are approved to administer sedation or anesthesia by the individual facility instead of by the regulatory board. For a discussion of the regulatory structure of outpatient facilities in California see the 2015 report from Klutz Consulting.11

Educational requirements

Minimal Sedation/Anxiolysis training

The American Dental Association defines minimal sedation as “ a drug-induced state during which patients respond normally to verbal commands. Although cognitive function and physical

coordination may be impaired, airway reflexes, and ventilatory and cardiovascular functions are unaffected."\textsuperscript{12}

Minimal Sedation is not defined in the California sedation laws and a permit to administer minimal sedation is not required. According to the ADA educational guidelines training in minimal sedation, including the administration of a mixture of nitrous oxide and oxygen, either alone or in combination with minimal oral sedation, may be taught to the level of basic competency at the predoctoral (dental school) level. \textsuperscript{13} Nineteen (19) states require completion of a 16-hour course prior to issuing a minimal sedation permit.

**Moderate sedation**

Dental practice acts in most states specify that moderate sedation is regulated by route of administration. Sixteen states have recently adopted uniform educational standards for moderate sedation regardless of route of administration.

**Oral (moderate) conscious sedation certification for adults/minors**

To obtain a California permit for administration of \textbf{Oral (moderate) Conscious Sedation Certification for Adults/Minors} the applicant must have completed an approved post doctoral or residency training program that includes sedation training; or, a board approved course that includes 25 hours of instruction including a clinical component utilizing at least one age-appropriate patient; training for either adult patients or minor patients (13 or younger); training requirements reference the ADA and AAP-AAPD definitions of levels of sedation. (See BPC 1647.12; CCR 1044-1044.5.)

**Moderate parenteral sedation**

In California, to obtain a moderate IV conscious sedation permit, the applicant must complete at least 60 hours of instruction and 20 clinical cases of administration of parenteral (intravenous) conscious sedation for a variety of dental procedures. The course must comply with the requirements of the \textit{Guidelines for Teaching the Comprehensive Control of Anxiety and Pain\textsuperscript{12}}

\textsuperscript{12} \textcolor{red}{https://www.ada.org/~/media/ADA/About%20the%20ADA/Files/anesthesia_use_guidelines.ashx}

Pain in Dentistry of the American Dental Association as approved by the Board (see BPC 1647.3) The majority of states (37/50) require similar training, also to ADA standards; five states (5) require completion of fewer clinical cases or hours of instruction and four (4) states require more. All states accept proof of completion of a CODA accredited residency program that includes sedation training in lieu of course completion.

California, as well as other states, limit moderate sedation providers to utilizing drugs and techniques that have a margin of safety wide enough to render unintended loss of consciousness unlikely. A few states restrict moderate sedation permit holders from using potent anesthetics such as propofol, methohexital, and ketamine.

General anesthesia training

Educational requirements for a general anesthesia permit issued by the Dental Board of California include either completion of a one year of advanced training in anesthesiology and related academic subjects approved by the Board or equivalent experience as determined by the Board (BPC 1646.2). This requirement is further defined in regulation (see 1043.1) to include either a one year residency in anesthesiology or completion of a Commission on Dental Accreditation (CODA) approved graduate program in oral and maxillofacial surgery.\(^\text{14}\) Although this requirement is generally consistent with the laws in the other 49 states there are some variations. For example, some states require completion of either a two year residency in dental anesthesiology or a residency in oral and maxillofacial surgery. Other states require completion of at least 3 years of an oral and maxillofacial residency; others require board certification, but most states (33/50) require completion of an advanced residency education program accredited by the Commission on Dental Accreditation that includes training to competency in general anesthesia. We were unable to identify a state that restricts a general anesthesia permit holder from using any anesthetic agent, including inhalation agents such as Sevoflurane and the intravenous agent propofol.

Advanced educational programs that include sedation training

CODA accreditation of advanced educational programs

Commission on Dental Accreditation (CODA) accreditation is a non-governmental, voluntary peer review process by which educational institutions or programs may be granted public

recognition for compliance with accepted standards of quality and performance. Accreditation standards are developed in consultation with those affected who represent broad communities of interest. CODA was established in 1975 and is nationally recognized by the United States Department of Education (USDE) as the sole agency to accredit dental and dental-related education programs conducted at the post-secondary level. A comparison table of CODA accreditation standards for advanced residency programs that include training in sedation and general anesthesia is attached, see “Educational programs that include training in moderate sedation, deep sedation, and general anesthesia”.

American Dental Association (ADA) Educational Guidelines

The ADA “Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students” are educational guidelines published by the ADA for programs and courses that teach sedation techniques.15 These Guidelines have been revised periodically but have been relatively consistent for the past 16 years. The Guidelines for teaching moderate sedation are summarized below. The Guidelines do not address training in deep sedation and general anesthesia and defer to the CODA standards for advanced educational programs, stating that these are advanced specialty techniques. The ADA educational guidelines are summarized as follows:

Moderate Enteral Sedation

- a minimum of 24 hours of instruction plus management of at least 10 adult case experiences (at least 3 live patients in groups no larger than 5 with remainder being on mannequins or by virtual reality)
- participants should be provided supervised opportunities for clinical experience to demonstrate competence in airway management to prevent office emergencies
- clinical experience is provided in managing healthy adult patients
- course is not designed for the management of children (age 12 and under)
- additional supervised clinical experience is necessary to prepare participants to manage medically compromised adults (ASA PS II-IV) and special needs patients

Moderate Parenteral Sedation

- a minimum of 60 hours of instruction plus management of at least 20 patients by the intravenous route per participant is required to achieve competency in moderate parenteral sedation.
- participants should be provided supervised opportunities for clinical experience to demonstrate competence in airway management for prevention of emergencies
- typically clinical experience provided in managing healthy adult patients (not ASA PS II-IV)
- additional supervised clinical experience is necessary to prepare participants to manage children (age 12 and under) and medically compromised adults.

Continuing Education Requirements

Forty seven states, including California, require general anesthesia permit holders to maintain current certification in Advanced Cardiac Life Support (ACLS). The majority of states, other than California, also require moderate sedation permit holders to complete ACLS. Seventeen states require completion of a Pediatric Advanced Cardiac Life Support (PALS) course usually in practices where children are treated. California does not presently require completion of PALS training. Some professional association guidelines, including the AAP-AAPD Guidelines, recommend completion of PALS training.

Twenty nine states (29), including California, require completion of continuing education courses as a condition of renewal of a sedation or anesthesia permit. Most states require continuing education specifically related to sedation or anesthesia. California requires the completion of 25 hours of anesthesia related continuing education every 2 years for a general anesthesia permit, the most of any state, and requires 12 hours per renewal for conscious sedation and 7 hours for oral sedation. California’s continuing education requirements therefore exceed those of most other states.

Preoperative evaluation

California law requires a preoperative evaluation for all patients undergoing sedation or anesthesia prior to each administration of sedation or anesthesia. This includes an adequate medical history and a focused physical evaluation recorded and updated as indicated. Records must include but are not limited to the recording of the age, sex, weight, physical status (American Society of Anesthesiologists Classification I-V), medication use, any known or suspected medically compromising conditions, rationale for sedation of the patient, and visual examination of the airway, and for general anesthesia only, auscultation of the heart and
lungs as medically required. (CCR 1043.3) All other states reviewed have equivalent or lesser requirements.

**Personnel**

California law requires patients undergoing sedation or anesthesia to be monitored on a one-on-one ratio until fully recovered. In contrast, thirty three (33) other states require that a prescribed number of staff members be present during administration of sedation or general anesthesia. The American Dental Association Guidelines and AAP-AAPD Guidelines recommend that a minimum of two persons, in addition to the dentist, are present whenever general anesthesia or deep sedation is administered; one person in addition to the dentist should be present for the administration of moderate or minimal sedation.

**Staff training and qualifications**

Nearly all states (44/50) including California, require dental assistants to maintain current certification in basic cardiac life support, and most require completion of a provider CPR course that includes use of the AED. Although dental assistants may assist with dental treatment, including sedation and anesthesia care under supervision, practice acts in most states prohibit the administration of anesthesia, other than local anesthesia, by dental assistants or dental hygienists.

Twenty nine (29) states require that an individual be designated to monitor patients undergoing sedation or anesthesia, to observe vital signs including pulse, blood pressure, oxygenation, ventilation and circulation. Fourteen states (14), including California, specify the duties and education for dental assistants participating in sedation and anesthesia care.

California Business and Profession Code sections (BPC 1750.1 (a) (16-18)) and BPC 1750.5 describe the monitoring and assisting duties that a dental assistant may perform under general supervision of a licensed dentist. See Appendix 2, Table 4, Personnel.

The supervising dentist is also responsible for ensuring that assistants in his or her employ complete required courses, including California law, infection control, and an approved CPR course.

**Specialty training for dental assistants**

Since 1967, The California Association of Oral and Facial Surgeons has sponsored a training course for dental assistants. The course consists of 24 hours of didactic education, including 10 hours of lecture, completion of progress exams and 14 hours of home study followed by completion of a written exam. Upon successful course completion the assistant is provided
with a certificate of completion. A similar course for assistants is offered by the AAOMS but includes a psychometrically validated exam given at secure testing centers.

Dental assistants may complete a Dental Sedation Assisting Course following one year of employment. (BPC 1750.4, 1750.5). This course must be approved by the Board and requires completion of 40 hours of didactic education, 28 hours of laboratory instruction and 20 supervised cases that involve sedation or general anesthesia. The assistant may apply to take a secure exam which may qualify them for licensure as a dental sedation assistant (CCR 1070.8). The course requires completion of a minimum of 110 hours of education, over four times that required by any other state.

Approved training for sedation assistants in five states consists of the satisfactory completion of courses offered by professional associations such as the AAOMS or the ADSA that require approximately 24 hours of education. We were unable to identify any state that requires the presence of a registered nurse or other medical professional during sedation or anesthesia for dental treatment. We were unable to identify any state that requires the presence of an individual dedicated to both the monitoring and administration of anesthesia or sedation who is not involved in the procedure.

Facilities

State laws specify facility requirements such as a treatment room of adequate size to accommodate the patient and three individuals, adequate lighting, a power operated chair or table, suction, a supply of oxygen, and appropriate backup systems to allow completion of a procedure in the event of a power failure. These requirements are relatively uniform for all states we reviewed.

Monitors and ancillary equipment

State laws generally require the dentist to equip the treatment room with the appropriate patient monitors and to possess the ancillary equipment necessary to provide safe anesthesia and sedation. Required equipment varies depending on the level of sedation, with additional monitors such as the electrocardiogram (ECG), a defibrillator, and capnography usually required for general anesthesia but not for moderate or minimal sedation. California’s requirements are consistent with those of other states as well as with the recommendations included in professional association guidelines.

Records

State laws specify the records that must be maintained for sedation and anesthesia, including a time dependent record of pulse, blood pressure, oxygen saturation, ECG where appropriate, the doses of medications administered and the time they are given, and any complications.
Monitoring of exhaled carbon dioxide is an emerging trend, and this is now required in twenty (20) states not only for deep sedation and general anesthesia but also for moderate sedation. In California monitoring of exhaled CO2 is mandatory only for patients who require endotracheal intubation.

**Informed Consent**

A written consent form must be completed and signed by the patient, parent or legal guardian prior to the administration of anesthesia or sedation in California as well as other states.

**Discharge**

State law requires an evaluation of the patient by a qualified person prior to discharge, and notation of their condition in the treatment record. California requires this evaluation notation as do most other states.

**Drugs necessary for the treatment of medical emergencies**

State laws require the dentist to possess the drugs necessary for the treatment of medical emergencies and to have the knowledge and ability to use these drugs. The specific medications necessary for the management of sedation and anesthesia related emergencies are listed in the sedation laws of the majority of states, as well as in professional association guidelines. These include medications necessary for the treatment of allergic reactions, respiratory emergencies, cardiac conditions including cardiac arrest, diabetic conditions, high blood pressure, low blood pressure, and antidotes (reversal agents) for sedatives and narcotics. Medications for the treatment of malignant hyperthermia are required where appropriate. Additional medications are usually required when general anesthesia is administered as compared to moderate or minimal sedation. The medications required in California are consistent with those required in other states and recommended by professional association guidelines.

**Office Inspections**

California, along with 37 other states, requires the state board to conduct an inspection of dental offices where moderate sedation and general anesthesia are given. Inspections are not usually required for offices where minimal sedation or nitrous oxide/oxygen alone are utilized. Dentists with permits for minimal or moderate enteral sedation are required to certify that they possess the specified equipment and emergency drugs and are capable of managing emergencies.

Facilities such as ambulatory care centers and hospitals where dental treatment may occur are usually accredited and licensed by other state agencies or accrediting organizations.
Most states require an inspection of dental offices by the board of dentistry every five (5) years. The inspection is either very similar to either the process utilized by the California Dental Board or the similar process described in the AAOMS Office Evaluation Manual. The office inspection requires two peer evaluators appointed by the board to inspect the facility, equipment, and emergency drugs. The evaluators must observe at least one clinical case performed by the dentist and his or her staff appropriate for the type of permit they possess. The inspection requires the dentist and his or her team to physically demonstrate the performance of up to thirteen (13) simulated emergencies. The simulated emergencies include airway obstruction, laryngospasm, bronchospasm, respiratory depression, scenarios that are widely recognized as being among the most significant complications of sedation and anesthesia. In addition the dentist and his or her team must demonstrate their skills in basic CPR and for general anesthesia permit holders advanced cardiac life support. This provides the evaluation team with an opportunity to assess the competency of sedation/anesthesia providers in their own facilities and with their own team members, including team dynamics, closed loop communication, and appropriate activation of emergency backup from first responders.

Inspections are usually graded on a pass fail basis and the results are reported for a final determination by the board. A failing grade requires the inspection to be repeated and a second failure usually results in denial of the permit to administer sedation or general anesthesia.

**Pediatric sedation requirements**

States have taken differing approaches to the regulation of pediatric sedation. Twenty five states, including California have included special requirements for young patients. California requirements apply to patients age 13 or under. An increasing number of states have adopted pediatric sedation educational requirements and permits over the past 10 years.

Nine states (California, Colorado, Florida, Georgia, Kentucky, Louisiana, Missouri, Mississippi, and North Carolina) require a permit for sedating pediatric patients. Sixteen states require specific training to administer moderate/conscious sedation to pediatric patients. Twenty-five states have specific requirements for pediatric sedation administered by the oral route.

A number of states define the pediatric patient as under the age of 12 consistent with ADA Guidelines; however other states use 13, 14, 16 and 18 years of age. Most states, including California, specify that the practitioner must have appropriately sized equipment for pediatric patients. In most states ACLS certification is deemed sufficient for treating
pediatric patients; Twenty states currently require PALS certification. California does not presently require certification in PALS.

Although ten states have adopted the AAP-AAPD Guidelines, these apply to minimal and moderate sedation only in those states. We were unable to identify any state that requires an individual dedicated to monitoring and administration of deep sedation or general anesthesia for children or adults.

Utilization of CRNA’s and MD Anesthesiologists

All states allow anesthesia to be provided in dental offices by CRNA’s and physician anesthesiologists. For some states it is difficult to determine the requirements for non-dentist anesthesia providers because they may be regulated by nursing and medical practice acts, not the dental practice act. The subcommittee felt that other professional practice acts were beyond the scope of this review.

Twenty nine states, including California, require a dentist who orders the administration of sedation or anesthesia by a CRNA to possess either a moderate sedation or general anesthesia permit issued by the board that corresponds to the level of sedation administered. A number of states, including California, require a physician anesthesiologist to obtain a permit from the Dental Board if they administer sedation or anesthesia in a dental office.

Summary

The subcommittee finds that California’s laws and regulations for dentists providing general anesthesia and moderate sedation are generally consistent with laws in other states in the following areas:

Areas of comparison

- Education
- Preoperative evaluation
- Facility
- Monitoring and Equipment
- Records
- Emergency Drugs
- Office inspection
- Pediatric and adult oral conscious sedation
Permit types

- Minimal sedation
- Moderate enteral sedation
- Moderate parenteral sedation
- Deep Sedation/General Anesthesia

The subcommittee finds that California’s laws and regulations are differ from those in other states in the following areas:

- Personnel
- Preoperative dietary instructions
- Pediatric moderate sedation (Pediatric Oral Conscious Sedation Permit)

Discussion

- Personnel

California does not require the presence of a specific number of staff for general anesthesia and moderate sedation. Thirty three states specify that there be at least two persons be present, in addition to the dentist, when general anesthesia is administered, and thirty one states specify that at least one person be present when moderate sedation is administered.

In addition, twenty nine states require the presence of a designated anesthesia monitor. Fourteen states specify training requirements for the sedation monitor, usually completion of an educational program offered by a professional association such as the AAOMS or ADSA.

- Preoperative dietary instructions

California does not presently require that instructions for pre operative fasting be given. Approximately ten states require instructions based on the planned level of sedation similar to those described in the ADA Guidelines. The ADA Guidelines recommend that preoperative dietary restrictions be considered based on the sedative technique prescribed. Some states require instructions that are consistent with those for general anesthesia, usually according to the “2-4-6” rule, with no oral intake for 2 hours prior to sedation for liquids, 4 hours for breast milk, and 6 hours for solids.

- Pediatric sedation
Although thirty three states have requirements for dentists who administer pediatric sedation, these vary, ranging from completion of a PALS course to completion of an advanced residency education program in pediatric dentistry. Requirements usually include training in pediatric oral sedation similar to California. Ten states, including California, issue a permit to dentists who administer sedation to children under thirteen, most often for moderate parenteral sedation.

Professional Dental Association Guidelines, Position Papers and Policy Statements

The dictionary definition of “guideline” is “general rule, principle, or piece of advice.” Guidelines come in the form of “Statements,” “Practice Advisories,” “Clinical Policies,” or “Recommendations.” These documents range from broad descriptions of appropriate monitoring and treatment to those offering specific guidelines on the use of particular drugs or techniques. The guidance documents we reviewed were developed by professional associations.

The subcommittee’s charge is to review state laws and association policies from the dental profession, not the medical profession. Due to requests from stakeholders we will address requests from all interested parties including the American Academy of Pediatrics and the California Society of Anesthesiologists.

Guidelines and position papers reviewed include:

- American Dental Association “Guidelines for Use of Sedation and General Anesthesia By Dentists”
- American Academy of Pediatrics-American Academy of Pediatric Dentistry “Guidelines for Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures”.
- American Academy of Pediatrics “Guidelines for Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures”
- ASA “Statement on the Anesthesia Care Team”
- ASA “Statement on Granting Privileges to Non-Anesthesiologist Physicians for Personally Administering or Supervising Deep Sedation”
- American Dental Association “Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students”
American Society of Anesthesiology: “Practice Guidelines for Sedation and Analgesia by Non-Anesthesiologists”.
American Society of Anesthesiology: “Advisory on Granting Privileges for Deep Sedation to Non-Anesthesiologists Sedation Providers.”

The Center for Medicare and Medicaid Services (CMS) includes dentists among practitioners who are authorized to administer anesthesia under the Hospital Anesthesia Services Condition of Participation 42 CFR 482.52(a). CMS Conditions of Participation are federal regulations that describe the health and safety requirements for hospitals and ambulatory surgery centers that participate in the Medicare and Medicaid programs.

The American Academy of Pediatrics submitted the “Guidelines for Monitoring and Management of Pediatric Patients Before, during and After Sedation for Diagnostic and Therapeutic Procedures: Update 2016” for review. This document is fundamentally the same document adopted by the American Academy of Pediatric Dentistry and will therefore not be addressed separately. As previously noted, The California Society of Anesthesiologists submitted three documents for review.

Guidelines for general anesthesia and sedation utilized by dentists are published by the American Dental Association (ADA) as the “Guidelines for Use of Sedation and General Anesthesia By Dentists” and “Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students”. For children 12 years of age and under, the American Dental Association supports the use of the “American Academy of Pediatrics/American Academy of Pediatric Dentistry Guidelines for Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures” (AAP-AAPD Guidelines)16. These guidelines are directed toward all dentists treating children and are not limited to members of specialty organizations or specific professional associations. Both the ADA and the AAP-AAPD Guidelines are currently undergoing revision.

Guidance documents are also published by dental specialty associations, including the American Association of Oral and Maxillofacial Surgeons and the American Society of Dentist Anesthesiologists, that are directed to their members.  

State dental associations such as the California Dental Association usually incorporate American Dental Association documents by reference into their own guidance documents and do not develop their own, however there are exceptions such as Pennsylvania.

The methodologies used to develop guidelines vary from organization to organization. For example, The American Dental Association Guidelines for the Use of Sedation and Anesthesia by Dentists and the American Academy of Pediatrics – American Association of Pediatric Dentists Guidelines are based on a careful consideration of the available literature and expert opinion. The exact nature of how studies were weighted and how conclusions were drawn is not explicitly described.

**Guideline development process**

There are many publications that describe the clinical guideline development process and full discussion of this topic is beyond the scope of this report. To summarize, the process begins by defining a clinical question. Related evidence is identified through a systematic review of the scientific literature. The quality of evidence is assessed and data are extracted and classified according to the strength of the evidence. When there is insufficient evidence expert opinion is used as a basis for recommendations, however opinion is usually given less weight than results of studies and opinion may be subject to bias. There is currently no optimal process for the assessment of opinion, and the process utilized should be as explicit as possible. In addition to scientific evidence and expert opinion, guidelines must take into account resource implications and the feasibility of interventions. Judgments about whether the costs of tests or treatment are reasonable may depend on the perspective taken, for example clinicians may view cost considerations differently than would payers or the public. Feasibility issues include time, skills staff and equipment necessary for the provider to carry out the recommendations,

---

and the ability of the system of care to implement them. None of the guidelines we reviewed addressed resource considerations or feasibility considerations.

**American Dental Association Guidelines**

The ADA *Guidelines for the Use of Sedation and General Anesthesia by Dentists* and the *Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students* (Sedation and Anesthesia Guidelines) are policy of the ADA and receive final approval by the ADA House of Delegates.

According to the ADA Constitution and Bylaws, the Council on Dental Education and Licensure (CDEL) has subject matter authority for dental anesthesiology and sedation and recommends regular proposed revisions to the Board of Trustees and House of Delegates, with the House of Delegates as the final authority. CDEL’s Anesthesiology Committee, comprised of seven sedation and anesthesiology experts and chaired by a CDEL member, develops recommendations for CDEL’s consideration using available literature, policies and guidelines of other national health care organizations and expert opinion. All proposed revisions of the Sedation and Anesthesia Guidelines are circulated to anesthesiology communities of interest; comments are invited from any individual or organization.

**American Academy of Pediatric Dentistry Guidelines**

The AAPD’s guideline development process is outlined in an overview statement outlined in their reference manual posted on their website. Guidelines are defined as:

“Systematically developed recommendations designed to assist the practitioner, patient, and caregiver in making decisions relating to specific clinical situations. Guidelines are intended to be more flexible than standards. Guidelines should be followed in most cases, but they recognize that treatment can and should be tailored to fit individual needs, depending on the patient,

practitioner, setting, and other factors. Deviations from guidelines could be fairly common and could be justified by differences in individual circumstances. Guidelines are designed to produce optimal outcomes, not minimal standards of practice.”

The AAPD Council on Clinical Affairs (CCA) is charged with the development of oral health policy guidelines. Oral health policies and clinical guidelines utilize two sources of evidence: the scientific literature and experts in the field. CCA, in collaboration with the Council on Scientific Affairs, performs a comprehensive literature review for each document. When scientific data do not appear conclusive, experts may be consulted. The CCA’s recommendations are submitted to AAPD’s Board of Trustees for review, with eventual approval at the AAPD’s General Assembly. It is unclear whether input is solicited from non-member dentists, outside organizations or the public. Detailed information is available to AAPD members only. AAP-AAPD draft guidelines are subsequently forwarded to the American Academy of Pediatrics for endorsement and are then published as a joint document.

The AAP-AAPD Guidelines were last submitted to the ADA House of Delegates for consideration in 2012. The ADA House of delegates voted to support the AAP-AAPD Guidelines for the dental treatment of children under twelve. This approach to policy for the treatment of children has been utilized by the ADA for many years.

Guidelines of the American Society of Anesthesiologists (ASA) and American College of Emergency Physicians (ACEP) are founded on an evidence based review of the sedation literature and the methodologies are quite explicit. Even in these cases the lack of definitive or comparative data on outcomes of sedation necessitate that many of the guidelines are based on “consensus” rather than “evidence”.21

The American Society of Anesthesiology (ASA) represents approximately 35,000 practicing anesthesiologists in the United States. Anesthesiology is recognized as a leading specialty of medicine in the field of patient safety research, particularly as it relates to sedation and general anesthesia. Sedation guidance documents in all branches of the healing arts are heavily influenced by standards and guidelines established by ASA.

The ASA periodically publishes guidance documents on a wide variety of topics related to sedation and anesthesia. The ASA Committee on Standards and Practice Parameters, other ASA committees, and task forces periodically collect evidence to determine whether new or existing practice guidelines are needed. The Committee develops these documents, which are

then approved by a vote of the ASA membership at the ASA House of Delegates annual meeting.

ASA Standards, Guidelines, Statements and Practice Parameters provide guidance to improve decision-making and promote beneficial outcomes for the practice of anesthesiology. They are not intended as unique or exclusive indicators of appropriate care. The interpretation and application of Standards, Guidelines and Statements takes place within the context of local institutions, organizations and practice conditions. A departure from one or more recommendations may be appropriate if the facts and circumstances demonstrate that the rendered care met the physician's duty to the patient.

Standards provide rules or minimum requirements for clinical practice. They are regarded as generally accepted principles of patient management. Standards may be modified only under unusual circumstances, e.g., extreme emergencies or unavailability of equipment.

Guidelines are systematically developed recommendations that assist the practitioner and patient in making decisions about health care. These recommendations may be adopted, modified, or rejected according to clinical needs and constraints and are not intended to replace local institutional policies. In addition, practice guidelines are not intended as standards or absolute requirements, and their use cannot guarantee any specific outcome. Practice guidelines are subject to revision as warranted by the evolution of medical knowledge, technology, and practice. They provide basic recommendations that are supported by a synthesis and analysis of the current literature, expert opinion, open forum commentary, and clinical feasibility data.

Statements represent the opinions, beliefs, and best medical judgments of the House of Delegates. As such, they are not necessarily subjected to the same level of formal scientific review as ASA Standards or Guidelines. Each ASA member, institution or practice should decide individually whether to implement some, none, or all of the principles in ASA statements based on the sound medical judgment of anesthesiologists participating in that institution or practice.

Practice parameters provide guidance in the form of requirements, recommendations, or other information intended to improve decision-making and promote beneficial outcomes for the practice of anesthesiology. The use of practice parameters cannot guarantee any specific outcome. Practice parameters are subject to periodic revision as warranted by the evolution of 22 American Society of Anesthesiologists. Resources, Clinical information, https://www.asahq.org/resources/clinical-information, accessed 7/7/2016.
medical knowledge, technology and practice. Variance from practice parameters may be acceptable, based upon the judgment of the responsible anesthesiologist.

**Practice advisories** are systematically developed reports that are intended to assist decision-making in areas of patient care. Advisories provide a synthesis and analysis of expert opinion, clinical feasibility data, open-forum commentary, and consensus surveys. Practice Advisories developed by the American Society of Anesthesiologists (ASA) are not intended as standards, guidelines, or absolute requirements, and their use cannot guarantee any specific outcome. They may be adopted, modified, or rejected according to clinical needs and constraints and are not intended to replace local institutional policies. Practice Advisories are not supported by scientific literature to the same degree as standards or guidelines because of the lack of sufficient numbers of adequately controlled studies. Practice Advisories are subject to periodic update or revision as warranted by the evolution of medical knowledge, technology, and practice.

We reviewed three documents submitted by the California Society of Anesthesiologists, including:

- Statement on Granting Privileges to Non-Anesthesiologist Physicians for Personally Administering or Supervising Deep Sedation
- The ASA Statement on the Anesthesia Care Team
- ASA Standards for Basic Anesthesia Monitoring.

We reviewed the following definitions published by the ASA that apply to these statements:

1.1 Anesthesia Professional: An anesthesiologist, anesthesiologist assistant (AA), or certified registered nurse anesthetist (CRNA).

1.2 Non-anesthesiologist Sedation Practitioner: A licensed physician (allopathic or osteopathic); or dentist, oral surgeon, or podiatrist who is qualified to administer anesthesia under State law; who has

---

not completed postgraduate training in anesthesiology but is specifically trained to administer personally or to supervise the administration of deep sedation.

1.3 Unrestricted general anesthesia shall only be administered by anesthesia professionals within their scope of practice (anesthesiologists, certified registered nurse anesthetists and anesthesiologist assistants).

**National Guidelines Clearinghouse**

The U.S. Department of Health and Human Services, Agency for Healthcare Research and Quality hosts the National Guidelines Clearinghouse. The Clearinghouse maintains a database of guidelines that must meet inclusion standards. Clinical practice guidelines must be submitted by a medical specialty association, relevant professional society, government, or healthcare organization and must be based on a systematic review of evidence that is intended to assist practitioners and patients with decisions for specific clinical circumstances. None of the professional association guidance documents we reviewed are listed by the Clearinghouse. It is unclear whether or not they met inclusion criteria or were submitted for consideration by the Clearinghouse.

**Discussion**

We provide a side by side comparison table of California’s dental sedation laws, the American Dental Association Guidelines and the AAP-AAPD Guidelines as Appendix 2. Although these guidelines are not recognized by all states they come close to establishing national parameters for sedation and anesthesia care for the dental profession. Other professional dental association guidelines include similar information that appears to be directed toward a specific association membership. The following guidance documents are provided for reference but are not included in the comparison tables.

1. American Association of Oral and Maxillofacial Surgeons, Parameters of Care, Clinical Guidelines

2. American Society of Dentist Anesthesiologists Parameters of Care

**Comparison tables to show differences and similarities between California laws and the ADA and AAP-AAPD Guidelines are organized by topic. Please see Appendix 2, Tables 1-10.**

---

25 Inclusion Criteria, National Guideline Clearinghouse, [https://www.guideline.gov/about/inclusion-criteria.aspx](https://www.guideline.gov/about/inclusion-criteria.aspx)
Area of comparison

- Definitions Table 1
- Education - Table 2
- Preoperative evaluation – Table 3
- Personnel - Table 4
- Facility – Table 5
- Monitoring and Equipment – Table 6
- Records – Table 7
- Emergency Drugs – Table 8
- Office inspection – Table 9
- Preoperative dietary instructions – see Table 3

Summary

Areas where California requirements are consistent with professional guidance documents include:
- Preoperative evaluation
- Facility
- Monitoring and equipment
- Records
- Emergency drugs
- Office inspection

Areas where California requirements are different:
- Monitoring
- Personnel
- Education
- Preoperative fasting
Discussion

The ADA Guidelines are prescriptive and state which monitors should be used for each level of sedation. The ASA Standards for Basic Anesthetic Monitoring use a similar approach.26

The ADA guidelines specify that ECG monitoring should be considered during moderate sedation for patients with cardiovascular disease and that use of the ECG is required for patients receiving general anesthesia. They also state when an intravenous line must be established, and how ventilation and respiration are monitored.

In contrast, California law states the dentist must possess the necessary equipment, but leaves the use of the equipment to the discretion of the dentist. The use of a pulse oximeter is required for all levels of sedation. California law specifies the records that must be maintained and specifies the recording intervals for vital signs. It would be impossible for the dentist to maintain the required records without monitoring, therefore adding a specific monitoring requirement for vital signs and pulse oximetry might be considered redundant. Capnography is required for intubated general anesthesia only which is consistent with ADA guidelines. ASA monitoring standards indicate capnography is required for all patients undergoing sedation or anesthesia.

The AAP-AAPD Guidelines follow a similar approach to that used by California and list the drugs and equipment that should be present and available and which records should be maintained, but does not state which monitors or techniques must be used. California law is consistent with AAP- AAPD Guidelines in this area.

The ASA “Statement on Granting Privileges to Non-Anesthesiologist Physicians for Personally Administering or Supervising Deep Sedation” includes the following language:

“Nonanesthesiologist physicians may neither delegate nor supervise the administration or monitoring of deep sedation by individuals who are not themselves qualified and trained to administer deep sedation, and the recognition of and rescue from general anesthesia.”

California law permits delegation of limited monitoring duties to dental assistants, but does not permit delegation of the administration of sedation or anesthesia other than nitrous oxide and oxygen, except as otherwise allowed by law. (see Business and Profession Code 1750.1(f).)

Trained and licensed assistant may assist with sedation or anesthesia as specified. ADA Guidelines and AAP-AAPD Guidelines also describe the role of personnel who may monitor moderate sedation as well as deep sedation/general anesthesia, although the qualifications of these personnel are not specifically addressed, but must be appropriately trained and qualified.

The ASA Statement on the Anesthesia Care Team indicates that although the Anesthesia Care Team may include non-physicians, the Team should be directed by an anesthesiologist.

California law does not presently require the presence of an anesthesiologist in a dental office where anesthesia is given and authorizes dentists who hold a general anesthesia permit to administer deep sedation/general anesthesia. The AAP-AAPD Guidelines address the administration of deep sedation and general anesthesia in dental facilities such as dental offices through a description of the necessary skills and qualifications. For facilities that function under a department of anesthesiology the AAP-AAPD guidelines defer to the ASA policies implemented by the department.

The ASA Standards for Basic Anesthesia Monitoring describe which monitors should be used for the different levels of sedation and general anesthesia, and indicate that there should be continuous monitoring with an ECG, pulse oximeter, capnograph and blood pressure recorded every five minutes.

Current California law requires continuous pulse oximetry for all levels of sedation and anesthesia. Although an ECG must be available for dentists who administer general anesthesia, its use is not required. Vital signs must be recorded at 5 minute intervals. Dentists who administer moderate sedation are not required to possess or use an ECG or capnograph, and must record vital signs at regular intervals. The ADA Guidelines specify continuous ECG monitoring for patients receiving deep sedation or general anesthesia but do not indicate mandatory use of capnography except for intubated patients or those receiving volatile agents. The AAP-AAPD Guidelines indicate that monitors must be available.

Education

California’s educational requirements for moderate sedation, adult and pediatric oral conscious sedation (OCS), conscious sedation, and general anesthesia permits are consistent with the ADA Guidelines but differ from the corresponding ADA educational guidelines in several areas. See Table 2 for a side by side comparison.
• Adult oral conscious sedation permits - California law requires one patient experience. ADA Guidelines recommends three patient experiences.

• Pediatric sedation - In California there are specific training requirements for the Oral Conscious Sedation for Minors permit. The ADA Guidelines specify that additional experience should be required for sedating pediatric patients.

• California does not have age specific requirements for sedation administered via parenteral routes or for pediatric deep sedation/general anesthesia. The ADA and AAP-AAPD also do not provide specific pediatric sedation training requirements and defer to CODA accreditation standards for advanced education.

• California law does not require completion of PALS for dentists who sedate pediatric patients. The value of the PALS course for sedation providers may be limited. A course dedicated to pediatric sedation that focuses on airway management, preferably with a patient simulator component, may be more appropriate.

**Personnel**

California does not require that a specific number of staff be present for general anesthesia or moderate sedation, however this is well established as a community practice standard. Both the ADA and AAP-AAPD Guidelines specify that there be two persons present in addition to the dentist for general anesthesia or deep sedation, and at least one other person for sedation. The AAP-AAPD Guidelines specify the presence of one person whose only responsibility is to constantly observe the patient’s vital signs, airway patency, and adequacy of ventilation and to either administer drugs or direct their administration, for deep sedation/general anesthesia.

California, like other states, does not have specific requirements for pediatric deep sedation or general anesthesia other than possession of a general anesthesia permit.

**Preoperative dietary instructions**

• California does not specify that preoperative dietary instructions be given. ADA Guidelines state that dietary precautions should be considered based on the sedative technique prescribed. The AAP-AAPD Guidelines include the following statement:

  “the practitioner should evaluate preceding food and fluid intake, ....but because the absolute risk of aspiration during procedural sedation is not yet known, guidelines for fasting periods before elective sedation generally should follow those used for elective general anesthesia. For emergency procedures in children who have not fasted, the risks of sedation and the possibility of aspiration must be balanced against the benefits of performing the procedure promptly. Further
research is needed to better elucidate the relationships between various fasting intervals and sedation complication”.

- The 2016 draft ADA guidelines incorporate the ASA Practice Guidelines on Preoperative Fasting by reference.27

Literature Review - Sedation and General Anesthesia for Pediatric Dental Patients

The published literature on pediatric sedation and anesthesia is extensive and a comprehensive review is beyond the scope of this assignment. This section should be considered an overview, not an in depth analysis of the available literature.

We considered a number of approaches to a literature review, including an evidence based systematic review. The subcommittee found that recent systematic reviews of the pediatric sedation literature have been completed, although not in the United States.28 Because there is insufficient evidence to support recommendations for some aspects of pediatric sedation most guidance documents must also rely on a consensus of opinion. This reduces the strength of certain recommendations. Controversies nearly always involve differences of opinion that are unlikely to be resolved by additional systematic reviews.

Search strategy

The subcommittee conducted an electronic literature search in of the Medline, Cochrane Library, and DOSS EBSCO databases. Search terms included safety, morbidity, mortality, complications, moderate sedation, deep sedation, general anesthesia and dental offices; Fields: all; Limits: within the last 10 years, humans, all children from birth through age 21, language: English; clinical trials and literature reviews.

The subcommittee selected articles judged to be relevant pediatric dental sedation safety within the United States healthcare system. Articles on local anesthesia, nitrous oxide and minimal sedation were excluded. In an effort to reduce risk of bias we requested references from stakeholders and interested parties. Additional articles were obtained by reviewing references. Selected articles with abstracts were downloaded into a reference manager. We obtained full text versions of the most relevant articles which are provided as references for this report.

**Anesthesia outcomes research - See Figure 1**

Anesthesia outcomes research has undergone considerable evolution over time. Although randomized trials remain the gold standard for clinical evidence, results obtained from such efficacy trials often generalize poorly. Furthermore, conventional randomized trials are limited in that mortality and other serious complications are usually too rare to practically address. There is thus increasing interest in clinical effectiveness studies in which interventions are evaluated over an entire health care environment. Researchers from the Anesthesia Outcomes Consortium at the Cleveland Clinic are presently utilizing innovative randomized effectiveness studies in which decision support systems, combined with electronic anesthesia records are utilized. 29 Cravero and others have reported the development of an integrated outcome database for pediatric anesthesia which holds great promise for the future. 30

**Pediatric sedation studies**

Review articles identify very few high quality published reports and clinical trials related to pediatric sedation for dentistry. 31 32 This may be due to the practical difficulties of enrolling sufficient number of children into adequately controlled and blinded studies.

Ashley et al have published one of the few systematic reviews of pediatric dental sedation, and stated that they found no randomized controlled trials that compared sedation to general anesthesia for pediatric dentistry. Lorenco-Matharu et al, in their systematic review, were able to find weak evidence of the effectiveness of midazolam, but identified few if any high quality pediatric sedation studies.

Lee noted that the study of the safety of pediatric dental anesthesia has been limited. Although there are a number of reports of serious injury or death related to pediatric dental anesthesia, there is also a lack of systematic research in this area. Because significant anesthesia injury is a relatively rare occurrence, it is difficult to study prospectively or by retrospective medical record review, even when data is collected from multiple institutions.

**Anesthesia morbidity and mortality data**

Morbidity and mortality figures have been used to determine patient risk and, hence, have played a prominent role in establishing malpractice premiums and in efforts to legislate the practice of sedation and general anesthesia in dentistry. Though it is important to know the frequency of these events, their incidence can be misleading, because the numbers do not describe the events. Questions concerning characteristics of the patients, the practitioners, drugs used, patient monitoring, and resuscitative efforts remain obscure. Thus, incidence figures cannot explain why morbidity and mortality occurs, nor how to prevent it. For example, do these events represent acute hypersensitivity reactions of healthy patients in the hands of

---

practitioners performing proficiently or do they result from the negligent efforts of incompetent professionals? Answers to these questions are as important as incidence data for judging safety, assessing patient risk, and for determining the need and direction of future legislative efforts.

We reviewed anesthesia morbidity and mortality studies of the general and pediatric populations because pediatric morbidity and mortality is thought to represent a subset of adult morbidity and mortality, although there are important differences. Li et al.\(^\text{37}\) provide recent estimates of anesthesia mortality risk based on studies conducted in Europe, Japan, and Australia. They hypothesize that the paucity of anesthesia mortality studies in the United States in recent years is compounded by several factors. First, improvement in anesthesia safety has made anesthesia-related deaths rare events; and studying rare events usually requires large sample sizes and considerable resources. Second, there is not an established national surveillance data system for monitoring anesthesia mortality. Lastly, clinical practice of anesthesia has expanded so much that it is extremely difficult to gather exposure data. It is estimated that most surgical anesthesia procedures are now performed in ambulatory care settings. The use of anesthesia for therapeutic and diagnostic purposes is also on the rise.

A systematic review of Brazilian and worldwide literature\(^\text{38}\) provides a summary of the studies of mortality incidence of pediatric patients who underwent anesthesia in developed countries between 2001 and 2011. This review reports mortality as 0.41-13.4 per 10,000 hospital discharges. Major risk factors include age < 1 year old, ASA III or higher physical status, emergency surgery, general anesthesia and cardiac surgery. Although this report reviewed outcomes from all ASA levels the authors note although rare, anesthesia related mortality still occurs in ASA physical status I-II children.

We searched for studies that reported outcomes for relatively healthy patients because dentists are more likely to provide office sedation and anesthesia to ASA I and II patients. A recent report by Schiff\(^\text{39}\) provides anesthesia related mortality statistics from the first study to

utilize a standardized national tracking data base that allows calculation of the total number or cases, a “denominator”, that is not available from closed claims data. This study reports outcomes for 1,374,678 patients, including ASA I and II patients undergoing elective surgery in secondary hospitals, and indicates that risk of death or a serious complication from anesthesia is approximately 10 per million anesthetics.

A 1989 Harvard study reported ASA I-II anesthetic related deaths, following implementation of improved monitoring standards, to be 1:244,000, but due to study limitations the data was not statistically significant. Lagasse includes a review of published research related to anesthesia mortality prior to 1999 and reports similar findings.

The authors of these studies caution the reader that there is no standardized definition of anesthesia related mortality, and that this determination often relies on subjective interpretation of various definitions. Differences in methodology make it difficult to compare mortality rates among different studies because the mortality rate may depend on the surgical population being studied. Although these studies do not support a firm conclusion, they suggest that anesthesia related mortality for ASA I and II patients treated in inpatient facilities may be in the range of 1:100,000 - 1:250,000.

Office based surgery and anesthesia outcomes

We searched for reports of anesthesia safety data from office based facilities because dental treatment is usually provided in the office setting. Shapiro\textsuperscript{43} reports a lack of randomized controlled trials that have measured morbidity and mortality in office based surgery and office based medical procedures. However there are numerous retrospective studies that compare morbidity and mortality outcomes in office, hospital, and ASC settings. The author concludes that much of the available literature confirms that there is a low rate of complications during office-based procedures and that risk in office based surgery is similar to other ambulatory settings.

Results from outcome studies of office based surgery usually include complications from surgical procedures, including cosmetic procedures such as liposuction and abdominoplasty with liposuction. These procedures are associated with death from pulmonary embolism and other complications not usually encountered with dental procedures. Data from the AAAASF quality assurance program included over a million outpatient procedures from 2001-2006 and reported a mortality rate of 0.002%.\textsuperscript{44} Thirteen of 23 deaths were caused by pulmonary embolism. Studies of office based cosmetic procedures emphasize that there is inherent risk related to certain office based cosmetic procedures that should not be generalized to office based surgery in general.

Much of the knowledge related to anesthesia safety in the ambulatory setting stems from the American Society of Anesthesiologists’ (ASA) Closed Claims Database. The ASA Closed Claims Project is described in a subsequent section of this report.

Pediatric Dental Anesthesia Safety Research – See Figure 2

Our search identified only a handful of studies of anesthesia safety related to pediatric dentistry. One of the best known studies addressed complications of pediatric sedation through critical incident analysis. This study reported that 29% of adverse events were related

to dental treatment. The study utilized a panel of four physicians who reviewed 118 reports of adverse sedation events from the FDA adverse event reporting system accumulated between 1969 and 1996, which yielded 51 reports of deaths, 9 cases of permanent neurological injury, and 21 cases of prolonged hospitalization without injury. Additional data was collected from USP adverse events and surveys of pediatric anesthesiologists, intensivists and emergency specialists. Patients were age < 20 years. Cases where general anesthesia or MAC (sedation) was performed by an anesthesiologist were excluded. Inadequate resuscitation, death and permanent neurological injury were more frequent in non-hospital based facilities. As with other studies, presenting events included respiratory events such as desaturation, apnea and laryngospasm with cardiac arrest occurring as a second or third event. The majority of patients were age 6 or less. Causes or contributing factors included drug related events, inadequate monitoring, inadequate resuscitation, and inadequate medical evaluation. The authors recommend improved insurance coverage for dental anesthesia, better training for dentists who use sedation, development of specialty independent guidelines and better regulation of facilities.

This report does not include an estimate of the incidence or prevalence of dental sedation/anesthesia morbidity and mortality. It includes data from a period approximately 27 years. During this time period there have been significant improvements in anesthesia safety and the results may not indicate outcomes from more recent practice. Lee reported a review of media reports of pediatric deaths related to dental treatment of 44 patients between 1980 and 2011, for patients up to age 21. The majority of deaths occurred between ages 2-5 (46.7%) and 13-21 (29.6%). The majority of deaths occurred in the office setting, the most common treatment location for general dentists, with the majority (45.5%) being related to moderate sedation, 22.7% relate to general anesthesia and 22.7% not reported. The authors comment that it is not possible to evaluate the incidence and prevalence of pediatric sedation adverse outcomes without establishing an appropriate database.

The dental profession has published numerous studies of outcomes from sedation and anesthesia. Early epidemiological reports were based primarily on retrospective data, voluntary surveys of professional association members, with small sample sizes making them of limited value. These studies are well known and will not be repeated here. Other studies we reviewed were reports of specific drug combinations and techniques that utilized sample sizes of a few hundred patients from a single site. Again we felt these were of limited value.

Perrott47 et al reported results from a prospective cohort study of 34,191 consecutive patients of whom 71.9% received office based deep sedation/general anesthesia, 15.5 % received conscious sedation, and 12.6 % received local anesthesia. Study methods included an audit of data collection to reduce selection bias and ensure cases were entered consecutively. Data was collected from 79 oral surgeons between January 2001 and December 2001 at 58 study sites between located in six geographical regions of the United States. Most complications were minor and self limiting and two patients required hospitalization. There were no deaths.

Lee 48 et al published a prospective comparison study of the safety of anesthetic outcomes of propofol and methohexital anesthesia administered to 47,710 consecutively assigned patients between January 2001 and December 2007. 0.7 % experienced adverse events, mostly post operative nausea and vomiting without aspiration, laryngospasm in the methohexital group, and syncope or prolonged emergence. Nine patients required hospitalization due allergic reaction to antibiotics and minor surgical complications such as persistent pain or wound problems (3 patients) to prolonged emergence with delirium and one case of bronchospasm with aspiration, one due to new onset dysrhythmia and two were not described. The study reported no deaths or brain damage. The study included 2404 patients who received anesthesia from a physician anesthesiologist or CRNA. This arm of the study was underpowered but reported no significant difference between providers.

Inverso et al. \(^{49}\) compared the complications of moderate sedation with deep sedation/general anesthesia for 29,548 adolescent patients with average age of 17.3 undergoing third molar surgery between January 2001 and December 2010. Prospective data was collected from 79 surgeons at 58 sites across the US. As with previous studies the most common complications were post operative nausea and vomiting, prolonged recovery, syncope, and laryngospasm with a complication rate of 0.8% overall. There were no reports of new neurologic impairment and apparently no deaths. Patients receiving moderate sedation had a nominally lower rate of complications but this was not statistically significant.

Other investigators of anesthesia outcomes have utilized similar sized populations and have noted that very large populations must be studied to fully evaluate the occurrence of rare but serious outcomes such as brain injury or death. These studies may be underpowered to identify rare but serious outcomes such as death and brain damage. Large scale multi center studies are necessary, but the resources necessary to enroll populations of sufficient size and to maintain adequate controls are significant. High quality studies of pediatric dental sedation outcomes might be accomplished through a well established national outcomes registry.

### Closed claims data

In a 1999 landmark study Cheney at al ⁵⁰ describes how the study of insurance company closed claims provides a cost-effective approach to data collection with extensive data on injuries that occurred in many different institutions gathered in a centralized location. Typically, a closed claim file consists of the hospital record, the anesthesia record, and narrative statements of the involved healthcare personnel, expert and peer reviews, deposition summaries, outcome

---

Although the use of closed claims circumvents the problem of gaining access to low-frequency adverse events, this approach has inherent limitations that must be considered when interpreting the data. For example, closed claims review does not provide information as to how many anesthetics were administered. Therefore, closed claims data does not provide a denominator for calculating the risk of anesthetic injury. In addition, some injured patients do not file claims, whereas others without any apparent injury do file claims. Closed claims analysis provides a snapshot of anesthesia liability, but is not a comprehensive picture of all anesthetic injury. Injuries leading to claims are not a random sample of all injuries, and we do not know how closely this snapshot resembles the whole picture of anesthetic injury. Another limitation of closed claims analysis is the retrospective nature of data collection. The information was gathered by the insurance companies for the purpose of resolving the claims, not for patient safety research. Data from different sources may be conflicting, and some data may be missing. In addition, it takes an average of 5 years for cases to become available for review due to the time necessary for them to be resolved. Closed claims analysis is useful for generating hypotheses about the mechanism and prevention of anesthetic injury, but cannot be used for testing of those hypotheses. As a retrospective study, it cannot establish a cause-and effect relationship of previous events, nor of changes in claim experience.

Closed claims data also provides information about risk related to the location in which sedation and anesthesia is administered. Domino’s original report indicated that the severity of injury was greater for office based claims than for other ambulatory settings, with 40% for death compared to 25% for other ambulatory claims. Respiratory events, airway obstruction, bronchospasm, inadequate oxygenation-ventilation and esophageal intubation were the most common complications (29%). These adverse events were deemed preventable through better monitoring.

Monitored anesthesia care (MAC) accounted for 50% of out of operating room claims. Respiratory depression from MAC accounted for 21% of claims and death or permanent brain damage accounted for 40% of MAC claims. Although this proportion is similar to general anesthesia claims and suggests that MAC and general anesthesia have similar risk profiles,

---

Bhananker’s study\(^{52}\) includes outcomes from MAC in both inpatient and outpatient facilities making it difficult to draw conclusions about the safety of MAC in outpatient facilities. Jimenez\(^{53}\) et al reported a study of closed pediatric claims between the 1970’s and the 1990’s. Death and brain damage were the most common reason for claims in the 16 or younger age group. 77% of cases involved relatively healthy patients with ASA PS 1 or 2, and the most common procedures involved the airway. The proportion of claims assessed as preventable by better monitoring decreased from an average of 63% in the 1970’s to 16% in the 1990’s, possibly due to better monitoring, however cardiovascular events (26%) joined respiratory events as being most important. The authors indicate that the policy implications of the data are unclear; including whether pediatric anesthesia specialists provide safer care for younger higher risk patients and what type of case should be performed in what type of facility.

Closed claims review has also been utilized as a data source to study dental sedation/anesthesia related morbidity and mortality. Jastak and Peskin\(^{54}\) evaluated 13 claims that occurred between 1974 and 1989 from patients of all ages. Adverse outcomes were most often due to airway obstruction or respiratory depression resulting in hypoxia and 10 of 13 cases were judged to be avoidable through the use of better monitoring. The majority of patients had pre-existing medical conditions and were rated as ASA II or III. The authors conclude that the very old and very young are at greatest risk.

Deegan\(^{55}\) reported 136 claims from the American Association of Oral and Maxillofacial Surgeons National Insurance Company accumulated between 1988 and 1999. At that time AAOMS National insured approximately 55% of the oral surgeons practicing in the US. Thirty five percent of claims involved patients rated ASA III or IV. The majority of anesthesia related complications were due to airway obstruction and respiratory depression, and 66% of claims were judged to be avoidable through better monitoring. The authors conclude that the very old and very young are at greatest risk.

---

seven claims involved serious injury or hypoxic brain damage as the result of both office and inpatient anesthesia. The authors state that there were equal numbers of claims from both conscious sedation and general anesthesia. Unlike most other closed claims studies the authors provide an estimate of the total number of cases performed and an estimate of the incidence of office deaths as 1: 747,000 administrations. There were 23 deaths and one brain damage case from office anesthesia and 11 deaths and 4 brain damage cases from inpatient anesthesia provided by anesthesiologists or nurse anesthetists.

Nkansah \(^{56}\) et al published a report of anesthesia outcomes for oral and maxillofacial surgeons from the Canadian province of Ontario utilizing claims data from the Regional professional liability program that covers all claims originating from Ontario between 1973 and 1995. The Canadian model of anesthesia delivery is similar to that utilized in the US, with the OMS administering the anesthesia and performing the surgery with trained assistants. The authors provide an estimate of total cases performed during the study interval via survey of members of the professional association. Four deaths occurred, with one administered by a dentist anesthesiologist and three by oral and maxillofacial surgeons. A single case involving anesthesia administered by a physician anesthesiologist was excluded. The author estimates an incidence of mortality of 1.4 per 1,000,000.

A more recent closed claims review by Chicka \(^{57}\) et al evaluated adverse events during pediatric dental sedation. This study reviewed 17 claims accumulated between 1993 and 2007 from two major insurance carriers. Reports were limited to pediatric cases age <13 with 78% age 5 or less. 13 claims involved sedation, 3 involved local anesthesia alone, and one involved general anesthesia. The average age of the patient was 3.6 years and only one case involved the use of physiologic monitoring. The study included only claims from office based treatment. Over half (53%) were claims from a death or permanent brain damage.

Bennett et al published the most recent closed claims study of dental cases, reporting information from 113 closed claims cases from the files of a national insurance carrier for

approximately 80% of oral and maxillofacial surgeons practicing in the United States.58 This company tracks the number of anesthetics performed annually. Claims were for cases that resulted in death or brain injury collected over 14 years, between 2000-2013. The authors do not provide details that indicate specific adverse events or contributing factors, but indicate that the majority of adverse outcomes are related to respiratory events. This study did not provide patient age related data. Unlike most other closed claims studies this report provides an estimate of the overall number of cases performed and an estimate of the incidence of anesthesia morbidity and mortality as one per 348,602 cases.

State Board Data

Investigators have attempted to gather information from state dental boards; however collection and storage of data vary state to state which limits the value of this data. State board outcomes data has the potential to inform policy decisions. State laws specify mandatory reporting of patient deaths or hospitalization. This improves the reliability of dental board data compared to closed claims reports or self reporting by the members of professional associations. The total number of patients treated, however, remains unknown. This makes accurate calculation of the incidence and prevalence of adverse events impossible because, as with closed claims data, there is no “denominator”. Death and serious injury cases often involve lengthy legal proceedings that require 3 or more years to elapse before information can be made available. Dental boards collect information to manage enforcement actions, not for clinical research, and state records retention and disclosure policies may conflict with data collection. Standardization of data collection across state dental boards has the potential to provide meaningful information, however this has yet to occur.

Krippaehne and Montgomery requested morbidity and mortality information from dental boards in all 50 states and Puerto Rico related to either general anesthesia or sedation in dental offices. The information requested included the formal complaint, the formal order and judgment by the board, expert opinions, and the medical examiner’s report. They received responses from all states and Puerto Rico; however, most states had not kept records on such

cases and hence, could not contribute to the database. Forty-three cases were reported by nine states, with mortality comprising 81% of the cases.\textsuperscript{59}

Dental board data provides important details of adverse outcomes from sedation and anesthesia that may not be available from other sources. As with closed claims data, dental board data is retrospective, but is still useful in generating a hypothesis about the mechanism of injury and how it might be prevented in the future.

**Dental Sedation and Anesthesia Outcomes Reports**

**The Pediatric Sedation Research Consortium**

The Pediatric Sedation Research Consortium (PSRC) has made significant contributions to pediatric sedation research, demonstrating a remarkable safety record for sedation provided by highly motivated and skilled practitioners from a variety of specialties functioning outside the operating room. The PSRC collected data from 37 participating institutions within large children’s hospitals, children’s hospitals within hospitals and general/community hospitals.\textsuperscript{60} The Consortium has published a series of prospective observational studies that have demonstrated many of the concepts important to the safe administration of pediatric sedation. Over time the PSRC has accumulated a large database of children up to age 21.

The authors of the PSRC studies describe the limitations of their studies. Reporting institutions are self selected for voluntarily reporting of their outcomes, and represent a highly motivated and organized systems that would outperform other, less controlled systems and may represent “best practice.” The practice patterns and outcomes of the PSRC represent a highly competent cohort that may not generalize to other clinical settings in which sedation care is provided.\textsuperscript{61}

Although the PSRC studies include data from a wide variety of providers, dentists are significantly underrepresented in this series. Only 0.80% or 397 of nearly 50,000 cases were dental cases. Dentists are grouped in the “other” category with pediatric residents or fellows, radiologists, surgeons, advanced practice nurses, certified registered nurse anesthetists, and registered nurses. In addition, the PSRC data was accumulated from inpatient facilities such as pediatric hospitals and community hospitals with pediatric sedation services that are not usually utilized for dentistry. As a result, it is impossible to generalize results from the PSRC studies to community dental practices. Nevertheless, the “best practices” utilized at PSRC facilities have broad application to pediatric sedation in all settings.

Couloures et al reported the results of an analysis of 133,941 procedural sedation records from the PSRC that evaluated a comparison of the major complication frequency of sedation performed by pediatric specialists outside of the operating room. There was no statistical difference between different sedation providers’ major complication rates.

Langhan et al reported the results of a study of physiologic monitoring practices during pediatric sedation from the PSRC. Data from 114,855 subjects were collected and analyzed. The frequency of use of each physiologic monitoring modality by health care provider type, medication used, and procedure performed varied significantly. The largest difference in frequency of monitoring use was seen between providers using electrocardiography (13%-95%); the smallest overall differences were seen in monitoring use based on the American Society of Anesthesiologists classifications (1%-10%). Guidelines published by the American Academy of Pediatrics, the American College of Emergency Physicians, and the American Society of Anesthesiologists for non-anesthesiologists were adhered to for only 52% of subjects.

Despite the variability in monitoring, serious adverse outcomes during procedural sedation were uncommon. The authors conclude that further research is needed to develop evidence-based guidelines for procedures outside the operating room: report from the Pediatric Sedation Research Consortium. Pediatrics, 118(3), 1087–1096. http://doi.org/10.1542/peds.2006-0313

based guidelines regarding the appropriateness of various monitoring modalities and their effect on adverse outcomes that are associated with sedation.

Cravero, et al reported the results of a study of data from thirty seven locations that submitted data on 49,836 propofol sedation. The authors state that given the potency of propofol and the nature of pediatric patients, essentially all children administered propofol would clearly be categorized as being deeply sedated or anesthetized. Despite varying guidelines, propofol sedation/anesthesia is delivered to children for procedures in emergency departments, intensive care units, and sedation/anesthesia units all over the United States (and around the world) by pediatric generalists and subspecialists every day.

The authors stress that the results of their study should not reassure providers that propofol sedation/anesthesia of children is safe, but it helps define the competencies required to deliver this care.

Summary

Review articles identify very few high quality published reports and clinical trials related to pediatric sedation for dentistry. This may be due to the practical difficulties of enrolling sufficient number of children into adequately controlled and blinded studies.

Because significant anesthesia injury is a relatively rare occurrence, it is difficult to study prospectively or by retrospective medical record review, even when data is collected from multiple institutions.

The effect that provider type or personnel type has on outcomes has received little study, particularly as related to pediatric dentistry.

There is no standardized definition of anesthesia related mortality, and this determination often relies on subjective interpretation. Differences in methodology make it difficult to compare mortality rates among different studies because the mortality rate may depend on the surgical population being studied. Available studies do not support a firm conclusion, but

suggest that anesthesia related mortality for ASA I and II patients treated in inpatient facilities is in the range of 1:250,000.

Several studies indicate that the most common complications of pediatric sedation include respiratory events such as desaturation, apnea and laryngospasm with cardiac arrest occurring as a second or third event. Complications may be more frequent under age 6, with younger patients and higher ASA physical status classification III or IV at greater risk. Causes or contributing factors include drug related events, inadequate monitoring, inadequate resuscitation, and inadequate medical evaluation.

Although pediatric sedation has an excellent safety record, adverse outcomes sometimes occur in apparently healthy patients indicating that there is inherent risk in sedation and general anesthesia.

Dental advanced educational programs that include training in moderate sedation, deep sedation, and general anesthesia

CODA accreditation of advanced educational programs

The Commission on Dental Accreditation (CODA) was established in 1975 and is nationally recognized by the United States Department of Education (USDE) as the sole agency to accredit dental and dental-related education programs conducted at the post-secondary level. CODA accreditation is a non-governmental, voluntary peer review process by which educational institutions or programs may be granted public recognition for compliance with accepted standards of quality and performance. Accreditation standards are developed in consultation with those affected who represent broad communities of interest. A comparison table of education for training in various levels of sedation is included as Appendix 2 Table 1.

Postgraduate CODA approved residencies that require deep sedation-general anesthesia training.

Oral and Maxillofacial Surgery (OMS) (48-72 months of Post Graduate Education)\(^1\)

OMS’s complete, at a minimum, a post graduate CODA approved residency of 48 months (single degree-DDS). Approximately half of those trained complete a 72 month residency (dual degree-DDS,MD).

The following CODA approved post graduate residency training programs (after dental school-4 years) require 36 months for dental anesthesiology, 30 months for periodontics, 24 months for pediatric dentistry, and 12-24 months for general practice (GPR).

**OMS Sedation / General Anesthesia Training During Residency Training**

- During OMS training, a resident completes the equivalency of a PGY1 year of anesthesia training.

- During the four or six year residency, each resident receives didactic education in subjects related to anesthesia including anatomy, pharmacology, and physiology, patient evaluation, risk assessment, anesthesia and sedation techniques, patient monitoring, and diagnosis and management of emergency complications. They also complete a structured course in physical diagnosis including patient evaluation and risk assessment.

1
• The clinical training currently includes five (5) months on the hospital medical anesthesia service functioning at an anesthesia resident (PGY1) level with responsibility for patient evaluation, risk assessment, anesthesia and sedation techniques, patient monitoring, and diagnosis and management of complications.
• Clinical experience shall also include training to competency in airway management (simple, direct/ fiber optic intubation, emergency tracheotomy).
• CODA training requirements require the resident to perform 300 cases of general anesthesia of which 50 are pediatric patients and 150 of the 300 must be ambulatory anesthesia for OMS.
• CODA approved training also requires hospital based rotations with the resident functioning at a PGY1 level: two (2) months on the medicine service (for non MD programs); four (4) months on the general or a sub-specialty surgery service; and a rotation on the hospital emergency service.
• In addition, the OMS resident is required to complete the following certifications: Advanced Trauma Life Support (ATLS); Certification and currency in Advanced Cardiac Life Support (ACLS); and Pediatric Advanced Life Support (PALS).

Dental Anesthesiology ² (36 month Post Graduate Education)

Note: until recently, a CODA approved residency in dental anesthesiology was 24 months. The current residents in dental anesthesiology must receive didactic instruction at an advanced in-depth level for applied biomedical sciences foundational to dental anesthesiology, physical diagnosis and evaluation, methods of anxiety and pain control, complications and emergencies, and pain management.

The clinical requirements must include a minimum of 24 months in anesthesia with a minimum of this period of 6 months devoted to dental anesthesiology. Twelve months over the 36 month period must be assigned full-time to a hospital anesthesia service. They must complete 800 total cases of deep sedation/general anesthesia: 300 cases must be intubated general anesthetics including 50 nasal intubations and 25 advanced airway management techniques; 125 children age 0-7 seven; and 75 patients with special needs. At least 100 of 800 cases must be out-patient anesthesia for dentistry and the resident must be the provider. Additionally, the resident must participate in four (4) months of clinical medical rotations of internal medicine; intensive care; pain medicine; pediatrics; or pulmonary medicine.

Postgraduate CODA approved residencies that include moderate sedation training.

**Periodontics** (30 month Post Graduate Education)

The periodontics training standards state the program must provide training in the methods of pain control and sedation. They must achieve knowledge in all areas of minimal, moderate, and deep sedation and be trained to a level of competency in adult minimal enteral and moderate parenteral sedation.

**Pediatric Dentistry**[^3] (24 month Post Graduate Education)

The pediatric dentistry training standards require education in anatomy, pharmacology, and principles and objectives of sedation and general anesthesia as behavioral guidance techniques including indications and contraindications for their use in accordance with the ADA Standards for Teaching of Pain Control and Sedation to Dentists and Dental Students. Clinical experience must include infants, children, adolescents, and patients with special needs for inhalation analgesia (nitrous oxide/oxygen) and sedation. Therefore they must perform 20 inhalation analgesia cases as primary operator, 50 patient encounters in which sedative agents (other than nitrous oxide/oxygen) by any route are used and must act as the operator in a minimum of 25 sedation cases.

**General Practice Residency** (12-24 months Post Graduate Training)

The general practice residency standards require the resident to receive education and training beyond pre-doctoral training including pain and anxiety control utilizing behavioral and/or pharmacological techniques. For clinical experience, residents must be assigned to an anesthesia rotation for a minimum 70 hours to gain experience in preoperative evaluation, assessment of the effects of behavioral and pharmacologic techniques, venipuncture technique, patient monitoring, airway management, understanding of the use of pharmacologic agents, recognition and treatment of anesthetic emergencies, and assessment of patient recovery from anesthesia. Additional clinical experience includes interpreting clinical and other diagnostic data from other health care providers, using the services of clinical medicine and pathology, and performing a history and physical evaluation and collecting other data necessary to establish a medical assessment.

American Society of Anesthesiologists Training recommended for non-anesthesiologists seeking privileges to administer deep sedation

EDUCATION AND TRAINING

The non-anesthesiologist sedation practitioner will have satisfactorily completed a formal training program in (1) the safe administration of sedative and analgesic drugs used to establish a level of deep sedation, and (2) rescue of patients who exhibit adverse physiologic consequences of a deeper-than-intended level of sedation. This training may be a formally recognized part of a recently completed Accreditation Council for Graduate Medical Education (ACGME) residency or fellowship training (e.g., within two years), or may be a separate deep sedation educational program that is accredited by Accreditation Council for Continuing Medical Education (ACCME) or equivalent providers recognized for dental, oral surgical and podiatric continuing education, and that includes the didactic and performance concepts below. A knowledge-based test is necessary to objectively demonstrate the knowledge of concepts required to obtain privileges. The following subject areas will be included:

3.1 Contents of the following ASA documents (or their more current version if subsequently modified) that will be understood by practitioners who administer sedative and analgesic drugs to establish a level of deep sedation.

3.1.2 Continuum of Depth of Sedation; Definition of General Anesthesia and Levels of Sedation/Analgesia (ASA HOD 2004, amended 2009)

3.1.3 Standards for Basic Anesthetic Monitoring (Approved by the ASA House of Delegates on October 21, 1986, and last amended on October 25, 2005)

3.2 Appropriate methods for obtaining informed consent through pre-procedure counseling of patients regarding risks, benefits and alternatives to the administration of sedative and analgesic drugs to establish a level of deep sedation.

---

3.3 Skills for obtaining the patient’s medical history and performing a physical examination to assess risks and co-morbidities, including assessment of the airway for anatomic and mobility characteristics suggestive of potentially difficult airway management. The non-anesthesiologist sedation practitioner will be able to recognize those patients whose medical condition requires that sedation needs to be provided by an anesthesia professional, such as morbidly obese patients, elderly patients, pregnant patients, patients with severe systemic disease, patients with obstructive sleep apnea, or patients with delayed gastric emptying.

3.4 Assessment of the patient’s risk for aspiration of gastric contents as described in the ASA Practice Guidelines for Preoperative Fasting. In urgent, emergent or other situations where gastric emptying is impaired, the potential for pulmonary aspiration of gastric contents must be considered in determining

3.4.1 The target level of sedation
3.4.2 Whether the procedure should be delayed
3.4.3 Whether the sedation care should be transferred to an anesthesia professional for the delivery of general anesthesia with endotracheal intubation.

3.5 The pharmacology of

3.5.1 All sedative and analgesic drugs the practitioner requests privileges to administer to establish a level of deep sedation
3.5.2 Pharmacological antagonists to the sedative and analgesic drugs
3.5.3 Vasoactive drugs and antiarrhythmics.

3.6 The benefits and risks of supplemental oxygen.

3.7 Recognition of adequacy of ventilatory function: This will include experience with patients whose ventilatory drive is depressed by sedative and analgesic drugs as well as patients whose airways become obstructed during sedation. This will also include the ability to perform capnography and understand the results of such monitoring. Non-anesthesiologist practitioners will demonstrate competency in managing patients during deep sedation, and understanding of the clinical manifestations of general anesthesia so that they can ascertain when a patient has entered a state of general anesthesia and rescue the patient appropriately.

3.8 Proficiency in advanced airway management for rescue: This training will include appropriately supervised experience to demonstrate competency in managing the airways of patients during deep sedation, and airway management using airway models as well as using high-fidelity patient simulators. The non-anesthesiologist practitioner must demonstrate the ability to reliably perform the following:

3.8.1 Bag-valve-mask ventilation
3.8.2 Insertion and use of oro- and nasopharyngeal airways
3.8.3 Insertion and ventilation through a laryngeal mask airway

3.8.4 Direct laryngoscopy and endotracheal intubation

This will include clinical experience on no less than 35 patients or equivalent simulator experience (See ACGME reference). The facility with oversight by the Director of Anesthesia Services will determine the number of cases needed to demonstrate these competencies, and may increase beyond the minimum recommended.

3.9 Monitoring of physiologic variables, including the following:

3.9.1 Blood pressure.

3.9.2 Respiratory rate.

3.9.3 Oxygen saturation by pulse oximetry with audible variable pitch pulse tone.

3.9.4 Capnographic monitoring. The non-anesthesiologist practitioner shall be familiar with the use and interpretation of capnographic waveforms to determine the adequacy of ventilation during deep sedation.

3.9.5 Electrocardiographic monitoring. Education in electrocardiographic (EKG) monitoring will include instruction in the most common dysrhythmias seen during sedation and anesthesia, their causes and their potential clinical implications (e.g., hypercapnia), as well as electrocardiographic signs of cardiac ischemia.
3.9.6 Depth of sedation. The depth of sedation will be based on the ASA definitions of “deep sedation” and “general anesthesia.” (See below).

3.10 The importance of continuous use of appropriately set audible alarms on physiologic monitoring equipment.

3.11 Documenting the drugs administered, the patient’s physiologic condition and the depth of sedation at five-minute intervals throughout the period of sedation and analgesia, using a graphical, tabular or automated record which documents all the monitored parameters including capnographic monitoring. The importance of monitoring the patient through the recovery period and the inclusion of specific discharge criteria for the patient receiving sedation.

3.12 Regardless of the availability of a “code team” or the equivalent, the non-anesthesiologist practitioner will have advanced life support skills and current certificate such as those required for Advanced Cardiac Life Support (ACLS). When granting privileges to administer deep sedation to pediatric patients, the non-anesthesiologist practitioner will have advanced life support skills and current certificate such as those required for Pediatric Advanced Life Support (PALS). Initial ACLS and PALS training and subsequent retraining shall be obtained from the American Heart Association or another vendor that includes “hands-on” training and skills demonstration of airway management and automated external defibrillator (AED) use.

3.13 Required participation in a quality assurance system to track adverse outcomes and unusual events including respiratory arrests, use of reversal agents, prolonged sedation in recovery process, larger than expected medication doses, and occurrence of general anesthesia, with oversight by the Director of Anesthesia services or their designee.

3.14 Knowledge of the current CMS Conditions of Participation regulations and their interpretive guidelines pertaining to deep sedation, including requirements for the pre-anesthesia evaluation, anesthesia intra-operative record, and post-anesthesia evaluation.

Separate privileging is required for the care of pediatric patients. When the non-anesthesiologist practitioner is granted privileges to administer sedative and analgesic drugs to pediatric patients to establish a level of deep sedation, the education and training requirements enumerated in #1-15 above will be specifically defined to qualify the practitioner to administer sedative and analgesic drugs to pediatric patients.

4. LICENSURE

4.1 The non-anesthesiologist sedation practitioner will have a current active, unrestricted medical, osteopathic, or dental license in the state, district or territory of practice. (Exception: practitioners employed by the federal government may have a current active license in any U.S. state, district or territory.)

4.2 The non-anesthesiologist sedation practitioner will have a current unrestricted Drug Enforcement Administration (DEA) registration (schedules II-V).
4.3 The privileging process will require disclosure of any disciplinary action (final judgments) against any medical, osteopathic or dental license by any state, district or territory of practice and of any sanctions by any federal agency, including Medicare/Medicaid, in the last five years.

4.4 Before granting or renewing privileges to administer or supervise the administration of sedative and analgesic drugs to establish a level of deep sedation, the health care organization shall search for any disciplinary action recorded in the National Practitioner Data Bank (NPDB) and take appropriate action regarding any Adverse Action Reports.

5. PERFORMANCE EVALUATION

5.1 Before granting initial privileges to administer or supervise administration of sedative and analgesic drugs to establish a level of deep sedation, a process will be developed to evaluate the practitioner’s performance and competency. For recent graduates (e.g., within two years), this may be accomplished through letters of recommendation from directors of residency or fellowship training programs that include deep sedation as part of the curriculum. For those who have been in practice since completion of their training, performance evaluation may be accomplished through specific documentation of performance evaluation data transmitted from department heads or supervisors at the institution where the individual previously held privileges to administer deep sedation. Alternatively, the non-anesthesiologist sedation practitioner could be proctored or supervised by a physician or dentist who is currently privileged to administer sedative and analgesic agents to provide deep sedation. The Director of Anesthesia Services with oversight by the facility governing body will determine the number of cases that need to be performed in order to determine independent competency in deep sedation.

5.2 Before granting ongoing privileges to administer or supervise administration of sedative and analgesic drugs to establish a level of deep sedation, a process will be developed to re-evaluate the practitioner’s performance at regular intervals. Re-evaluation of competency in airway management will be part of this performance evaluation. For example, the practitioner’s performance could be reviewed by an anesthesiologist or a non-anesthesiologist sedation practitioner who is currently privileged to administer deep sedation. The facility will establish an appropriate number of procedures that will be reviewed.

6. PERFORMANCE IMPROVEMENT

Privileging in the administration of sedative and analgesic drugs to establish a level of deep sedation will require active participation in an ongoing process that evaluates the practitioner’s clinical performance and patient care outcomes through a formal facility program of continuous performance improvement. The facility’s deep sedation performance improvement program will be developed with advice from and with outcome review by the Director of Anesthesia Services.

6.1 The organization in which the practitioner practices will conduct peer review of its clinicians.
6.2 The performance improvement program will assess up-to-date knowledge as well as ongoing competence in the skills outlined in the educational and training requirements described above.

6.3 Continuing medical education in the delivery of anesthesia services is required for renewal of privileges.

6.4 The performance improvement program will monitor and evaluate patient outcomes and adverse or unusual events.

6.5 Any of the following events will be referred to the facility quality assurance committee for evaluation and performance evaluation:

   6.5.1 Unplanned admission
   6.5.2 Cardiac arrest
   6.5.3 Use of reversal agents
   6.5.4 Use of assistance with ventilation requiring bag-valve-mask ventilation or laryngeal or endotracheal airways.
   6.5.5 Prolonged periods of oxygen desaturation (<85% for 3 minutes)
   6.5.6 Failure of the patient to return to 20% of pre-procedure vital signs

7. DEFINITIONS

Anesthesia Professional: An anesthesiologist, anesthesiologist assistant (AA), or certified registered nurse anesthetist (CRNA).

Non-anesthesiologist Sedation Practitioner: A licensed physician (allopathic or osteopathic); or dentist, oral surgeon, or podiatrist who is qualified to administer anesthesia under State law; who has not completed postgraduate training in anesthesiology but is specifically trained to administer personally or to supervise the administration of deep sedation.

State mandated inspection for offices providing general anesthesia

California requires an office inspection every 5 years for general anesthesia permit holders
Moderate Sedation State Mandated Office Inspection

Conscious (moderate) IV sedation providers in California must undergo an office inspection every 6 years

Incremental monitoring requirements

**General Anesthesia**

California requires incremental recording of vital signs at 5 minute intervals intraoperatively and 15 minute intervals postoperatively.
California law requires capnography for patients undergoing an intubated general anesthetic.

Detailed equipment list

A detailed list of equipment usually includes the following items:

1. Laryngoscope complete with adequate selection of blades and spare batteries and bulb.
2. Endotracheal tubes and appropriate connectors.
3. Emergency airway equipment (oral airways, laryngeal mask airways or combitubes, cricothyrotomy device).
4. Endotracheal tube forcep.
5. Sphygmomanometer and stethoscope.
6. Electrocardioscope and defibrillator.
7. Adequate equipment for the establishment of an intravenous infusion.
8. Precordial/pretracheal stethoscope.
10. Capnograph and temperature device. A capnograph and temperature measuring device are required for the intubated patient receiving general anesthesia.

Dental Assistants

Personnel

California does not presently specify how many staff are required for either general anesthesia or moderate sedation but patients must be monitored at all times.

State Assisting Requirements

Anesthesia Monitor

An anesthesia monitor is not presently required in California. The dentist is responsible for the competency of staff.
Number of staff required

General Anesthesia - 3 or More Persons

- Required: 33
- Not Required: 17

Moderate Sedation - 2 or More Persons

- Required: 30
- Not Required: 20
Continuing education

California requires 25 units of continuing education per 2 year renewal cycle, the most of any state

Pediatric sedation requirements
Individual states have taken different approaches to the regulation of pediatric sedation. Twenty five states, including California have special requirements for young patients. California requirements apply to patients age 13 or under. An increasing number of states have adopted pediatric sedation educational requirements, equipment requirements, and permits over the past 10 years. All states regulate moderate sedation and deep sedation/GA, regardless of route of administration.

Ten states (California, Colorado, Florida, Georgia, Kentucky, Louisiana, Missouri, Mississippi, North Carolina and Oklahoma) require permits for sedating pediatric patients.

Sixteen states require specific training, some in addition to adult sedation training, to administer moderate/conscious sedation to pediatric patients.

Approximately twenty nine states have specific requirements for pediatric sedation administered by the oral route.

States differ in their definition of the pediatric patient. Several states define the pediatric patient as being under the age of 12 consistent with ADA Guidelines; however other states use 13, 14, 16 and 18 years of age. Most states, including California, specify that the practitioner must have appropriately sized equipment for pediatric patients. In some states ACLS certification is deemed sufficient for treating pediatric patients; Twenty states currently require PALS certification. California does not presently require certification in PALS.
Although ten states have adopted the AAP-AAPD Guidelines, these usually apply to minimal and moderate sedation. Most states do not have specific requirements for the administration of deep sedation/general anesthesia to children.

**Pediatric Provisions in State Law**

- OCS = oral conscious sedation; 25/10 etc. = classroom hours/supervised cases; PALS = pediatric advanced life support course; all numbers are approximate.

**Pediatric Sedation Permit**

- Number of States
  - 10 Required
  - 40 Not Required

<td>“The drug(s) and/or techniques used should carry a margin of safety wide enough never to render unintended loss of consciousness. Further, patients whose only response is reflex withdrawal from repeated painful stimuli would not be considered to be in a state of minimal sedation. The ADA Guidelines add a definition of “combination inhalation-ental conscious sedation” for when the intent is anxiolysis only. When the intent is conscious (moderate) sedation that definition applies.</td>
<td></td>
</tr>
</tbody>
</table>

**Minimal Sedation** (old terminology *anxiolysis*): a drug-induced state during which patients respond normally to verbal commands. Although cognitive function and coordination may be impaired, ventilatory and cardiovascular functions are unaffected.
<table>
<thead>
<tr>
<th>Oral Conscious Sedation</th>
</tr>
</thead>
</table>
| **oral conscious sedation (pediatric and adult)**
see BPC 1674.10 |
| **Oral conscious sedation means a minimally depressed level of consciousness produced by oral medication that retains the patient’s ability to maintain independently and continuously an airway, and respond appropriately to physical stimulation or verbal command.”** |
| **“The drugs and techniques used in oral conscious sedation shall have a margin of safety wide enough to render unintended loss of consciousness unlikely. Further, patients whose only response is reflex withdrawal from painful stimuli would not be considered to be in a state of oral conscious sedation.”** |
| **Author’s note: The ADA Guidelines include definitions of both conscious sedation and moderate sedation, and gives clinical guidelines for each. However the preferred term appears to be moderate sedation because it is accompanied by clinical guidelines.** |

<table>
<thead>
<tr>
<th>Moderate Sedation</th>
</tr>
</thead>
</table>
| **CA term is “conscious sedation”**
BPC 1647.1 |
| **Conscious sedation means a minimally depressed level of consciousness produced by a pharmacologic or nonpharmacologic method, or a combination thereof, that retains the patient’s ability to maintain independently and continuously an airway, and respond appropriately to physical stimulation or verbal command.”** |
| **Conscious sedation does not include that administration of oral medication or the administration of a mixture of nitrous oxide and oxygen, whether alone or with each other.** |
| **The term “conscious sedation” has been replaced by the ADA with the term “moderate sedation”, defined as “a drug-induced depression of consciousness during which patients respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation.”** |
| **“No interventions are required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained.”** |
| **“Drugs or techniques should maintain a margin of safety wide enough to render unintended loss** |
| **Moderate sedation (old terminology conscious sedation or sedation/analgesia): a drug-induced depression of consciousness during which patients respond purposefully to verbal commands (eg, open your eyes either alone or accompanied by light tactile stimulation—a light tap on the shoulder or face, not a sternal rub). For older patients, this level of sedation implies an interactive state; for younger patients, age-appropriate behaviors (eg, crying) occur and are expected. Reflex withdrawal, although a normal response to a painful stimulus, is not considered as the only age-appropriate** |
The drugs and techniques used in conscious sedation shall have a margin of safety wide enough to render unintended loss of consciousness unlikely.

For the very young or handicapped, incapable of the usual verbal response, a minimally depressed level of consciousness should be maintained.

Further, patients whose only response is reflex withdrawal from painful stimuli shall not be considered to be in a state of conscious sedation.

The ADA Guidelines also include the following cautionary statement:

“Because sedation and general anesthesia are a continuum, it is not always possible to predict how an individual patient will respond. Hence, practitioners intending to produce a given level of sedation should be able to diagnose and manage the physiologic consequences (rescue) for patients whose level of sedation becomes deeper than initially intended.”

For all levels of sedation, the practitioner must have the training, skills, drugs and equipment to identify and manage such an occurrence until either assistance arrives (emergency medical service) or the patient returns to the intended level of sedation without airway or cardiovascular complications.

Deep Sedation in California is described in BPC 1647 (c) as part of a continuum for which the educational standards for general anesthesia should be applied. Deep sedation is not otherwise defined in the California law.

The ADA defines deep sedation as “a drug-induced depression of consciousness during which patients cannot be easily aroused but respond purposefully following repeated or painful stimulation. The ability to independently maintain ventilatory function may be impaired. Patients may require purposeful response (eg, it must be accompanied by another response, such as pushing away the painful stimulus so as to confirm a higher cognitive function). With moderate sedation, no intervention is required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained. However, in the case of procedures that may themselves cause airway obstruction (eg, dental or endoscopic), the practitioner must recognize an obstruction and assist the patient in opening the airway. If the patient is not making spontaneous efforts to open his/her airway so as to relieve the obstruction, then the patient should be considered to be deeply sedated.

Deep Sedation

- Deep sedation (deep sedation/analgesia): a drug-induced depression of consciousness during which patients cannot be easily aroused but respond purposefully following repeated or painful stimulation. The ability to independently maintain ventilatory function may be impaired. Patients may require
**assistance in maintaining a patent airway, and spontaneous ventilation may be inadequate. Cardiovascular function is usually maintained.**

The ADA provides identical clinical guidelines for deep sedation or general anesthesia.

**purposefully pushing away the noxious stimuli). The ability to independently maintain ventilator function may be impaired. Patients may require assistance in maintaining a patent airway, and spontaneous ventilation may be inadequate. Cardiovascular function is usually maintained. A state of deep sedation may be accompanied by partial or complete loss of protective airway reflexes.**

### General Anesthesia

**Defined as a “controlled state of depressed consciousness or unconsciousness, accompanied by a partial or complete loss of protective reflexes, produced by pharmacologic or non-pharmacologic method, or a combination thereof.” (BPC 1646)**

A drug-induced loss of consciousness during which patients are not arousable, even by painful stimulation. The ability to independently maintain ventilatory function is often impaired. Patients often require assistance in maintaining a patent airway, and positive pressure ventilation may be required because of depressed spontaneous ventilation or drug-induced depression of neuromuscular function. Cardiovascular function may be impaired.

**General anesthesia: a drug-induced loss of consciousness during which patients are not arousable, even by painful stimulation. The ability to independently maintain ventilatory function is often impaired. Patients often require assistance in maintaining a patent airway, and positive-pressure ventilation may be required because of depressed spontaneous ventilation or drug-induced depression of neuromuscular function. Cardiovascular function may be impaired.**

**CA requires a pediatric oral (moderate) conscious sedation permit for children 13 or under**

**Pediatrics**

For children 12 years of age and under, the American Dental Association supports the use of the American Academy of Pediatrics/American Academy of Pediatric Dentistry Guidelines for Monitoring and Management of Pediatric Patients During and After Sedation for Diagnostic and Therapeutic Procedures.

Educational Requirements for Minimal, Moderate, Deep Sedation and General Anesthesia

<table>
<thead>
<tr>
<th>California requirements for moderate sedation and general anesthesia</th>
<th>ADA Guidelines for use of sedation and general anesthesia by dentists</th>
<th>AAP-AAPD Guidelines for monitoring and management of pediatric patients</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Educational Requirements</strong></td>
<td><strong>Minimal Sedation</strong></td>
<td><strong>No specific educational requirements are provided in these guidelines, however personnel qualifications are stated.</strong></td>
</tr>
<tr>
<td><strong>Minimal Sedation</strong></td>
<td><strong>The predoctoral curriculum should provide instruction, exposure and/or experience in anxiety and pain control, including minimal and moderate sedation. The predoctoral program must also provide the knowledge and skill to enable students to recognize and manage any emergencies that might arise as a consequence of treatment. Predoctoral dental students must complete a course in Basic Life Support for including a “hands on” component. Such courses should be AHA or ARC approved.</strong></td>
<td>“The practitioner responsible for the treatment of the patient and/or the administration of drugs for sedation must be competent to use such techniques, to provide the level of monitoring provided in this guideline, and to manage complications of these techniques (ie, to be able to rescue the patient). Because the level of intended sedation may be exceeded, the practitioner must be sufficiently skilled to provide rescue should the child progress to a level of deep sedation. The practitioner must be trained in, and capable of providing, at the minimum, bag-valve-mask ventilation so as to be able to oxygenate a child who develops airway obstruction or apnea. Training in, and maintenance of, advanced pediatric airway skills is required; regular skills reinforcement is strongly encouraged.”</td>
</tr>
</tbody>
</table>

*Minimal Sedation is not specifically defined in California sedation laws.*

Training in minimal sedation, including the administration of a mixture of nitrous oxide and oxygen, either alone or in combination with minimal oral sedation, may be taught to the level of basic competency at the predoctoral (dental school) level. (see ADA Educational Guidelines)

Minimal sedation requires
a. training to the level of competency in minimal sedation consistent with that prescribed in the ADA Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students, or a comprehensive training program in moderate sedation that satisfies the requirements described in the Moderate Sedation section of the ADA Guidelines for Teaching Pain Control and Sedation to Dentists and Dental Students at the time training was commenced, or
b. an equivalent advanced education program accredited by the ADA Commission on Dental Accreditation.
### Enteral and/or Combination Inhalation-Enteral Minimal Sedation Course Duration:

Current certification in Basic Life Support for Healthcare Providers

1. Completion of a nitrous oxide competency course.
2. While length of a course is only one of many factors, the course should include a minimum of 16 hours, plus clinically-oriented experiences during which competency in enteral and/or combined inhalation-enteral minimal sedation techniques is demonstrated.

Clinically-oriented experiences may include group observations on patients undergoing enteral and/or combination inhalation-enteral minimal sedation.

Clinical experience in managing a compromised airway is critical to the prevention of life-threatening emergencies.

The faculty should schedule participants to return for additional clinical experience if competency has not been achieved in the time allotted.

The educational course may be completed in a predoctoral dental education curriculum or a postdoctoral continuing education competency course.

Not intended for the management of sedation in children, which requires additional course content and clinical learning experience.

<table>
<thead>
<tr>
<th>Moderate Sedation</th>
</tr>
</thead>
<tbody>
<tr>
<td>California Moderate enteral sedation courses for adults and minors</td>
</tr>
</tbody>
</table>
Completion of approved post doctoral or residency training; or, a board approved course that includes 25 hours of instruction including a clinical component utilizing at least one age-appropriate patient; training for either adult patients or minor patients (13 or younger); training requirements reference ADA, AAPD definitions of levels of sedation. (See BPC 1647.12; CCR 1044-1044.5.)

| Completion of approved post doctoral or residency training; or, a board approved course that includes 25 hours of instruction including a clinical component utilizing at least one age-appropriate patient; training for either adult patients or minor patients (13 or younger); training requirements reference ADA, AAPD definitions of levels of sedation. (See BPC 1647.12; CCR 1044-1044.5.) | A minimum of 24 hours of instruction, plus management of at least 10 adult case experiences by the enteral and/or enteral-nitrous oxide/oxygen route are required to achieve competency. These ten cases must include at least three live clinical dental experiences managed by participants in groups no larger than five. The remaining cases may include simulations and/or video presentations, but must include one experience in returning (rescuing) a patient from deep to moderate sedation. Participants combining enteral moderate sedation with nitrous oxide-oxygen must have first completed a nitrous oxide competency course. Participants should be provided supervised opportunities for clinical experience to demonstrate competence in airway management. Clinical experience will be provided in managing healthy adult patients; this course in moderate enteral sedation is not designed for the management of children (aged 12 and under). Additional supervised clinical experience is necessary to prepare participants to manage medically compromised adults and special needs patients. This course in moderate enteral sedation does not result in competency in moderate parenteral sedation. The faculty should schedule participants to return for additional didactic or clinical exposure if competency has not been achieved in the time allotted. | No specific educational requirements are provided in these guidelines, however personnel qualifications are stated. |

| Conscious Sedation (moderate IV sedation) | Moderate Parenteral Sedation | Moderate Sedation |
At least 60 hours of instruction; Satisfactory completion of at least 20 cases of administration of conscious sedation for a variety of dental procedures.

Course must comply with the requirements of the *Guidelines for Teaching the Comprehensive Control of Anxiety and Pain in Dentistry* of the American Dental Association (see BPC 1647.3).

A minimum of 60 hours of instruction plus management of at least 20 patients using the intravenous route; clinical experience in managing a compromised airway is critical to prevention of emergencies;

Management of children and medically compromised adults requires additional experience; course completion does not result in clinical competency.

The practitioner must be competent to use such techniques, to provide the level of monitoring provided in this guideline, and to manage complications of these techniques (i.e., to be able to rescue the patient).

(Ed. Specific educational requirements are not described.)

<table>

16
as deemed appropriate.
• Preoperative dietary restrictions must be considered based on the sedative technique prescribed.
• Pre-operative verbal and written instructions must be given to the patient, parent, escort, guardian or care giver.

Dietary precautions

Before sedation, the practitioner should evaluate preceding food and fluid intake. It is likely that the risk of aspiration during procedural sedation differs from that during general anesthesia involving tracheal intubation or other airway manipulation. However, because the absolute risk of aspiration during procedural sedation is not yet known, guidelines for fasting periods before elective sedation generally should follow those used for elective general anesthesia. For emergency procedures in children who have not fasted, the risks of sedation and the possibility of aspiration must be balanced against the benefits of performing the procedure promptly. Further research is needed to better elucidate the relationships between various fasting intervals and sedation complications.

| Same as moderate sedation         | A minimum of three (3) individuals must be present.  
|                                  | - A dentist qualified in accordance with Part III. C. of these Guidelines to administer the deep sedation or general anesthesia.  
|                                  | - Two additional individuals who have current certification of successfully completing a Basic Life Support (BLS) Course for the Healthcare Provider.  
|                                  | - When the same individual administering the deep sedation or general anesthesia is performing the dental procedure, one of the additional appropriately trained team members must be designated for patient monitoring. |
|                                  | There must be one person available whose only responsibility is to constantly observe the patient’s vital signs, airway patency, and adequacy of ventilation and to either administer drugs or direct their administration. At least one individual must be present who is trained in, and capable of, providing advanced pediatric life support, and who is skilled in airway management and cardiopulmonary resuscitation; training in pediatric advanced life support is required. |

Staff must be certified in basic cardiac life support (CPR) and recertified

A qualified dentist administering moderate sedation must remain in the operatory room to monitor the patient continuously until the patient meets the criteria for recovery. When active treatment concludes and the patient recovers to a minimally sedated level a qualified auxiliary may be directed by the dentist to remain with the patient and continue to monitor them as explained in the guidelines until they are discharged from the facility. The dentist must not leave the facility until the patient meets the criteria for discharge and is discharged from the facility.

One person, in addition to the practitioner, whose responsibility is to monitor appropriate physiologic parameters and to assist in any supportive or resuscitation measures, if required. This individual may also be responsible for assisting with interruptible patient-related tasks of short duration. This individual must be trained in and capable of providing pediatric basic life support. The support person shall have specific assignments in the event of an emergency and current knowledge of the emergency cart inventory. The practitioner and all ancillary personnel should participate in periodic reviews and practice drills of the facility’s emergency protocol to ensure proper function of the equipment and coordination of staff roles in such emergencies.
A qualified dentist administering deep sedation or general anesthesia must remain in the operatory room to monitor the patient continuously until the patient meets the criteria for recovery. The dentist must not leave the facility until the patient meets the criteria for discharge and is discharged from the facility.

Sedation and Anesthesia Assisting Requirements in the 50 States

<tbody>
<tr>
<td><strong>Facilities</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>See CCR 1044.5 Facility and Equipment Standards – these are the same for all levels of sedation and anesthesia</td>
<td>Facility requirements not specifically stated, except as listed under equipment requirements below.</td>
<td>Facilities</td>
</tr>
<tr>
<td>(a) Office Facilities and Equipment. The following office facilities and equipment shall be available and shall be maintained in good operating condition:</td>
<td>A positive-pressure oxygen delivery system suitable for the patient being treated must be immediately available. • When inhalation equipment is used, it must have a fail-safe system that is appropriately checked and calibrated. The equipment must also have either (1) a functioning device that prohibits the delivery of less than 30% oxygen or (2) an appropriately calibrated and functioning in-line oxygen analyzer with audible alarm. • An appropriate scavenging system must be available if gases other than oxygen or air are used.</td>
<td>The practitioner who uses sedation must have immediately available facilities, personnel, and equipment to manage emergency and rescue situations. The most common serious complications of sedation involve compromise of the airway or depressed respirations resulting in airway obstruction, hypoventilation, hypoxemia, and apnea. Hypotension and cardiopulmonary arrest may occur, usually from inadequate recognition and treatment of respiratory compromise. Other rare complications may also include seizures and allergic reactions. Facilities providing pediatric sedation should monitor for, and be prepared to treat, such complications.</td>
</tr>
<tr>
<td>(1) An operating theater large enough to accommodate the patient on a table or in an operating chair and permit an operating team consisting of at least three individuals to freely move about the patient.</td>
<td></td>
<td></td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(2) An operating table or chair which permits the patient to be positioned so the operating team can maintain the airway, quickly alter patient position in an emergency, and provide a firm platform for the management of cardiopulmonary resuscitation.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>(3) A lighting system which is adequate to permit evaluation of the patient’s skin and mucosal color and a backup lighting system which is battery powered and of sufficient intensity to permit</td>
<td></td>
<td></td>

<td></td>
<td></td>
</tr>
</tbody>
</table>
completion of any operation underway at the time of general power failure.

(4) Suction equipment which permits aspiration of the oral and pharyngeal cavities. A backup suction device which can operate at the time of general power failure must also be available.

(5) An oxygen delivery system with adequate full face masks and appropriate connectors that is capable of allowing the administering of greater than 90% oxygen at a 10 liter/minute flow at least sixty minutes (650 liter “E” cylinder) to the patient under positive pressure, together with an adequate backup system which can operate at the time of general power failure.

(6) A recovery area that has available oxygen, adequate lighting, suction, and electrical outlets. The recovery area can be the operating theater.

CCR 1044: An emergency cart or kit shall be available and readily accessible and shall include the necessary and appropriate drugs and age- and size-appropriate equipment to resuscitate a nonbreathing and unconscious patient and provide continuous support while the patient is transported to a medical facility. There must be documentation that all emergency equipment and drugs are checked and maintained on a prudent and regularly scheduled basis.

Ancillary equipment, which must include the following, and be maintained in good operating condition:
1. Age-appropriate oral airways capable of accommodating patients of all sizes.
2. An age-appropriate sphygmomanometer with cuffs of appropriate size for patients of all sizes.
3. A precordial/pretracheal stethoscope.
4. A pulse oximeter

Monitoring: A dentist, or at the dentist’s direction, an appropriately trained individual, must remain in the operatory during active dental treatment to monitor the patient continuously until the patient meets the criteria for discharge to the recovery area. The appropriately trained individual must be familiar with monitoring techniques and equipment. Monitoring must include:

Oxygenation:
- Color of mucosa, skin or blood must be evaluated continually.
- Oxygen saturation by pulse oximetry may be clinically useful and should be considered.

Ventilation:
- The dentist and/or appropriately trained individual must observe chest excursions continually.
- The dentist and/or appropriately trained individual must verify respirations continually.

Circulation:
- Blood pressure and heart rate should be evaluated pre-operatively, post-operatively and intraoperatively as necessary (unless the patient is unable to tolerate such monitoring).

On-site monitoring and rescue equipment
An emergency cart or kit must be immediately accessible. This cart or kit must contain equipment to provide the necessary age- and size-appropriate drugs and equipment to resuscitate a non breathing and unconscious child. The contents of the kit must allow for the provision of continuous life support while the patient is being transported to a medical facility or to an-other area within a medical facility.

All equipment and drugs must be checked and maintained on a scheduled basis (see Appendices C and D for suggested drugs and emergency life support equipment to consider before the need for rescue occurs). Monitoring devices, such as electrocardiography (ECG) machines, pulse oximeters (with size-appropriate oximeter probes), end-tidal carbon dioxide monitors, and defibrillators (with size-appropriate defibrillator paddles), must have a safety and function check on a regular basis as required by local or state regulation.
Conscious Sedation | Moderate sedation
---|---
1682 (c) Acts constituting unprofessional conduct:
Any dentist with patients who are undergoing conscious sedation to fail to have these patients continuously monitored during the dental procedure with a pulse oximeter or similar or superior equipment required by the board.

BPC 1043.3

(7) Ancillary equipment, which must include the following maintained in good operating condition:
(A) Laryngoscope complete with adequate selection of blades and spare batteries and bulb. (This equipment is not required for conscious sedation.)
(B) Endotracheal tubes and appropriate connectors. (This equipment is not required for conscious sedation.)
(C) Emergency airway equipment (oral airways, laryngeal mask airways or combitubes, cricothyrotomy device).
(D) Tonsillar or pharyngeal type suction tip adaptable to all office outlets.
(E) Endotracheal tube forceps. (This equipment is not required for conscious sedation.)
(F) Sphygomonanometer and stethoscope.
(G) Electrocardioscope and defibrillator. (This equipment is not required for conscious sedation.)
(H) Adequate equipment for the establishment of an intravenous infusion.
(I) Precordial/pretracheal stethoscope.
(J) Pulse oximeter.
(K) Capnograph and temperature measuring device. A capnograph and temperature measuring device are required for the intubated patient receiving general anesthesia. (This equipment is not required for conscious sedation.)

Monitoring: A qualified dentist administering moderate sedation must remain in the operatory room to monitor the patient continuously until the patient meets the criteria for recovery. When active treatment concludes and the patient recovers to a minimally sedated level a qualified auxiliary may be directed by the dentist to remain with the patient and continue to monitor them as explained in the guidelines until they are discharged from the facility. The dentist must not leave the facility until the patient meets the criteria for discharge and is discharged from the facility.

Consciousness:
• Level of consciousness (e.g., responsiveness to verbal command) must be continually assessed.

Oxygenation:
• Color of mucosa, skin or blood must be evaluated continually.
• Oxygen saturation must be evaluated by pulse oximetry continuously.

Ventilation:
• The dentist must observe chest excursions continually.
• The dentist must monitor ventilation. This can be accomplished by auscultation of breath sounds, monitoring end-tidal CO2 or by verbal communication with the patient.

Circulation:
• The dentist must continually evaluate blood pressure and heart rate (unless the patient is unable to tolerate and this is noted in the time-oriented anesthesia record).

S = Size-appropriate suction catheters and a functioning suction apparatus (eg, Yankauer-type suction)
O = An adequate oxygen supply and functioning flow meters/other devices to allow its delivery
A = Airway: size-appropriate airway equipment [nasopharyngeal and oropharyngeal airways, laryngoscope blades (checked and functioning), endotracheal tubes, stylets, face mask, bag-valve-mask or equivalent device (functioning)]
P = Pharmacy: all the basic drugs needed to support life during an emergency, including antagonists as indicated
M = Monitors: functioning pulse oximeter with size-appropriate oximeter probes141,142 and other monitors as appropriate for the procedure (eg, noninvasive blood pressure, end-tidal carbon dioxide, ECG, stethoscope)
E = Special equipment or drugs for a particular case (eg, defibrillator)

Appendix D includes a list of suggested drugs and equipment that MAY be needed to rescue a sedated patient.
Continuous ECG monitoring of patients with significant cardiovascular disease should be considered.

### Table 7. Record Requirements - Clinical Guidelines for Minimal sedation, Moderate sedation, Deep Sedation, and General Anesthesia

<table>
<thead>
<tr>
<th>California Record Requirements</th>
<th>ADA Guidelines</th>
<th>AAP-AAPD Guidelines</th>
</tr>
</thead>
<tbody>
<tr>
<td>Oral (Moderate) Conscious Sedation</td>
<td>Minimal Sedation</td>
<td>All levels of Sedation</td>
</tr>
</tbody>
</table>

Oral conscious sedation records shall include baseline vital signs. If obtaining baseline vital signs is prevented by the patient’s physical resistance or emotional condition, the reason or reasons must be documented. The records shall also include intermittent quantitative monitoring and recording of oxygen saturation, heart and respiratory rates, blood pressure as appropriate for specific techniques, the name, dose and time of administration of all drugs administered including local and inhalation anesthetics, the length of the procedure, any complications of oral sedation, and a statement of the patient’s condition at the time of discharge. (CCR 1044.5)

Documentation: An appropriate sedative record must be maintained, including the names of all drugs administered, including local anesthetics, dosages, and monitored physiological parameters.

**Documentation prior to treatment – see preoperative evaluation**

**Documentation during treatment**

The patient’s chart shall contain a time-based record that includes the name, route, site, time, dosage, and patient effect of administered drugs. Before sedation, a “time out” should be performed to confirm the patient’s name, procedure to be performed, and site of the procedure.

During administration, the inspired concentrations of oxygen and inhalation sedation agents and the duration of their administration shall be documented. Before drug administrations, special attention must be paid to calculation of dosage (ie, mg/kg).

The patient’s chart shall contain documentation at the time of treatment that the patient’s level of consciousness and responsiveness, heart rate, blood pressure, respiratory rate,
and oxygen saturation were monitored until the patient attained predetermined discharge criteria. A variety of sedation scoring systems are available and may aid this process. Adverse events and their treatment shall be documented.

**Documentation after treatment**
The time and condition of the child at discharge from the treatment area or facility shall be documented; this should include documentation that the child’s level of consciousness and oxygen saturation in room air have returned to a state that is safe for discharge by recognized criteria. Patients receiving supplemental oxygen before the procedure should have a similar oxygen need after the procedure. Because some sedation medications are known to have a long half-life and may delay the patient’s complete return to baseline of pose the risk of resedation some patients might benefit from a longer period of less-intense observation (eg, a step-down observation area) before discharge from medical supervision. Several scales to evaluate recovery have been devised and validated. A recently described and simple evaluation tool may be the ability of the infant or child to remain awake for at least 20 minutes when placed in a quiet environment.

**Deep Sedation General Anesthesia**

- The qualified dentist is responsible for the sedative management, adequacy of the facility and staff, diagnosis and treatment of emergencies related to the administration of moderate sedation and providing the equipment, drugs and protocol for patient rescue.
Table 9.

State Mandated Office Inspection Requirements

1. California laws related to office inspections
2. Graphs summarizing requirements in 50 states

1. California office inspection laws

General Anesthesia

1646.4. (a) Prior to the issuance or renewal of a permit for the use of general anesthesia, the board may, at its discretion, require an onsite inspection and evaluation of the licentiate and the facility, equipment, personnel, and procedures utilized by the licentiate. The permit of any dentist who has failed an onsite inspection and evaluation shall be automatically suspended 30 days after the date on which the board notifies the dentist of the failure, unless within that time period the dentist has retaken and passed an onsite inspection and evaluation. Every dentist issued a permit under this article shall have an onsite inspection and evaluation at least once every five years. Refusal to submit to an inspection shall result in automatic denial or revocation of the permit.

(b) The board may contract with public or private organizations or individuals expert in dental outpatient general anesthesia to perform onsite inspections and evaluations. The board may not, however, delegate its authority to issue permits or to determine the persons or facilities to be inspected.

Conscious Sedation

1647.7. (a) Prior to the issuance or renewal of a permit to administer conscious sedation, the board may, at its discretion, require an onsite inspection and evaluation of the licentiate and the facility, equipment, personnel, and procedures utilized by the licentiate. The permit of any dentist who has failed an onsite inspection and evaluation shall be automatically suspended 30 days after the date on which the board notifies the dentist of the failure, unless, within that time period, the dentist has retaken and passed an onsite inspection and evaluation. Every dentist issued a permit under this article shall have an onsite inspection and evaluation at least once in every six years. Refusal to submit to an inspection shall result in automatic denial or revocation of the permit.

(b) An applicant who has successfully completed the course required by Section 1647.3 may be granted a one-year temporary permit by the board prior to the onsite inspection and evaluation. Failure to pass the inspection and evaluation shall result in the immediate and automatic termination of the temporary permit.

(c) The board may contract with public or private organizations or individuals expert in dental outpatient conscious sedation to perform onsite inspections and evaluations. The board may not,
however, delegate its authority to issue permits or to determine the persons or facilities to be inspected.

16 CCR § 1043.3

§ 1043.3. Onsite Inspections.

Also see CCR 1043, 1043.2, 1043.4, 1043.5, 1043.6, 1043.7, 1043.8

All offices in which general anesthesia or conscious sedation is conducted under the terms of this article shall, unless otherwise indicated, meet the standards set forth below. In addition, an office may in the discretion of the board be required to undergo an onsite inspection. For the applicant who administers in both an outpatient setting and at an accredited facility, the onsite must be conducted in an outpatient setting. The evaluation of an office shall consist of three parts:

(a) Office Facilities and Equipment. The following office facilities and equipment shall be available and shall be maintained in good operating condition:

(1) An operating theatre large enough to adequately accommodate the patient on a table or in an operating chair and permit an operating team consisting of at least three individuals to freely move about the patient.

(2) An operating table or chair which permits the patient to be positioned so the operating team can maintain the airway, quickly alter patient position in an emergency, and provide a firm platform for the management of cardiopulmonary resuscitation.

(3) A lighting system which is adequate to permit evaluation of the patient’s skin and mucosal color and a backup lighting system which is battery powered and of sufficient intensity to permit completion of any operation underway at the time of general power failure.

(4) Suction equipment which permits aspiration of the oral and pharyngeal cavities. A backup suction device which can operate at the time of general power failure must also be available.

(5) An oxygen delivery system with adequate full face masks and appropriate connectors that is capable of allowing the administering of greater than 90% oxygen at a 10 liter/minute flow at least sixty minutes (650 liter “E” cylinder) to the patient under positive pressure, together with an adequate backup system which can operate at the time of general power failure.

(6) A recovery area that has available oxygen, adequate lighting, suction, and electrical outlets. The recovery area can be the operating theatre.

(b) Records. The following records shall be maintained:

(1) Adequate medical history and physical evaluation records updated prior to each administration of general anesthesia or conscious sedation. Such records shall include, but are not limited to the recording of the age, sex, weight, physical status (American Society of Anesthesiologists Classification), medication use, any known or suspected medically compromising conditions, rationale for sedation of the patient, and for general anesthesia only, auscultation of the heart and lungs as medically required.

(2) General Anesthesia and/or conscious sedation records, which shall include a time-oriented record with preoperative, multiple interaoperative, and postoperative pulse oximetry (every 5 minutes intraoperatively and every 15 minutes postoperatively for general anesthesia) and blood pressure and pulse readings, (both every 5 minutes intraoperatively for general anesthesia) drugs, amounts administered and time administered, length of the procedure, any complications of anesthesia or sedation and a statement of the patient’s condition at time of discharge.

(3) Written informed consent of the patient or if the patient is a minor, his or her parent or guardian.

(c) Drugs. Emergency drugs of the following types shall be available:

(1) Epinephrine

(2) Vasopressor (other than epinephrine)

(3) Bronchodilator

(4) Muscle relaxant (This is not required for conscious sedation.)

(5) Intravenous medication for treatment of cardiopulmonary arrest (This is not required for conscious sedation.)

(6) Appropriate drug antagonist

(7) Antihistaminic

(8) Anticholinergic
(9) Antiarrhythmic (This is not required for conscious sedation.)
(10) Coronary artery vasodilator
(11) Antihypertensive (This is not required for conscious sedation.)
(12) Anticonvulsant
(13) Oxygen
(14) 50% dextrose or other antihypoglycemic

d Prior to an onsite inspection and evaluation, the dentist shall provide a complete list of his/her emergency medications to the evaluator.

16 CCR § 1043.3, 16 CA ADC § 1043.3

Oral Conscious Sedation

16 CCR § 1044.5

See also CCR sections 1044, 1044.1, 1044.2, 1043.3, 1044.4

§ 1044.5. Facility and Equipment Standards.

A facility in which oral conscious sedation is administered to patients pursuant to this article shall meet the standards set forth below.

(a) Facility and Equipment.
   (1) An operatory large enough to adequately accommodate the patient and permit a team consisting of at least three individuals to freely move about the patient.
   (2) A table or dental chair which permits the patient to be positioned so the attending team can maintain the airway, quickly alter patient position in an emergency, and provide a firm platform for the management of cardiopulmonary resuscitation.
   (3) A lighting system which is adequate to permit evaluation of the patient's skin and mucosal color and a backup lighting system which is battery powered and of sufficient intensity to permit completion of any treatment which may be underway at the time of a general power failure.
   (4) An appropriate functional suctioning device that permits aspiration of the oral and pharyngeal cavities. A backup suction device that can function at the time of general power failure must also be available.
   (5) A positive-pressure oxygen delivery system capable of administering greater than 90% oxygen at a 10 liter/minute flow for at least sixty minutes (650 liter “E” cylinder), even in the event of a general power failure. All equipment must be age-appropriate and capable of accommodating the patients being seen at the permit-holder's office.
   (6) Inhalation sedation equipment, if used in conjunction with oral sedation, must have the capacity for delivering 100%, and never less than 25%, oxygen concentration at a flow rate appropriate for an age appropriate patient’s size, and have a fail-safe system. The equipment must be maintained and checked for accuracy at least annually.

(b) Ancillary equipment, which must include the following, and be maintained in good operating condition:
   (1) Age-appropriate oral airways capable of accommodating patients of all sizes.
   (2) An age-appropriate sphygmomanometer with cuffs of appropriate size for patients of all sizes.
   (3) A precordial/pretracheal stethoscope.
   (4) A pulse oximeter.
   (c) The following records shall be maintained:
   (1) An adequate medical history and physical evaluation, updated prior to each administration of oral conscious sedation. Such records shall include, but are not limited to, an assessment including at least visual examination of the airway, the age, sex, weight, physical status (American Society of Anesthesiologists Classification), and rationale for sedation of the minor patient as well as written informed consent of the patient or, as appropriate, parent or legal guardian of the patient.
   (2) Oral conscious sedation records shall include baseline vital signs. If obtaining baseline vital signs is prevented by the patient's physical resistance or emotional condition, the reason or reasons must be documented. The records shall also include intermittent quantitative monitoring and recording of oxygen saturation, heart and respiratory rates, blood pressure as appropriate for specific techniques, the name, dose and time of administration of all drugs administered including local and inhalation anesthetics, the length of the procedure, any complications of oral sedation, and a statement of the patient's condition at the time of discharge.
   (d) An emergency cart or kit shall be available and readily accessible and shall include the necessary and appropriate drugs and age- and size-appropriate equipment to resuscitate a nonbreathing and unconscious patient and provide continuous support while
The patient is transported to a medical facility. There must be documentation that all emergency equipment and drugs are checked and maintained on a prudent and regularly scheduled basis. Emergency drugs of the following types shall be available:

1. Epinephrine
2. Bronchodilator
3. Appropriate drug antagonists
4. Antihistaminic
5. Anticholinergic
6. Anticonvulsant
7. Oxygen
8. Dextrose or other antihypoglycemic

Note: Authority cited: Section 1614, Business and Professions Code. Reference: Sections 1647.10, 1647.16, 1647.22 and 1647.24, Business and Professions Code.

HISTORY

1. New section and new forms OCS-5 and OCS-3 filed 3-14-2000; operative 4-13-2000 (Register 2000, No. 11).
2. Amendment of section and Note and repealer of printed forms (this action incorporates applicable forms within article 5.5 by reference) filed 12-13-2007; operative 12-13-2007 pursuant to Government Code section 11343.4 (Register 2007, No. 50).

Moderate (Parenteral) Sedation Permit
State Mandated Inspection

Number of States

Required: 39
Not Required: 11
Pediatric Sedation Laws for the 50 States – Summary

**Pediatric sedation requirements**

Individual states have taken different approaches to the regulation of pediatric sedation. Twenty-five states, including California, have special requirements for young patients. California requirements apply to patients age 13 or under. An increasing number of states have adopted pediatric sedation educational requirements, equipment requirements, and permits over the past 10 years. All states regulate moderate sedation and deep sedation/GA, regardless of route of administration.

Ten states (California, Colorado, Florida, Georgia, Kentucky, Louisiana, Missouri, Mississippi, North Carolina, and Oklahoma) require permits for sedating pediatric patients.

Sixteen states require specific training, some in addition to adult sedation training, to administer moderate/conscious sedation to pediatric patients.

Approximately twenty-nine states have specific requirements for pediatric sedation administered by the oral route.

States differ in their definition of the pediatric patient. Several states define the pediatric patient as being under the age of 12 consistent with ADA Guidelines; however, other states use 13, 14, 16, and 18 years of age. Most states, including California, specify that the practitioner must have appropriately sized equipment for pediatric patients. In some states ACLS certification is deemed sufficient for treating pediatric patients; Twenty states currently require PALS certification. California does not presently require certification in PALS.

Although ten states have adopted the AAP-AAPD Guidelines, these usually apply to minimal and moderate sedation. Most states do not have specific requirements for the administration of deep sedation/general anesthesia to children.
OCS = oral conscious sedation; 25/10 etc. = classroom hours/supervised cases; PALS= pediatric advanced life support course; all numbers are approximate.
In February 2016 Senator Jerry Hill, Chair of the Senate Committee on Business, Professions, and Economic Development was made aware of a tragedy in which an otherwise healthy child died after receiving general anesthesia at a dentist’s office. He notified the Dental Board of California (Board) of his concern about the rise in the use of anesthesia for young patients and asked the Board to investigate whether California’s present laws, regulations, and policies are sufficient to protect the public. In doing the research, Senator Hill asked the Board to review all incident reports related to pediatric anesthesia in California for the past five years.

For the purpose of this review, “incident report” is defined as the notification the Board received from a licensee in accordance with reporting requirements of Business & Professions Code (BPC) Section 1680(z) relating to (1) the death of a patient during the performance of any dental or dental hygiene procedure; (2) the discovery of the death of a patient whose death is related to a dental or dental hygiene procedure performed by the dentist; and (3) the removal to a hospital or emergency center for medical treatment for a period exceeding 24 hours of any patient to whom oral conscious sedation, conscious sedation, or general anesthesia was administered, or any patient as a result of dental or dental hygiene treatment. While some notifications provide specific details of the incident, other notifications have minimal information. The regulation does not specify what information is required to be included in the notification to the Board.

This report will therefore reflect statistics related to incident reports of death and hospitalizations related to use of local anesthetic, oral conscious sedation, conscious sedation, general anesthesia, and “other” incidents NOT related to sedation for pediatric patients reported over a six year period, January 1, 2010 – December 31, 2015. For the purposes of this report, the age of a pediatric patient is defined as 21 years and younger.

In order to identify instances of pediatric hospitalizations and deaths reported to the Board, statistical reports from the Consumer Affairs System (CAS) database were pulled for cases tracked with specific violation codes related to the Board’s reporting requirements under BPC Section 1680(z). Reports pulled from the database were based on coding entered by complaint intake staff upon initial receipt of the notification and/or complaint.

Eight Board staff, including two Dental Consultants, and four investigative staff, reviewed all available incident reports, investigative files, and cases identified and recorded in the Board’s database relating to death or hospitalization cases. As there is no mechanism to sort data by age, therefore approximately 325 records and investigative files were reviewed in order to determine the number of pediatric hospitalizations and deaths reported or investigated by the Board in relation to dental treatment.

A portion of the cases identified in the database were not able to be reviewed as the files were not able to be located, or were purged pursuant to the Board’s records retention schedule. The Board’s records retention schedule indicates that closed files (that did not result in disciplinary action) shall remain on record as follows:

1
NOTIFICATION OF PEDIATRIC DEATHS
Review of the incident reports combined with additional information obtained during the course of the Board’s investigations revealed that during the six year period identified as January 1, 2010 through December 31, 2015, the Board received notice of nine pediatric deaths, four of which involved general anesthesia. A summary of the findings by year follows:

2010
Review of records indicated that in 2010, the Board received no notification of pediatric deaths.

2011
In 2011, three cases were received. Board review indicated the following:

- Investigation into the treatment of a three year old child under conscious sedation resulted in a referral to the Office of the Attorney General and an accusation was filed; the accusation was subsequently withdrawn.

  The patient was treated in a dental office for restorations of 20 teeth under conscious sedation on December 9, 2011. During the procedure the patient was awake and crying; additional sedation was administered by the provider. The patient was discharged to parent at 11:30 a.m., and did not wake after the procedure. 911 was called at 3:00 p.m.; the patient was pronounced dead the following evening.

- Investigation into the treatment of a four year old patient under general anesthesia on November 11, 2011, indicated insufficient evidence to proceed with disciplinary action.

  The patient was treated under general anesthesia, administered by a medical anesthesiologist at a hospital, for dental caries and gingivitis. The patient had a complex cardiac history and treatment was rendered at a large children’s hospital. The dental procedures were completed uneventfully, and the patient was extubated. In the recovery room the patient experienced cardiac arrests, and expired after 45 minutes of resuscitation efforts. A coroner’s report, and review by six corner bureau staff concluded it was a natural death.
• Investigation related to the treatment of a nine year old child under local anesthetic (xylocaine) on December 5, 2011, indicated no violation.

On December 5, 2011, a severely compromised nine year old patient was transferred by paramedics from a sub-acute care facility for extraction of six primary teeth under local anesthetic, at a university dental school. The patient’s health history was significant for spinal muscular atrophy type 1, global delay, reactive airway disease, asthma, osteopenia, chronic respiratory failure, anemia, aspiration pneumonia, constipation, failure to thrive, g-tube, gastric hypo motility, gerd, osteoporosis, quadriplegic, bed ridden, and nonverbal.

Treatment was performed and at the end of the procedure the patient’s vitals were close to baseline. The paramedic team declined the offer of the dental school’s emergency medical assistance and the patient was dismissed under the care of the paramedic team. The patient was then transported by the paramedic team to the university medical center emergency room because his blood pressure started to drop. The patient arrived at the emergency room in full arrest; cause of death is listed as cardiopulmonary arrest.

2012
Review of records indicated that in 2012 the Board received no notification of pediatric deaths.

2013
The Board received four notifications related to pediatric death in the year 2013. Of the four notifications received, three notifications were related to the treatment of a single patient by multiple providers, thereby reflecting only two incidents for this year.

• Investigation was initiated upon receipt of notification related to the treatment of an 11 year old child on May 22, 2013. The investigation found no violation occurred related to the treatment.

The patient had a history of mucopolysaccharidosis Type VII, and behavioral issues, and required treatment of decay under general anesthesia. Treatment of tooth #3 was initiated, at a university health clinic for children with anesthesia administered by an anesthesiologist. During the treatment, irregular cardiac patterns were detected, and treatment was halted. The medical team attempted to stabilize the patient without success.

• Investigation was initiated upon receipt of notification related to the death of a 19 year old patient. Three investigations were initiated as three dental providers were involved in the treatment. Two investigations resulted in referral to the Office of the Attorney General, and one investigation resulted in a closure with no violation.

Provider #1 saw patient on January 14, 2014, February 1, 2013, February 28, 2013, and March 6, 2013, for issues related to pain. Provider #1 placed a MODLB onlay on tooth #30, on February 1, 2013. Patient was seen by provider #1 an additional two times; February 28, 2013, and March 6, 2013 (#30 bite adjustment), for continued issues with pain. On March
16, 2013, patient’s mother called as patient continued to have pain, and spoke to provider #1 who felt patient had discomfort from grinding and recommended a night guard.

A second opinion was requested from provider #2, who attempted to fix the crown at #30 two times (March 20, 2013, March 22, 2013) without success. Provider #2 referred patient to provider #3, an endodontist on March 22, 2013, who on the same day performed a partial root canal treatment on tooth #30, and prescribed antibiotics, pain pills, and made a follow up appointment.

The mother, who accompanied the patient to the appointment, left her in the car while filling the prescription at a pharmacy. When the mother returned to the car, the patient was unresponsive. 911 was called, the patient passed four days later; the cause of death is listed as sepsis, clinical dental infection with multiple dental procedures, clinical.

2014
Review of records indicated that in 2014 the Board received no notification of pediatric deaths.

2015
The Board received four notifications related to pediatric death in the year 2015.

- Investigation was conducted upon receipt of notification related to treatment rendered to a 17 year old patient under general anesthesia on April 1, 2015. The investigation indicated insufficient evidence to proceed with disciplinary action.

The 17 year old patient had history significant for cerebral palsy, seizure disorder, 1P36 chromosomal deletion syndrome, chronic constipation, and thrombocytopenia secondary to valproic acid. Medical consultations were obtained from the patient’s neurologist, hematologist, and GI doctor prior to treatment under general anesthesia for decay, prophy, x-rays, and dental pain. Treatment was performed at a pediatric children’s hospital by two dental providers. X-rays were taken, the prophy was performed, and one primary over retained tooth and four permanent teeth were extracted, without issue.

Patient was transferred to post anesthesia care unit, but was not able to be removed from the respirator. Five days later the patient suffered complications involving pneumonia and the parents asked the patient be removed from life support.

- Investigation was conducted upon notification of the death of a six year old patient, who was placed under general anesthesia for dental treatment. The investigation resulted in referral to the Office of the Attorney General; outcome is pending.

The six year old patient presented to a dental office for the extraction of a mesiodens in the area of #9 under general anesthesia on March 13, 2015. Following the administration of a local anesthetic, the provider reported not being able to hear the patient breathing. Oxygen/mask bag was applied, and 911 was called; the oxygen/mask bag was unsuccessful.
While waiting for EMS, the provider unsuccessfully attempted to intubate patient; the provider continued with mask/bag ventilation until EMT arrived. After two days of treatment, MD ordered compassionate withdrawal of care. Cause of death listed as hypoxic encephalopathy due to cardiac arrest.

- Investigation was conducted upon notification of the death of a three year old patient after treatment in a pediatric dental office. The investigation resulted in the referral to the Office of the Attorney General; outcome is pending.

The three year old patient presented to a pediatric dental office for restorative treatment in all four quadrants under oral sedation, with a papoose board on February 25, 2015. The patient was in treatment for four hours and was in recovery for two hours when he became tachycardic and his oxygen saturation decreased. Patient was given oxygen and was monitored, about one hour later (3 hours after treatment), 911 was called. Patient was transported to the hospital, and expired 4 days later; cause of death listed a malignant hyperthermia, with cerebral edema and hypoglycemia as underlying causes.

- Investigation related to the treatment of a three year old child under local anesthetic (lidocaine, septocaine, and nitrous oxide) on July 30, 2015, is ongoing.

On July 30, 2015, the three year old patient was undergoing dental treatment under nitrous oxide and local anesthetic, and became non-responsive. CPR was initiated, and paramedics were called. Patient was transported to the hospital and passed on August 1, 2015. The cause of death was not known at the time the report was submitted to the Board.
A simplified summary of the Board’s findings related to pediatric deaths for the years 2010 through 2015 is as follows.

NOTIFICATION OF PEDIATRIC HOSPITALIZATIONS

Board staff conducted additional review of hospitalizations of pediatric patients from January 1, 2010, through December 31, 2015. The following chart summarizes the number of instances; and breaks down incidents by the year of occurrence, the patient’s age, and the type of sedation used, if applicable.

*Cases reflected in the below summary account for separate incidents and patients.

</table>
A more detailed account of these instances is available for review; refer to the attached *Summary Report of Pediatric Hospitalizations* for additional details including final outcome. Of note, in some instances multiple providers rendered treatment to a single patient. As such, multiple reports exist for a single instance; this is reflected in the *Summary Report of Pediatric Hospitalizations*.

For the purpose of this inquiry, the Board has examined all identified notifications and investigations of pediatric deaths and hospitalizations. During the course of an investigation, the Board gathers information and evidence, and conducts investigations with the intent to determine if dental treatment was rendered within the community standard of care.

Any notifications of potential violations are initially received and reviewed by the Complaint and Compliance Unit (CCU). CCU staff initially review and enter the complaint in the database. The matter is then referred to an analyst within the CCU to determine priority, gather records, and prepare for review by an in-house dental consultant. The in-house dental consultant determines at a general level, if the treatment was within the community standard of care. If the in-house consultant finds a deviation from the community standard of care, the matter is referred to investigation.

Of note, each case has different factors and components that are used to determine priority. Reports of patient death are immediately referred to investigation, and are handled and investigated as a priority matter.

Upon initial receipt by investigative staff, the case is reviewed and evaluated for potential Dental Practice Act (DPA) and community standard of care violations. Matters are reviewed by investigative staff upon first receipt for prioritization. Upon investigation of each individual case, evidence is obtained, records are gathered, and interviews are conducted.

The investigative evidence gathered is then forwarded to a subject matter expert (SME) in the area of treatment, for review and determination of violation(s) of the community standard of care and the DPA. The SME prepares a report of his or her findings, and based on the findings, the Board will proceed accordingly; i.e., referral to the Office of the Attorney General, case closure; with no violation or insufficient evidence, a citation and fine, etc.

Cases are referred to the Office of the Attorney General for consideration of disciplinary action, including revocation, suspension, or probation. Matters closed with no violation are a result of a finding that the treatment rendered did not deviate from the community standard of care. A case closed due to insufficient evidence indicates that the available evidence did not support that charges could be successfully filed by the Office of the Attorney General.

The Board receives a broad range of complaints and the information gathered in response to a complaint is specific to each case, and varies widely from investigation to investigation. The information obtained during the course of an investigation is germane to the specific case and the associated allegations. The data provided in this report should be interpreted with caution.
because board information systems are designed primarily for tracking, management, and reporting of enforcement activity. These systems were not designed for the systematic collection and analysis of outcomes research data.

- Nov. 30   Adjournment Sine Die at midnight (Art. IV, Sec. 3(a)).
- Dec. 5    12 Noon convening of the 2017-18 Regular Session (Art. IV, Sec. 3(a)).

**2017**

- Jan. 1    Statutes take effect (Art. IV, Sec. 8(c)).

*Holiday schedule subject to Senate Rules committee approval*
MEMORANDUM

DATE       July 5, 2016
TO         Legislative & Regulatory Committee Members
FROM       Lusine M Sarkisyan, Legislative & Regulatory Analyst
SUBJECT   Agenda Item 19B: Discussion and Possible Action on Legislation

Board staff is currently tracking eighteen (18) bills, pertaining to the Dental Board, healing arts boards, and statutes within the Business and Professions Code. Those bills that may directly impact the Board and have not failed to meet legislative deadlines will be discussed today.

The following bills have been listed for informational purposes only; no discussion or action will be taken during this agenda item. These bills have either failed to meet legislative deadlines and will no longer be moving through the legislative process or do not apply to the Board.

Agenda Item 19B - August 2016 Dental Board Meeting
The following bills will be discussed by the Committee at this meeting. These are the same bills that the Committee discussed and took action on during its May 2016 meeting that are still progressing through the 2016 legislative process. Copies of each of these bills and staff analyses are enclosed in the meeting packet which were last updated as of July 31, 2016. Staff will continue to monitor the bills as they proceed through the legislative process and provide an update during the Board meeting should any changes have been made.

Staff has provided a matrix of the tracked legislation disclosing information regarding each bill’s status and Board’s positions. Staff has provided copies of each bill in their most recent version, accompanied by staff analyses.
The following Web sites are excellent resources for viewing proposed legislation and finding additional information:

- [www.senate.ca.gov](http://www.senate.ca.gov)
- [www.assembly.ca.gov](http://www.assembly.ca.gov)
- [www.leginfo.ca.gov](http://www.leginfo.ca.gov)

**Action Requested:**
The Legislative and Regulatory Committee may recommend the Board take one of the following actions regarding each bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommendations regarding Board action are included on the individual bill's analysis.

DENTAL BOARD OF CALIFORNIA
BILL ANALYSIS
AUGUST 2016 BOARD MEETING

BILL NUMBER: Assembly Bill 2235
AUTHOR: Assembly Member Tony Thurmond
SPONSOR: American Academy of Pediatrics, California
VERSION: Amended in Senate 6/29/2016
INTRODUCED: 2/18/2016
BILL STATUS: 06/29/2016 – Amended and re-referred to Com. On APPR.
BILL LOCATION: Senate Appropriations
SUBJECT: Board of Dentistry: Pediatric Anesthesia: Committee
RELATED BILLS:

SUMMARY
In amended form, this bill would require the Dental Board of California (Board) to do the following:

- By January 1, 2017, report to the legislature on whether current statutes and regulations for the administration and monitoring of pediatric anesthesia in dentistry provide adequate protection for pediatric dental patients;
- Make the report publicly available on the Board’s internet website;
- Provide a report on pediatric deaths related to general anesthesia in dentistry at the time of its sunset review;
- Create Board approved reporting forms of the specified information; and
- Assess a penalty on any licensee who fails to submit the required report.

This bill would also require licensees to do the following:

- Complete the Board approved reporting form as incidents occur relating to general anesthesia or conscious sedation; and
- Obtain written informed consent of a patient prior to administering general anesthesia.

Additionally, this proposed bill encourages the Board to encourage all dental sedation providers in California to submit data regarding adverse events to a pediatric sedation research database maintained by an unidentified nonprofit organization.

ANALYSIS
This bill mirrors a request submitted to the Board President by Senate Committee on Business Professions and Economic Development Chair Jerry Hill. However, there are additional requirements such as creating a Board approved reporting form for licensees to utilize in order to submit incident reports where general anesthesia or conscious sedation is used; making the report public on the Board’s internet website; penalizing licensees if they fail to submit an incident report with the required information; and requiring licensees to incorporate a statement as specified within their written informed consent forms.

This would require the hiring of additional staff to perform the journey-level work required by this bill. The additional staff member will become the liaison between the Board, subcommittee, legislature, licensees, professional organizations, and other stakeholders. The staff member will lead in the research and promulgation of regulations to be implemented once the subcommittee
provides the report; process incident reports; input data from the incident reports into a spreadsheet, and correspond with licensees should questions arise or inquiries be made. The fiscal impact as a result of this bill is the cost associated with hiring an additional staff member; the first year of hiring an associate governmental program analyst is $120,000 and the ongoing costs will be $104,000.

REGISTERED SUPPORT/OPPOSITION (Last updated 6/13/2016)

Support:
American Academy of Pediatrics, California (Sponsor)
American Society of Dentist Anesthesiologists
California Association of Nurse Anesthetists
California Society of Anesthesiologists
The Children’s Partnership
Numerous individuals

Support if Amended:
California Dental Association

Oppose unless Amended:
Oral and Facial Surgeons of California

BOARD POSITION
The Board took a position of “Support in Concept with Suggested Revisions” on the bill during the May 2016 Board meeting. The Committee may consider recommending the Board take one of the following actions regarding this bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommends the Committee to continue to maintain its “Support in Concept” position on this bill for the following reasons:

1. The March 2016 appointed subcommittee is working on the request made by Senate Business, Professions and Economic Development Chair, Senator Jerry Hill, which mirrors this proposed bill in pertinent parts; and

2. The language continues to evolve.
An act to amend Sections 1680 and 1682 of, and to add Section 1601.4 to, the Business and Professions Code, relating to healing arts.

LEGISLATIVE COUNSEL’S DIGEST

The Dental Practice Act provides for the licensure and regulation of dentists by the Dental Board of California. That act authorizes a committee of the board to evaluate all suggestions or requests for regulatory changes related to the committee and to hold informational hearings in order to report and make appropriate recommendations to the board, after consultation with departmental legal counsel and the board’s chief executive officer. The act requires a committee to include in any report regarding a proposed regulatory change, at a minimum, the specific language or the proposed change or changes and the reasons therefor, and any facts supporting the need for the change.
The act governs the use of general anesthesia, conscious sedation, and oral conscious sedation for pediatric and adult patients. The act makes it unprofessional conduct for a licensee to fail to report the death of a patient, or removal of a patient to a hospital or emergency center for medical treatment, that is related to a dental procedure, as specified. The act also makes it unprofessional conduct for any dentist to fail to obtain the written informed consent of a patient prior to administering general anesthesia or conscious sedation. In the case of a minor, the act requires that the consent be obtained from the child’s parent or guardian.

This bill, which would be known as “Caleb’s Law,” would require the board, on or before February 1, 2017, to establish a committee to investigate whether the current statutes and regulations for the administration and monitoring of oral conscious sedation, conscious sedation, and general anesthesia provide adequate protection for pediatric dental patients. The bill would require the committee, on or before August 1, 2017, to review all incident reports and relevant investigatory information related to pediatric anesthesia in dentistry in the state for the years 2010 to 2016, inclusive, and to review the policies and guidelines of other states and national dental associations, as well as studies, to ensure that the state’s statutes and regulations adequately protect pediatric dental patients. The bill would require the committee, on or before November 1, 2017, to present its findings in a report to the board, including any recommendations necessary to improve safety.

The bill would require the board, on or before January 1, 2018, to provide to the Legislature the committee’s recommendations, an evaluation of the committee’s report, and the board’s own recommendations and to make the report publicly available on the board’s Internet Web site. The bill also would require the board to provide a report on pediatric deaths related to general anesthesia in dentistry at the time of its sunset review by the appropriate policy committees of the Legislature.

This bill, which would be known as “Caleb’s Law,” would require the board, on or before January 1, 2017, to provide to the Legislature a report on whether current statutes and regulations for the administration and monitoring of pediatric anesthesia in dentistry provide adequate protection for pediatric dental patients and would require the board to make the report publicly available on the board’s Internet Web site. The bill also would require the board to provide a report on pediatric deaths related to general anesthesia in dentistry at
This bill would require that the report of the death of a patient, or removal of a patient to a hospital or emergency center for medical treatment, be on a form or forms approved by the board and that the report include specified information. The bill authorizes the board to assess a penalty on any licensee who fails to make the required report.

This bill, with regard to obtaining written informed consent for general anesthesia or conscious sedation in the case of a minor, would require that the written informed consent include specified information regarding anesthesia, as provided.

The people of the State of California do enact as follows:

SECTION 1. This act shall be known, and may be cited, as “Caleb’s Law.”

SEC. 2. It is the Legislature’s intent, to the extent that funds are appropriated for this purpose, that the board encourage all dental sedation providers in California to submit data regarding pediatric sedation events to a pediatric sedation research database maintained by a nonprofit organization. It is the goal of the Legislature that the data submitted will be used to formulate a systems-based approach to improve the quality of services provided to pediatric dental anesthesia patients in outpatient settings.

SEC. 3. Section 1601.4 is added to the Business and Professions Code, to read:

1601.4. (a) The board, on or before February 1, 2017, shall establish a committee to investigate whether current statutes and regulations for the administration and monitoring of oral conscious sedation, conscious sedation, and general anesthesia provide adequate protection for pediatric dental patients. For the purpose of this section, a pediatric dental patient is a person under 21 years of age:

(b) On or before August 1, 2017, the committee shall review all incident reports and relevant investigatory information related to pediatric anesthesia in dentistry in the state for the years 2010 to 2016, inclusive, and shall review the policies and guidelines of other states and national dental associations as well as studies...
regarding the use of pediatric anesthesia to ensure that the state’s statutes and regulations adequately protect pediatric dental patients.

The committee also shall review statutory and regulatory definitions relating to sedation and anesthesia and recommend any necessary revisions. The members of the committee shall agree not to disclose any confidential, privileged, or personally identifiable information contained in the dental board records, except as permitted by law.

(c) On or before November 1, 2017, the committee shall present its findings to the board in a report which shall include any recommendations necessary to improve safety during the administration and monitoring of oral conscious sedation, conscious sedation, and general anesthesia for pediatric dental patients.

(d) On or before January 1, 2018, the board shall provide to the Legislature the recommendations of the committee pursuant to subdivision (c), an evaluation of the report, and the board’s own recommendations. The report shall be submitted in compliance with Section 9795 of the Government Code. The requirement for submitting a report imposed by this subdivision is inoperative on December 1, 2021, pursuant to Section 10231.5 of the Government Code. The board shall make the report publicly available on the board’s Internet Web site, and shall include, but is not limited to, the following anonymized data from each incident reviewed, if available from records in the board’s possession, custody, or control, including investigatory reports: the age of the patient; the patient’s primary diagnosis; the procedures performed; the sedation setting; the medications used; the monitoring equipment used; the category of the provider responsible for sedation oversight; the category of the provider delivering sedation; the category of the provider monitoring the patient during sedation; whether the person supervising the sedation performed one or more of the procedures; the category of the provider conducting resuscitation measures; and the resuscitation equipment utilized.

(e) For the purposes of subdivision (d), categories of provider are: General Dentist, Pediatric Dentist, Oral Surgeon, Dentist Anesthesiologist, Physician Anesthesiologist, Dental Assistant, Registered Dental Assistant, Dental Sedation Assistant, Registered Nurse, Certified Registered Nurse Anesthetist, or Other.
(f) The board shall provide a report on pediatric deaths related to general anesthesia in dentistry at the time of its sunset review pursuant to subdivision (d) of Section 1601.1.

(a) On or before January 1, 2017, the board shall provide to the Legislature a report on whether current statutes and regulations for the administration and monitoring of pediatric anesthesia in dentistry provide adequate protection for pediatric dental patients. The report shall be submitted in compliance with Section 9795 of the Government Code. The requirement for submitting a report imposed by this subdivision is inoperative on December 1, 2021, pursuant to Section 10231.5 of the Government Code. The board shall make the report publicly available on the board’s Internet Web site.

(b) The board shall provide a report on pediatric deaths related to general anesthesia in dentistry at the time of its sunset review pursuant to subdivision (d) of Section 1601.1.

SEC. 4. Section 1680 of the Business and Professions Code is amended to read:

1680. Unprofessional conduct by a person licensed under this chapter is defined as, but is not limited to, any one of the following:

(a) The obtaining of any fee by fraud or misrepresentation.

(b) The employment directly or indirectly of any student or suspended or unlicensed dentist to practice dentistry as defined in this chapter.

(c) The aiding or abetting of any unlicensed person to practice dentistry.

(d) The aiding or abetting of a licensed person to practice dentistry unlawfully.

(e) The committing of any act or acts of sexual abuse, misconduct, or relations with a patient that are substantially related to the practice of dentistry.

(f) The use of any false, assumed, or fictitious name, either as an individual, firm, corporation, or otherwise, or any name other than the name under which he or she is licensed to practice, in advertising or in any other manner indicating that he or she is practicing or will practice dentistry, except that name as is specified in a valid permit issued pursuant to Section 1701.5.

(g) The practice of accepting or receiving any commission or the rebating in any form or manner of fees for professional services,
radiograms, prescriptions, or other services or articles supplied to
patients.
(h) The making use by the licensee or any agent of the licensee
of any advertising statements of a character tending to deceive or
mislead the public.
   (i) The advertising of either professional superiority or the
   advertising of performance of professional services in a superior
   manner. This subdivision shall not prohibit advertising permitted
   by subdivision (h) of Section 651.
   (j) The employing or the making use of solicitors.
   (k) The advertising in violation of Section 651.
   (l) The advertising to guarantee any dental service, or to perform
any dental operation painlessly. This subdivision shall not prohibit
advertising permitted by Section 651.
   (m) The violation of any of the provisions of law regulating the
procurement, dispensing, or administration of dangerous drugs,
as defined in Chapter 9 (commencing with Section 4000) or
controlled substances, as defined in Division 10 (commencing
with Section 11000) of the Health and Safety Code.
   (n) The violation of any of the provisions of this division.
   (o) The permitting of any person to operate dental radiographic
equipment who has not met the requirements of Section 1656.
   (p) The clearly excessive prescribing or administering of drugs
or treatment, or the clearly excessive use of diagnostic procedures,
or the clearly excessive use of diagnostic or treatment facilities,
as determined by the customary practice and standards of the dental
profession.
Any person who violates this subdivision is guilty of a
misdemeanor and shall be punished by a fine of not less than one
hundred dollars ($100) or more than six hundred dollars ($600),
or by imprisonment for a term of not less than 60 days or more
than 180 days, or by both a fine and imprisonment.
(q) The use of threats or harassment against any patient or
licensee for providing evidence in any possible or actual
disciplinary action, or other legal action; or the discharge of an
employee primarily based on the employee’s attempt to comply
with the provisions of this chapter or to aid in the compliance.
   (r) Suspension or revocation of a license issued, or discipline
imposed, by another state or territory on grounds that would be
the basis of discipline in this state.
(s) The alteration of a patient’s record with intent to deceive.
(t) Unsanitary or unsafe office conditions, as determined by the customary practice and standards of the dental profession.
(u) The abandonment of the patient by the licensee, without written notice to the patient that treatment is to be discontinued and before the patient has ample opportunity to secure the services of another dentist, registered dental hygienist, registered dental hygienist in alternative practice, or registered dental hygienist in extended functions and provided the health of the patient is not jeopardized.
(v) The willful misrepresentation of facts relating to a disciplinary action to the patients of a disciplined licensee.
(w) Use of fraud in the procurement of any license issued pursuant to this chapter.
(x) Any action or conduct that would have warranted the denial of the license.
(y) The aiding or abetting of a licensed dentist, dental assistant, registered dental assistant, registered dental assistant in extended functions, dental sedation assistant permitholder, orthodontic assistant permitholder, registered dental hygienist, registered dental hygienist in alternative practice, or registered dental hygienist in extended functions to practice dentistry in a negligent or incompetent manner.
(z) The failure to report to the board in writing within seven days any of the following: (A) the death of his or her patient during the performance of any dental or dental hygiene procedure; (B) the discovery of the death of a patient whose death is related to a dental or dental hygiene procedure performed by him or her; or (C) except for a scheduled hospitalization, the removal to a hospital or emergency center for medical treatment of any patient to whom oral conscious sedation, conscious sedation, or general anesthesia was administered, or any patient as a result of dental or dental hygiene treatment. With the exception of patients to whom oral conscious sedation, conscious sedation, or general anesthesia was administered, removal to a hospital or emergency center that is the normal or expected treatment for the underlying dental condition is not required to be reported. Upon receipt of a report pursuant to this subdivision the board may conduct an inspection of the dental office if the board finds that it is necessary. A dentist shall report to the board all deaths occurring in his or her practice
with a copy sent to the Dental Hygiene Committee of California
if the death was the result of treatment by a registered dental
hygienist, registered dental hygienist in alternative practice, or
registered dental hygienist in extended functions. A registered
dental hygienist, registered dental hygienist in alternative practice,
or registered dental hygienist in extended functions shall report to
the Dental Hygiene Committee of California all deaths occurring
as the result of dental hygiene treatment, and a copy of the
notification shall be sent to the board.

(2) The report required by this subdivision shall be on a form
or forms approved by the board. The form or forms approved by
the board shall require the licensee to include, but not be limited
to, the following information for cases in which patients received
anesthesia: the date of the procedure; the patient’s age in years
and months, weight, and sex; the patient’s American Society of
Anesthesiologists (ASA) physical status; the patient’s primary
diagnosis; the patient’s coexisting diagnoses; the procedures
performed; the sedation setting; the medications used; the
monitoring equipment used; the category of the provider
responsible for sedation oversight; the category of the provider
delivering sedation; the category of the provider monitoring the
patient during sedation; whether the person supervising the sedation
performed one or more of the procedures; the planned airway
management; the planned depth of sedation; the complications
that occurred; a description of what was unexpected about the
airway management; whether there was transportation of the patient
during sedation; the category of the provider conducting
resuscitation measures; and the resuscitation equipment utilized.
Disclosure of individually identifiable patient information shall
be consistent with applicable law. A report required by this
subdivision shall not be admissible in any action brought by a
patient of the licensee providing the report.

(3) For the purposes of paragraph (2), categories of provider
are: General Dentist, Pediatric Dentist, Oral Surgeon, Dentist
Anesthesiologist, Physician Anesthesiologist, Dental Assistant,
Registered Dental Assistant, Dental Sedation Assistant, Registered
Nurse, Certified Registered Nurse Anesthetist, or Other.

(4) The form shall state that this information shall not be
considered an admission of guilt, but is for educational, data, or
investigative purposes.
The board may assess a penalty on any licensee who fails
to report an instance of an adverse event as required by this
subdivision. The penalty is a maximum fine of one hundred dollars
($100) per day not reported after the initial seven-day reporting
period. The licensee may dispute the failure to file within 10 days
of receiving notice that the board had assessed a penalty against
the licensee.

(a) Participating in or operating any group advertising and
referral services that are in violation of Section 650.2.

(b) The failure to use a fail-safe machine with an appropriate
exhaust system in the administration of nitrous oxide. The board
shall, by regulation, define what constitutes a fail-safe machine.

(c) Engaging in the practice of dentistry with an expired license.

(d) Except for good cause, the knowing failure to protect
patients by failing to follow infection control guidelines of the
board, thereby risking transmission of bloodborne infectious
diseases from dentist, dental assistant, registered dental assistant,
registered dental assistant in extended functions, dental sedation
assistant permitholder, orthodontic assistant permitholder,
registered dental hygienist, registered dental hygienist in alternative
practice, or registered dental hygienist in extended functions to
patient, from patient to patient, and from patient to dentist, dental
assistant, registered dental assistant, registered dental assistant in
extended functions, dental sedation assistant permitholder,
orthodontic assistant permitholder, registered dental hygienist,
registered dental hygienist in alternative practice, or registered
dental hygienist in extended functions. In administering this
subdivision, the board shall consider referencing the standards,
regulations, and guidelines of the State Department of Public
Health developed pursuant to Section 1250.11 of the Health and
Safety Code and the standards, guidelines, and regulations pursuant
to the California Occupational Safety and Health Act of 1973 (Part
1 (commencing with Section 6300) of Division 5 of the Labor
Code) for preventing the transmission of HIV, hepatitis B, and
other blood-borne pathogens in health care settings. The board
shall review infection control guidelines, if necessary, on an annual
basis and proposed changes shall be reviewed by the Dental
Hygiene Committee of California to establish a consensus. The
committee shall submit any recommended changes to the infection
control guidelines for review to establish a consensus. As
necessary, the board shall consult with the Medical Board of
California, the California Board of Podiatric Medicine, the Board
of Registered Nursing, and the Board of Vocational Nursing and
Psychiatric Technicians, to encourage appropriate consistency in
the implementation of this subdivision.

The board shall seek to ensure that all appropriate dental
personnel are informed of the responsibility to follow infection
control guidelines, and of the most recent scientifically recognized
safeguards for minimizing the risk of transmission of bloodborne
infectious diseases.

(ae) The utilization by a licensed dentist of any person to
perform the functions of any registered dental assistant, registered
dental assistant in extended functions, dental sedation assistant
permitholder, orthodontic assistant permitholder, registered dental
hygienist, registered dental hygienist in alternative practice, or
registered dental hygienist in extended functions who, at the time
of initial employment, does not possess a current, valid license or
permit to perform those functions.

(af) The prescribing, dispensing, or furnishing of dangerous
drugs or devices, as defined in Section 4022, in violation of Section
2242.1.

SEC. 5. Section 1682 of the Business and Professions Code is
amended to read:

1682. In addition to other acts constituting unprofessional
conduct under this chapter, it is unprofessional conduct for:

(a) Any dentist performing dental procedures to have more than
one patient undergoing conscious sedation or general anesthesia
on an outpatient basis at any given time unless each patient is being
continuously monitored on a one-to-one ratio while sedated by
either the dentist or another licensed health professional authorized
by law to administer conscious sedation or general anesthesia.

(b) Any dentist with patients recovering from conscious sedation
or general anesthesia to fail to have the patients closely monitored
by licensed health professionals experienced in the care and
resuscitation of patients recovering from conscious sedation or
general anesthesia. If one licensed professional is responsible for
the recovery care of more than one patient at a time, all of the
patients shall be physically in the same room to allow continuous
visual contact with all patients and the patient to recovery staff
ratio should not exceed three to one.
(c) Any dentist with patients who are undergoing conscious sedation to fail to have these patients continuously monitored during the dental procedure with a pulse oximeter or similar or superior monitoring equipment required by the board.

(d) Any dentist with patients who are undergoing conscious sedation to have dental office personnel directly involved with the care of those patients who are not certified in basic cardiac life support (CPR) and recertified biennially.

(e) (1) Any dentist to fail to obtain the written informed consent of a patient prior to administering general anesthesia or conscious sedation. In the case of a minor, the consent shall be obtained from the child’s parent or guardian.

(2) The written informed consent, in the case of a minor, shall include, but not be limited to, the following information:

“The administration and monitoring of general anesthesia may vary depending on the type of procedure, the type of practitioner, the age and health of the patient, and the setting in which anesthesia is provided. Risks may vary with each specific situation. You are encouraged to explore all the options available for your child’s anesthesia for his or her dental treatment, and consult with your dentist or pediatrician as needed.”

(3) Nothing in this subdivision shall be construed to establish the reasonable standard of care for administering or monitoring oral conscious sedation, conscious sedation, or general anesthesia.
DENTAL BOARD OF CALIFORNIA
BILL ANALYSIS
MAY 2016 BOARD MEETING

BILL NUMBER: Assembly Bill 2331
AUTHOR: Assembly Member Matt Dababneh
SPONSOR: 
VERSION: Amended 6/16/2016
INTRODUCED: 2/18/2016
BILL STATUS: 6/28/2016 Do pass and 
referred to Com on APPR
BILL LOCATION: Senate Appropriations
SUBJECT: Dentistry: Applicants to Practice
RELATED BILLS: 

SUMMARY
Existing law requires each applicant for a license to practice dentistry to successfully complete specified examinations, including receiving a passing score on either a portfolio examination, as specified, or a clinical and written examination administered by the Western Regional Examining Board (WREB).

Additionally, existing law authorizes the Director of Finance to accept on behalf of the state any gift of real or personal property whenever he or she deems the gift and the terms and conditions thereof to be in the best interest of the state.

This bill would require the Dental Board of California (Board) to recognize an additional pathway to dental licensure in California by allowing an applicant to satisfy a portion of the licensure examination requirements by taking and successfully passing the examination developed by the American Board of Dental Examiners, Inc (ADEX). Additionally, this bill would specify that ADEX will pay all reasonable costs and expenses the Board incurs and would authorize the Director of Finance to accept funds for the purpose of implementing the ADEX examination which would be deposited into the Special Deposit Fund.

ANALYSIS
At this time, the potential impact of this bill upon the Dental Board of California (Board) is significant, as it would require the Board to conduct the occupational analyses prior to a psychometric evaluation validation of ADEX as required by Business and Professions Code (Code) Section 139.

The cost associated with the occupational analyses and the psychometric evaluation validation is addressed in this proposed bill by the addition of language regarding the acceptance of funds by the Director of Finance and the requirement of ADEX paying all reasonable costs and expenses incurred as a result of implementing the proposed bill.
Additional staff will be hired to process the ADEX examination and assist in the promulgation of regulations to implement the new pathway. The cost associated with hiring a staff services analyst is $90,000 the first year and $82,000 ongoing.

Furthermore, the Office of Information Services has determined that the costs associated in establishing the ADEX examination as a pathway is minor and absorbable as relating with BreEZe.

**REGISTERED SUPPORT/OPPOSITION (As of 6/21/2016)**

**Support:**
American Board of Dental Examiners (Sponsor)
California Dental Association

**Opposition:**
None on file.

**BOARD POSITION**
The Board has taken a “WATCH” position on the bill. The Committee may consider recommending the Board take one of the following actions regarding this bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommends the Committee to take a “SUPPORT” position on this bill.
An act to amend Section 1632 of, and to add Sections 1632.55 and 1632.7 to, the Business and Professions Code, relating to dentistry, and making an appropriation therefor.

LEGISLATIVE COUNSEL’S DIGEST

AB 2331, as amended, Dababneh. Dentistry: applicants to practice. The Dental Practice Act provides for the licensure and regulation of dentists and associated professions by the Dental Board of California within the Department of Consumer Affairs. The act requires each applicant for a license to practice dentistry to successfully complete specified examinations, including receiving a passing score on either a portfolio examination, as specified, or a clinical and written examination administered by the Western Regional Examining Board, which determines the passing score for that examination.

This bill would additionally allow an applicant to satisfy that examination requirement by receiving a passing score on the Patient Centered Curriculum Integrated Dental Examination Format clinical and written examination developed by the American Board of Dental Examiners, Inc., subject to prior review and approval of the examination.
by the Office of Professional Examination Services, as provided, delivery of this review to the Dental Board of California, and payment of specified expenses incurred by the board.

Existing law authorizes the Director of Finance to accept on behalf of the state any gift of real or personal property whenever he or she deems the gift and the terms and conditions thereof to be in the best interest of the state. Existing law establishes the Special Deposit Fund, a continuously appropriated fund, which consists of money that is paid into it in trust pursuant to law when no other fund has been created to receive that money.

This bill would authorize the Director of Finance to accept funds for the purposes of reviewing and implementing the dental examination developed by the American Board of Dental Examiners, Inc., described above. Because these funds would be deposited in the Special Deposit Fund, a continuously appropriated fund, this bill would make an appropriation.

The people of the State of California do enact as follows:

SECTION 1. Section 1632 of the Business and Professions Code is amended to read:

1632. (a) The board shall require each applicant to successfully complete the Part I and Part II written examinations of the National Board Dental Examination of the Joint Commission on National Dental Examinations.

(b) The board shall require each applicant to successfully complete an examination in California law and ethics developed and administered by the board. The board shall provide a separate application for this examination. The board shall ensure that the law and ethics examination reflects current law and regulations, and ensure that the examinations are randomized. Applicants shall submit this application and required fee to the board in order to take this examination. In addition to the aforementioned application, the only other requirement for taking this examination shall be certification from the dean of the qualifying dental school attended by the applicant that the applicant has graduated, or will graduate, or is expected to graduate. Applicants who submit completed applications and certification from the dean at least 15
days prior to a scheduled examination shall be scheduled to take
the examination. Successful results of the examination shall, as
established by board regulation, remain valid for two years from
the date that the applicant is notified of having passed the
examination.

(c) Except as otherwise provided in Section 1632.5, the board
shall require each applicant to have taken and received a passing
score on one of the following:

(1) A portfolio examination of the applicant’s competence to
enter the practice of dentistry. This examination shall be conducted
while the applicant is enrolled in a dental school program at a
board-approved school located in California. This examination
shall utilize uniform standards of clinical experiences and
competencies, as approved by the board pursuant to Section 1632.1.
The applicant shall pass a final assessment of the submitted
portfolio at the end of his or her dental school program. Before
any portfolio assessment may be submitted to the board, the
applicant shall remit the required fee to the board to be deposited
into the State Dentistry Fund, and a letter of good standing signed
by the dean of his or her dental school or his or her delegate stating
that the applicant has graduated or will graduate with no pending
ethical issues.

(A) The portfolio examination shall not be conducted until the
board adopts regulations to carry out this paragraph. The board
shall post notice on its Internet Web site when these regulations
have been adopted.

(B) The board shall also provide written notice to the Legislature
and the Legislative Counsel when these regulations have been
adopted.

(2) Either one of the following examinations:

(A) A clinical and written examination administered by the
Western Regional Examining Board.

(B) The Patient Centered Curriculum Integrated Dental
Examination Format clinical and written examination developed
by the American Board of Dental Examiners, Inc.

(d) Notwithstanding subdivision (b) of Section 1628, the board
is authorized to do either of the following:

(1) Approve an application for examination from, and to
examine an applicant who is enrolled in, but has not yet graduated
from, a reputable dental school approved by the board.
(2) Accept the results of an examination described in paragraph (2) of subdivision (c) submitted by an applicant who was enrolled in, but had not graduated from, a reputable dental school approved by the board at the time the examination was administered. In either case, the board shall require the dean of that school or his or her delegate to furnish satisfactory proof that the applicant will graduate within one year of the date the examination was administered or as provided in paragraph (1) of subdivision (c).

(e) The board may determine the testing format, as related to patients, for the examination provided pursuant to subparagraph (B) of paragraph (2) of subdivision (c).

SEC. 2. Section 1632.55 is added to the Business and Professions Code, to read:

501632.55. (a) Prior to implementation of subparagraph (B) of paragraph (2) of subdivision (c) of Section 1632, the department’s Office of Professional Examination Services shall review the American Board of Dental Examiners, Inc. examination to ensure compliance with the requirements of Section 139 and to certify that the examination process meets those standards, and deliver this review to the Dental Board of California. If the department determines that the examination process fails to meet those standards, does not deliver the review to the Dental Board of California, or if the American Board of Dental Examiners, Inc. fails to pay the costs and expenses the board incurs, as described in subdivision (d), subparagraph (B) of paragraph (2) of subdivision (c) of Section 1632 shall not be implemented.

(b) The American Board of Dental Examiners, Inc. examination process shall be regularly reviewed by the department pursuant to Section 139.

(c) The American Board of Dental Examiners, Inc. examination shall meet the mandates of subdivision (a) of Section 12944 of the Government Code.

(d) The American Board of Dental Examiners, Inc. shall pay all reasonable costs and expenses the board incurs for the purposes of implementing this section.

(e) The American Board of Dental Examiners, Inc. examination may only be accepted for licensure by a candidate after it is determined that the examination has met the requirements of this section. Examinations taken prior to that date may not be used for licensure.
SEC. 3. Section 1632.7 is added to the Business and Professions Code, to read:

1632.7. The Department of Finance may accept funds pursuant to Sections 11005.1 and 16302 of the Government Code for the purposes of reviewing and implementing analyzing the examination developed by the American Board of Dental Examiners, Inc., as described in paragraph (2) of subdivision (e) of Section 1632.

Section 1632.55.
BILL NUMBER: Assembly Bill 2485
AUTHOR: Assembly Member Miguel Santiago
VERSION: Amended in Assembly 05/27/2016
BILL STATUS: 06/28/2016-Do pass and Re-referred to Com. On APPR.
BILL LOCATION: Senate Appropriations
SUBJECT: Dental Corps Loan Repayment Program
SPONSOR: California Dental Association
INTRODUCED: 2/19/2016

SUMMARY
Existing law establishes the Dental Corps Loan Repayment Program of 2002 within the Dental Board of California. Existing law creates the Dentally Underserved Account within the State Dentistry Fund. The program assists dentists who practice in an underserved area with loan repayment pursuant to an agreement between the board and the dentist, as specified.

This bill in amended form would propose the following:
• Allows those currently eligible for graduation from a pre-doctoral or post-doctoral dental education program and who meets all criteria for licensure to apply;
• Requests disclosure of any and all loan obligations;
• Requires applicant to sign an agreement to maintain qualified employment for 36 months continuously with an eligible practice setting;
• Requires applicant to provide annual progress report including the information as specified;
• Provides for priority consideration as specified for candidate selection;
• Specifies practice setting;
• Specifies full-time basis
• Provides the Board with authority to terminate for cause as specified;
• Provides that the Board grant $35,000 for loan repayment annually for three years not to exceed $105,000 or total amount of the loan, whichever is the lesser amount; and
• Disburses funds within 30 days from execution of a program agreement between the Board and the qualified lender selected by the recipient and subsequently requires the disbursement of year two and year three funds within 30 days of months 13 and 25 of the recipient’s participation in the program.

ANALYSIS
This bill in amended form essentially keeps the authority to implement this loan repayment program with the Dental Board of California while adjusting the language to provide for a broader applicant pool while maintaining the intent of the legislation when the loan repayment program was established.

The fiscal impact as a result of implementing this bill is minor and absorbable as this program is currently being administered by the Dental Board. There will be the need to update and amend regulations in order to comply with the proposed statutory language.

**REGISTERED SUPPORT/OPPOSITION**
To date, there is no registered support or opposition on file.

**BOARD POSITION**
The Board took a “WATCH” position during the March 2016 Board meeting. The Board may consider taking any one of the following actions regarding this bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommends that the Board take a “Support if Amended” position on this bill. The following should be amended:

- Delete the legislative intent language in Section 1.
- Delete the “five year term” from Business and Professions Code Section 1972 (a)
- Delete Subsections (g) and (h) from Code Section 1972 and keep original language from existing statute under Subsections (e) and (g) of Section 1972.
An act to repeal Article 9.5 (commencing with Section 1970) of Chapter 4 of Division 2 of the Business and Professions Code, and to amend Section 128345 of, and to add Article 7 (commencing with Section 128587) to Chapter 5 of Part 3 of Division 107 of, the Health and Safety Code, relating to dentistry. An act to amend Sections 1970, 1970.5, and 1973 of; to amend and repeal Section 1976 of; and to repeal and add Sections 1971, 1972, and 1975 of; the Business and Professions Code, relating to dentistry.

LEGISLATIVE COUNSEL'S DIGEST

AB 2485, as amended, Santiago. Dental Corps Loan Repayment Program.

Under the Dental Practice Act, the Dental Board of California is responsible for the licensure and regulation of dentists. Existing law establishes the Dental Corps Loan Repayment Program of 2002 to assist dentists who practice in an underserved area with loan repayment pursuant to an agreement between the board and the dentist, as specified. Existing law governs eligibility, application, selection, placement, and repayment for the program, and authorizes the board to adopt standards to implement the program relating to eligibility, placement, and termination. Existing law creates the Dentally
Underserved Account within the State Dentistry Fund and moneys in the account are continuously appropriated for purposes of the program.

This bill would require that the program be known as the California Dental Corps Loan Repayment Program and would revise program provisions regarding eligibility, application, selection, placement, and repayment. The bill would establish specific grounds for termination and would authorize the board to require the repayment of loans or grants in the case of termination. Among other new program requirements, applicants would be required to sign the agreement with the board under penalty of perjury and to provide annual progress reports, signed under penalty of perjury by both the applicant and employer, thereby imposing a state-mandated local program by creating new crimes.

The California Constitution requires the state to reimburse local agencies and school districts for certain costs mandated by the state. Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act for a specified reason.

Existing law establishes the Dental Corps Loan Repayment Program of 2002 within the Dental Board of California. Existing law creates the Dentally Underserved Account within the State Dentistry Fund. The program assists dentists who practice in an underserved area with loan repayment pursuant to an agreement between the board and the dentist, as specified.

This bill would repeal those provisions and instead transfer the authority to implement the program to the Health Professions Education Foundation within the Office of Statewide Health Planning and Development and would rename the account the Dental Corps Loan Repayment Account. The bill would make funds in the account available, upon appropriation by the Legislature, for purposes of the program. The bill would require the foundation to submit a report to the Dental Board of California and the Legislature by July 1, 2018. The bill would make related findings and declarations.

The people of the State of California do enact as follows:

SECTION 1. It is the intent of the Legislature that the changes made by this act are comprehensive, and that regulations do not need to be promulgated by the Dental Board of California to implement the changes made by this act.

SEC. 2. Section 1970 of the Business and Professions Code is amended to read:

1970. There is hereby established in the Dental Board of California the Dental Corps Loan Repayment Program of 2002, which shall become operative on January 1, 2003. This program shall be known and may be cited as the California Dental Corps Loan Repayment Program of 2002.

SEC. 3. Section 1970.5 of the Business and Professions Code is amended to read:

1970.5. It is the intent of this article that the Dental Board of California, in consultation with the Office of Statewide Health Planning and Development, the dental community, including ethnic representatives, dental schools, health advocates representing ethnic communities, primary care clinics, public hospitals and health systems, statewide agencies administering state and federally funded programs targeting underserved communities, and members of the public with health care issue area expertise shall develop and California implement the California Dental Corps Loan Repayment Program of 2002.

SEC. 4. Section 1971 of the Business and Professions Code is repealed.

1971. For the purposes of this article, the following terms have the following meanings:

(a) “Board” means the Dental Board of California.

(b) “Office” means the Office of Statewide Health Planning and Development.

(c) “Program” means the California Dental Corps Loan Repayment Program.

(d) “Dentally underserved area” means a geographic area eligible to be designated as having a shortage of dental professionals pursuant to Part I of Appendix B to Part 5 of Chapter I of Title 42 of the Code of Federal Regulations or an area of the state where unmet priority needs for dentists exist as determined by the
California Healthcare Workforce Policy Commission pursuant to Section 128224 of the Health and Safety Code.

(e) “Dentally underserved population” means persons without dental insurance and persons eligible for the Denti-Cal and Healthy Families Programs who are population groups described as having a shortage of dental care professionals in Part I of Appendix B to Part 5 of Chapter 1 of Title 42 of the Code of Federal Regulations.

(f) “Practice setting” means either of the following:

(1) A community clinic, as defined in subdivision (a) of Section 1204 and subdivision (e) of Section 1206 of the Health and Safety Code, a clinic owned or operated by a public hospital and health system, or a clinic owned and operated by a hospital that maintains the primary contract with a county government to fulfill the county’s role pursuant to Section 17000 of the Welfare and Institutions Code, which is located in a dentally underserved area and at least 50 percent of whose patients are from a dentally underserved population.

(2) A dental practice or dental corporation, as defined in Section 1800 of this code, located in a dentally underserved area and at least 50 percent of whose patients are from a dentally underserved population.

(g) “Medi-Cal threshold languages” means primary languages spoken by limited English proficient (LEP) population groups meeting a numeric threshold of 3,000, eligible LEP Medi-Cal beneficiaries residing in a county, 1,000 Medi-Cal eligible LEP beneficiaries residing in a single ZIP Code, or 1,500 LEP Medi-Cal beneficiaries residing in two contiguous ZIP Codes.

(h) “Fund” means the State Dentistry Fund.

(i) “Account” means the Dentally Underserved Account which is contained within the fund.

SEC. 5. Section 1971 is added to the Business and Professions Code, to read:

1971. As used in this article:

(a) “Account” means the Dentally Underserved Account established in Section 1973, which is contained within the fund.

(b) “Board” means the Dental Board of California.

(c) “Dentally underserved area” means a geographic area eligible to be designated as having a shortage of dental professionals pursuant to Part I of Appendix B to Part 5 of Chapter 1 of Title 42 of the Code of Federal Regulations or an area of the
state in which unmet priority needs for dentists exist as determined
by the California Healthcare Workforce Policy Commission
pursuant to Section 128224 of the Health and Safety Code.
(d) “Dentally underserved population” means persons without
dental insurance and persons eligible for Denti-Cal who are
population groups described as having a shortage of dental care
professionals in Part I of Appendix B to Part 5 of Chapter 1 of
Title 42 of the Code of Federal Regulations.
(e) “Fund” means the State Dentistry Fund.
(f) “Medi-Cal threshold languages” means primary languages
spoken by limited-English-proficient (LEP) population groups
meeting a numeric threshold of 3,000 eligible LEP Medi-Cal
beneficiaries residing in a county, 1,000 Medi-Cal eligible LEP
beneficiaries residing in a single ZIP Code, or 1,500 LEP Medi-Cal
beneficiaries residing in two contiguous ZIP Codes.
(g) “Office” means the Office of Statewide Health Planning
and Development.
(h) “Program” means the California Dental Corps Loan
Repayment Program.
(i) “Practice setting” means either of the following:

1. A community clinic, as defined in subdivision (a) of Section
1204 and subdivision (c) of Section 1206 of the Health and Safety
Code, a clinic owned or operated by a public hospital and health
system, or a clinic owned and operated by a hospital that maintains
the primary contract with a county government to fulfill the
county’s role pursuant to Section 17000 of the Welfare and
Institutions Code, which is located in a dentally underserved area
and at least 50 percent of whose patients are from a dentally
underserved population.

2. A dental practice or dental corporation, as defined in Section
1800, located in a dentally underserved area and at least 50
percent of whose patients are from a dentally underserved
population.

SEC. 6. Section 1972 of the Business and Professions Code is
repealed.
(a) Program applicants shall possess a current valid
license to practice dentistry in this state issued by the board
pursuant to Section 1626.
(b) The board, in accordance with Section 1970.5, shall develop
the guidelines for selection and placement of applicants.
(1) Guidelines shall provide priority consideration to applicants who are best suited to meet the cultural and linguistic needs and demands of dentally underserved populations and that meet one or more of the following criteria:

(A) Speak a Medi-Cal threshold language.
(B) Come from an economically disadvantaged background.
(C) Have received significant training in cultural and linguistically appropriate service delivery.
(D) Have worked with dentally underserved communities for at least three years.
(E) Recently received a license to practice dentistry.

(2) The guidelines shall include a process for determining the needs for dentist services identified by the practice setting. At a minimum, the practice setting shall meet the following criteria:

(A) The practice setting shall be located in a dentally underserved area.
(B) The practice setting shall ensure that the program participant serves a patient population that consists of at least 50 percent dentally underserved populations.

(3) Guidelines shall seek to place the most qualified applicants under this section in the areas with the greatest need.

(4) Guidelines shall include a factor ensuring geographic distribution of placements.

(e) Program applicants shall be working in or have a signed agreement with an eligible practice setting. The program participant shall have full-time status. Full-time status shall be defined by the board, and the board may establish exemptions to this requirement on a case-by-case basis.

(d) Program participants shall commit to a minimum of three years of service in a dentally underserved area. The board, in accordance with Section 1970.5, shall develop the process for determining the maximum length of an absence and the process for reinstatement. Loan repayment shall be deferred until the dentist is back to full-time status.

(e) The board, in accordance with Section 1970.5, shall develop the process if a dentist is not able to complete his or her three-year obligation.
(f) The board, in accordance with Section 1970.5, shall develop a process for outreach to potentially eligible applicants.
(g) The board may adopt any other standards of eligibility, placement and termination appropriate to achieve the aim of providing competent dental services in these approved practice settings.

SEC. 7. Section 1972 is added to the Business and Professions Code, to read:

1972. (a) (1) A program applicant shall possess a current valid license to practice dentistry in this state issued by the board pursuant to Section 1626 within the five years immediately prior to application for the program, or be currently eligible for graduation from a predoctoral or postdoctoral dental education program approved by the Commission on Dental Accreditation or the board and meet all criteria for licensure, subject to successful completion of applicable education and examination requirements.

(2) An applicant shall submit documentation detailing current loan obligations from any government or commercial lender obtained for purposes of financing tuition or fees at a dental school approved by the Commission on Dental Accreditation or the board. Documentation shall contain the applicant’s account number and the lender’s contact information, as well as current balance owing and monthly installment plan details, if applicable.

(3) An application shall include disclosure of any and all obligations for which the applicant has defaulted or been subject to a judgment lien within the last 10 years, and explanations for each default or judgment lien disclosed.

(4) An applicant, if selected to receive a repayment grant, shall sign an agreement with the board, under penalty of perjury, to maintain qualified employment for 36 months continuously, and that the qualified employment meets or will meet the minimum requirements of the program regarding practice setting, clinical hours worked, and population served.

(5) An applicant shall also agree to provide an annual progress report, signed under penalty of perjury by both the applicant and employer or employer’s designee. A progress report shall verify the practice setting’s qualified status, clinical hours worked by the applicant, number of patients treated, specific treatment rendered and its value, and patient’s payer source.

(b) The board, in selecting a participant for the program, shall give priority consideration to an applicant who is best suited to meet the cultural and linguistic needs and demands of dentally
underserved populations by demonstrating experience in one or more of the following areas:

(1) Speaks one or more Medi-Cal threshold languages.
(2) Comes from an economically disadvantaged background with economic, social, or other circumstances.
(3) Has worked in a health field in an underserved area or with an underserved population.
(4) Is a dentist specialist recognized by the American Dental Association or has met all eligibility requirements to graduate from a dental specialty residency program approved by the Commission on Dental Accreditation.
(5) Has completed an extramural program or rotation during dental school or postgraduate education in which the applicant provided services to a population that speaks any Medi-Cal threshold language.

(c) The practice setting shall meet one or both of the following criteria:

(1) The practice setting shall be located in a dentally underserved area.
(2) The practice setting shall ensure that the program participant serves a patient population that consists of at least 50 percent dentally underserved populations.

(d) A program applicant shall be working in, or have a signed agreement for future employment with, an eligible practice setting. The program participant shall be employed on a full-time basis. “Full-time basis” means 30 hours of clinical hands-on care per week, for no less than 45 weeks per year, except as provided for during customary holidays, personal or family illness, and vacation time as described in a separate employment agreement between the recipient and the practice setting. Upon 30-day notice to the board, the board shall grant an extended leave of absence period for serious illness, pregnancy, or other natural cause. The board may establish other exemptions to the minimum time requirements of this subdivision on a case-by-case basis.

(e) A program participant shall commit to a minimum of three years of service in one or more eligible practice settings. Loan repayment shall be deferred until the dentist is employed on a full-time basis.
(f) The board may coordinate with local and statewide trade and professional dental organizations, as well as educational institutions, for outreach to potentially eligible applicants.

g) The board may terminate the applicant’s participation in the program for cause. Cause for termination shall include the following:

(1) Recipient’s termination of full-time, qualified employment.

(2) Recipient’s failure to maintain his or her professional license in good standing.

(3) Recipient’s failure to comply with any other term or condition of this article.

(h) If the board terminates a recipient’s participation for cause at any time during the 36-month period of the program, the board may require the recipient to repay the total amount of loans or grants disbursed in their name plus 10 percent interest within a maximum period of seven years.

SEC. 8. Section 1973 of the Business and Professions Code is amended to read:

1973. (a) The Dentally Underserved Account is hereby created in the State Dentistry Fund.

(b) The sum of three million dollars ($3,000,000) is hereby authorized to be expended from the State Dentistry Fund on this program. These moneys are appropriated as follows:

(1) One million dollars ($1,000,000) shall be transferred from the State Dentistry Fund to the Dentally Underserved Account on July 1, 2003. Of this amount, sixty-five thousand dollars ($65,000) shall be used by the Dental Board of California in the 2003–04 fiscal year for operating expenses necessary to manage this program.

(2) One million dollars ($1,000,000) shall be transferred from the State Dentistry Fund to the Dentally Underserved Account on July 1, 2004. Of this amount, sixty-five thousand dollars ($65,000) shall be used by the Dental Board of California in the 2004–05 fiscal year for operating expenses necessary to manage this program.

(3) One million dollars ($1,000,000) shall be transferred from the State Dentistry Fund to the Dentally Underserved Account on July 1, 2005. Of this amount, sixty-five thousand dollars ($65,000) shall be used by the Dental Board of California board.
in the 2005–06 fiscal year for operating expenses necessary to
manage this program.
(c) Funds placed into the Dentally Underserved Account shall be used by the board to repay the loans per agreements made
with dentists.
(1) Funds paid out for loan repayment may have a funding match
from foundation or other private sources.
(2) Loan repayments may not exceed one hundred five
thousand dollars ($105,000) per individual licensed dentist.
(3) Loan repayments may not exceed the amount of the
educational loans incurred by the dentist applicant.
(d) Notwithstanding Section 11005 of the Government Code,
the board may seek and receive matching funds from foundations
and private sources to be placed into the Dentally Underserved
Account. The board also may contract with an exempt
foundation for the receipt of matching funds to be transferred to
the Dentally Underserved Account for use by this program.
(e) Funds in the Dentally Underserved Account appropriated in subdivision (b) or received pursuant to subdivision
d are continuously appropriated for the repayment of loans per
agreements made between the board and the dentists.
(f) On or after July 1, 2010, the board shall extend the California
Dental Corps Loan Repayment Program of 2002 and
distribute the money remaining in the account until all the moneys
in the account are expended. Regulations that were adopted by the
board for the purposes of the program shall apply.
SEC. 9. Section 1975 of the Business and Professions Code is
repealed.
1975. The terms of loan repayment granted under this article
shall be as follows:
(a) After a program participant has completed one year of
providing services as a dentist in a dentally underserved area, the
board shall provide up to twenty-five thousand dollars ($25,000)
for loan repayment:
(b) After a program participant has completed two consecutive
years of providing services as a dentist in a dentally underserved
area, the board shall provide up to an additional thirty-five thousand
dollars ($35,000) of loan repayment, for a total loan repayment of
up to sixty thousand dollars ($60,000).
(c) After a program participant has completed three consecutive years of providing services as a dentist in a dentally underserved area, the board shall provide up to a maximum of an additional forty-five thousand dollars ($45,000) of loan repayment, for a total loan repayment of up to one hundred five thousand dollars ($105,000).

SEC. 10. Section 1975 is added to the Business and Professions Code, to read:

> 1975. The terms of loan repayment granted under this article shall be as follows:
> (a) After a program participant has been selected by the board to provide services as a dentist in the program, the board shall provide thirty-five thousand dollars ($35,000) for loan repayment annually, for three years, to reach a total of one hundred five thousand dollars ($105,000), or the total amount of the loan, whichever is the lesser amount.
> (b) The initial disbursement of funds shall be made within 30 days from execution of a program agreement between the board and the recipient directly from the board to the qualified lender selected by the recipient, to be credited to the recipient’s account.
> (c) Subsequent disbursements in sums equal to the initial disbursement, but not equaling more than the total amount owed by the recipient, shall be made within 30 days of months 13 and 25 of the recipient’s participation in the program.

SEC. 11. Section 1976 of the Business and Professions Code is amended to read:

> 1976. (a) On January 1, 2003, applications from dentists for program participation may be submitted.
> (b) 1976. (a) The board shall report to the Legislature, no later than October 1, 2004, during its sunset review period, the experience of the program since its inception, an evaluation of its effectiveness in improving access to dental care for underserved populations, and recommendations for maintaining or expanding its operation. The report to the Legislature shall also include the following:
> (1) The number of the program participants.
> (2) The practice locations.
> (3) The amount expended for the program.
The information on annual performance reviews progress reports by practice settings and program participants.

(c) The board may promulgate emergency regulations to implement the program.

(b) The report to the Legislature pursuant to subdivision (a) shall be submitted in compliance with Section 9795 of the Government Code.

(c) Pursuant to Section 10231.5 of the Government Code, this section is repealed on January 1, 2021.

SEC. 12. No reimbursement is required by this act pursuant to Section 6 of Article XIII B of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.

SECTION 1. The Legislature hereby finds and declares all of the following:

(a) An adequate supply of dentists is critical to assuring the health and well being of California residents, particularly those who live in medically underserved areas.

(b) It is in the best interest of the state and its residents that dental services be provided throughout the state in a manner that can be effectively accessed by the residents of all communities.

(c) The Dental Board of California has established the California Dental Corps Loan Repayment Program of 2002 to improve access to dental care for underserved populations.

(d) The Health Professions Education Foundation, established in 1987, is the state’s only nonprofit foundation statutorily created to encourage persons from underserved communities to become health professionals and increase access to health providers in medically underserved areas.

(e) The foundation improves access to health care in underserved areas by providing scholarships, loan repayments, and programs to health professional students and graduates who are dedicated to providing direct patient care in those areas.

(f) It is the intent of the Legislature to move the California Dental Corps Loan Repayment Program of 2002 from the Dental
Board of California to the Health Professions Education Foundation
within the Office of Statewide Health Planning and Development.

SEC. 2. Article 9.5 (commencing with Section 1970) of Chapter
4 of Division 2 of the Business and Professions Code is repealed.
SEC. 3. Section 128345 of the Health and Safety Code is
amended to read:

128345. The Health Professions Education Foundation may
do any of the following:
(a) Solicit and receive funds from business, industry,
foundations, and other private or public sources for the purpose
of providing financial assistance in the form of scholarships or
loans to African American students, Native American students,
Hispanic American students, and other students from
underrepresented groups. These funds shall be expended by the
office after transfer to the Health Professions Education Fund,
created pursuant to Section 128355.
(b) Recommend to the director the disbursement of private
sector moneys deposited in the Health Professions Education Fund
to students from underrepresented groups accepted to or enrolled
in schools of medicine, dentistry, nursing, or other health
professions in the form of loans or scholarships.
(c) Recommend to the director a standard contractual agreement
to be signed by the director and any participating student, that
would require a period of obligated professional service in the
areas in California designated by the commission as deficient in
primary care services. The agreement shall include a clause
entitling the state to recover the funds awarded plus the maximum
allowable interest for failure to begin or complete the service
obligation.
(d) Develop criteria for evaluating the likelihood that applicants
for scholarships or loans would remain to practice their profession
in designated areas deficient in primary care services.
(e) Develop application forms, which shall be disseminated to
students from underrepresented groups interested in applying for
scholarships or loans.
(f) Encourage private sector institutions, including hospitals,
community clinics, and other health agencies to identify and
provide educational experiences to students from underrepresented
groups who are potential applicants to schools of medicine,
dentistry, nursing, or other health professions.
(g) Prepare and submit an annual report to the office documenting the amount of money solicited from the private sector, the number of scholarships and loans awarded, the enrollment levels of students from underrepresented groups in schools of medicine, dentistry, nursing, and other health professions, and the projected need for scholarships and loans in the future.

(h) Recommend to the director that a portion of the funds solicited from the private sector be used for the administrative requirements of the foundation.

(i) Implement the Steven M. Thompson Physician Corps Loan Repayment Program and the Volunteer Physician Program, as provided under Article 5 (commencing with Section 128550).

(j) Implement the California Dental Corps Loan Repayment Program, as provided under Article 7 (commencing with Section 128587) of Chapter 5 of Part 3 of Division 107.

SEC. 4. Article 7 (commencing with Section 128587) is added to Chapter 5 of Part 3 of Division 107 of the Health and Safety Code, to read:

Article 7. California Dental Corps Loan Repayment Program

128587. (a) There is hereby established the California Dental Corps Loan Repayment Program within the Health Professions Education Foundation within the Office of Statewide Health Planning and Development.

(b) It is the intent of the Legislature in enacting this article that the foundation and the office provide the ongoing program management for the program.

128587.2. For purposes of this article, the following definitions apply:

(a) "Account" means the Dentally Underserved Account, which is contained within the fund.

(b) "Board" means the Dental Board of California.

(c) "Dentally underserved area" means a geographic area eligible to be designated as having a shortage of dental professionals pursuant to Part I of Appendix B to Part 5 of Chapter 1 of Title 42 of the Code of Federal Regulations or an area of the state in which unmet priority needs for dentists exist as determined by the California Healthcare Workforce Policy Commission pursuant to Section 128224.
(d) “Dentally underserved population” means persons without
dental insurance and persons eligible for Denti-Cal who are
population groups described as having a shortage of dental care
professionals in Part I of Appendix B to Part 5 of Chapter 1 of
Title 42 of the Code of Federal Regulations.

(e) “Fund” means the State Dentistry Fund.

(f) “Medi-Cal threshold languages” means primary languages
spoken by limited English proficient (LEP) population groups
meeting a numeric threshold of 3,000, eligible LEP Medi-Cal
beneficiaries residing in a county, 1,000 Medi-Cal eligible LEP
beneficiaries residing in a single ZIP Code, or 1,500 LEP Medi-Cal
beneficiaries residing in two contiguous ZIP Codes.

(g) “Office” means the Office of Statewide Health Planning and
Development.

(h) “Program” means the California Dental Corps Loan
Repayment Program.

(i) “Practice setting” means either of the following:

(1) A community clinic, as defined in subdivision (a) of Section
1204 and subdivision (c) of Section 1206, a clinic owned or
operated by a public hospital and health system, or a clinic owned
and operated by a hospital that maintains the primary contract with
a county government to fulfill the county’s role pursuant to Section
17000 of the Welfare and Institutions Code, which is located in a
dentally underserved area.

(2) A dental practice or dental corporation, as defined in Section
1800 of the Business and Professions Code, located in a dentally
underserved area or at least 50 percent of whose patients are from
a dentally underserved population.

128587.4. (a) A program applicant shall possess a current
valid license to practice dentistry in this state issued by the board
pursuant to Section 1626 of the Business and Professions Code;
or be currently eligible for graduation from a pre- or postdoctoral
dental education program approved by the board or the
Commission on Dental Accreditation and meet all criteria for
licensure subject to successful completion of applicable education
and examination requirements.

(b) The foundation shall develop the guidelines for selection
and placement of applicants.

(I) The guidelines shall provide priority consideration to
applicants who are best suited to meet the cultural and linguistic
needs and demands of dentally underserved populations and who
meet one or more of the following criteria:
(A) Speak a Medi-Cal threshold language.
(B) Come from an economically disadvantaged background.
(C) Have received significant training in cultural and
linguistically appropriate service delivery.
(D) Have worked in a health field in an underserved area or
with an underserved population.
(E) Recently received a license to practice dentistry.
(F) Have received an offer for employment from a practice
setting.
(2) The guidelines shall include a process for determining the
needs for dental services identified by the practice setting. At a
minimum, the practice setting shall be located in a dentally
underserved area.
(3) The guidelines shall seek to place the most qualified
applicants under this section in the areas with the greatest need.
(e) A program applicant shall be working in, or have a signed
agreement with, an eligible practice setting. The program
participant shall be employed on a full-time basis. Full-time basis
shall be defined by the foundation, and the foundation may
establish exemptions to this requirement on a case-by-case basis.
(d) A program participant shall commit to a minimum of three
years of service in one or more practice settings. The foundation
shall develop the process for determining the maximum length of
an absence and the process for reinstatement of a participant. Loan
repayment shall be deferred until the dentist is employed on a
full-time basis.
(e) The foundation shall develop a process to use if a dentist is
not able to complete his or her three-year obligation.
(f) The foundation shall develop a process for outreach to
potentially eligible applicants.
(g) The foundation may adopt any other standards of eligibility,
placement, and termination appropriate to achieve the aim of
providing competent dental services in these approved practice
settings.
128587.6 (a) The Dentally Underserved Account, formerly
established pursuant to subdivision (a) of Section 1973 of the
Business and Professions Code, in the State Dentistry Fund in the
Professions and Vocations Fund in the State Treasury is hereby
renamed the Dental Corps Loan Repayment Account and established by this section in the State Dentistry Fund.

(b) (1) Funds placed in the account shall be available upon appropriation by the Legislature.

(2) Funds in the account shall be used by the foundation to repay the loans per agreements made with dentists.

(3) Funds paid out for loan repayment may have a funding match from foundations or other private sources.

(4) Loan repayments shall not exceed a total of one hundred five thousand dollars ($105,000) per individual licensed dentist.

(5) Notwithstanding Section 11005 of the Government Code, the foundation may seek and receive funds from foundations and private sources to be placed into the account.

128587.8. The terms of loan repayment granted under this article shall be as follows:

(a) After a program participant has completed six months of providing services on a full time basis in a practice setting, the foundation shall provide up to thirty-five thousand dollars ($35,000) for loan repayment.

(b) After a program participant has completed 18 consecutive months of providing services on a full-time basis in a practice setting, the foundation shall provide up to an additional thirty-five thousand dollars ($35,000) of loan repayment, for a total loan repayment of up to seventy thousand dollars ($70,000).

(c) After a program participant has completed 30 consecutive months of providing services on a full-time basis in a practice setting, the foundation shall provide up to a maximum of thirty-five thousand dollars ($35,000) of loan repayment, for a total loan repayment of up to one hundred five thousand dollars ($105,000), but not to exceed the total outstanding amount of the loan.

128587.9. (a) On or before July 1, 2018, the foundation shall submit a report to the board and the Legislature regarding the experience of the program, an evaluation of its effectiveness in improving access to dental care for underserved populations, and recommendations for maintaining or expanding its operation, including, but not limited to, all of the following:

(1) Number of program participants.

(2) Practice locations.

(3) Amount of funds expended.
(4) The information on annual performance reviews by practice settings and program participants.

(b) The report to the Legislature pursuant to subdivision (a) shall be submitted in compliance with Section 9795 of the Government Code.

(c) Pursuant to Section 10231.5 of the Government Code, this section is repealed on July 1, 2022.
SUMMARY
This bill would authorize any of the boards, bureaus, commissions, or programs within the Department of Consumer Affairs (DCA) to establish by regulations a system for a retired category of licensure for persons not actively engaged in the practice of their profession.

The retired licensee would not be able to engage in any activity for which a license is required unless the board by regulation specifies the criteria for a retired licensee to practice his or her profession or vocation.

This bill would also allow the holder of a retired license not to renew their license; and should a retired licensee want to restore his or her license to an active status then the holder of that license shall meet the specified requirements.

This bill would not apply to a board that has other statutory authority to establish a retired license.

ANALYSIS
This would authorize the Dental Board of California (Board) to create a retired license category which would allow a licensee to retire his/her license immediately in lieu of selecting the inactive status and electing to become delinquent in fees for five years in order for the license to be cancelled.

During the May 2016 Board meeting, concerns were raised regarding current use of the word “retired” and the proposed use of the word “retired.” The Board directed staff to communicate with the author’s office and as a result language was amended to excuse boards that have statutory authority to establish a retired license.

Should the Board proceed to establish a retired license category as specified by this proposed bill, the Board would need to promulgate regulations to differentiate between existing statutory provisions with that of the proposed bill in order to avoid confusion or misinterpretation between statutes; and to implement the proposed retired category.

Support:
California Board of Accountancy
Contractors State License Board

Opposition:
None on file.

BOARD POSITION
The Board has not taken a position on the bill, but did direct staff to communicate with the author to raise concerns regarding the usage of the word “retired”. The Committee may consider recommending the Board take one of the following actions regarding this bill:

- Support
- Oppose
- Oppose unless Amended
- Neutral
- Watch
- No Action

Staff recommends taking a “Support” position on this bill as it would provide the Board the ability to establish a license status for those who no longer want to practice dentistry nor renew their license.
An act to add Section 463 to the Business and Professions Code, relating to professions and vocations.

LEGISLATIVE COUNSEL'S DIGEST

AB 2859, as amended, Low. Professions and vocations: retired category: licenses.

Existing law provides for numerous boards, bureaus, commissions, or programs within the Department of Consumer Affairs that administer the licensing and regulation of various businesses and professions. Existing law authorizes any of the boards, bureaus, commissions, or programs within the department, except as specified, to establish by regulation a system for an inactive category of license for persons who are not actively engaged in the practice of their profession or vocation. Under existing law, the holder of an inactive license is prohibited from engaging in any activity for which a license is required. Existing law defines “board” for these purposes to include, unless expressly provided otherwise, a bureau, commission, committee, department, division, examining committee, program, and agency.

This bill would additionally authorize any of the boards, bureaus, commissions, or programs boards within the department to establish by regulation a system for a retired category of license for persons who are not actively engaged in the practice of their profession or vocation, and vocation. The bill would require that regulation to include specified provisions, including that a retired license be issued to a person with
either an active license or an inactive license that was not placed on inactive status for disciplinary reasons. The bill also would prohibit the holder of a retired license from engaging in any activity for which a license is required, unless regulation specifies the criteria for a retired licensee to practice his or her profession. The bill would authorize a board upon its own determination, and would require a board upon receipt of a complaint from any person, to investigate the actions of any licensee, including, among others, a person with a license that is retired or inactive. The bill would not apply to a board that has other statutory authority to establish a retired license.

The people of the State of California do enact as follows:

SECTION 1. Section 463 is added to the Business and Professions Code, to read:

463. (a) Any of the boards, bureaus, commissions, or programs boards within the department may establish, by regulation, a system for a retired category of licensure for persons who are not actively engaged in the practice of their profession or vocation.

(b) The regulation shall contain the following:

(1) A retired license shall be issued to a person with either an active license or an inactive license that was not placed on inactive status for disciplinary reasons.

(2) The holder of a retired license issued pursuant to this section shall not engage in any activity for which a license is required, unless the board, by regulation, specifies the criteria for a retired licensee to practice his or her profession or vocation.

(3) The holder of a retired license shall not be required to renew that license.

(4) In order for the holder of a retired license issued pursuant to this section to restore his or her license to an active status, the holder of that license shall meet all the following:

(A) Pay a fee established by statute or regulation.
(B) Certify, in a manner satisfactory to the board, that he or she has not committed an act or crime constituting grounds for denial of licensure.

(C) Comply with the fingerprint submission requirements established by regulation.

(D) If the board requires completion of continuing education for renewal of an active license, complete continuing education equivalent to that required for renewal of an active license, unless a different requirement is specified by the board.

(E) Complete any other requirements as specified by the board by regulation.

(c) A board may upon its own determination, and shall upon receipt of a complaint from any person, investigate the actions of any licensee, including a person with a license that either restricts or prohibits the practice of that person in his or her profession or vocation, including, but not limited to, a license that is retired, inactive, canceled, revoked, or suspended.

(d) Subdivisions (a) and (b) shall not apply to a board that has other statutory authority to establish a retired license.
SUMMARY
Existing law requires the Department of Justice to maintain the Controlled Substance Utilization Review and Evaluation System (CURES) for the electronic monitoring of the prescribing and dispensing of Schedule II, Schedule III, and Schedule IV controlled substances by all practitioners authorized to prescribe or dispense these controlled substances. Existing law requires dispensing pharmacies and clinics to report specified information for each prescription of a Schedule II, Schedule III, or Schedule IV controlled substance to the department.

In amended form this bill would require prescribers of Schedule II or Schedule III controlled substances to consult with the CURES database before prescribing controlled substance to patient for the first time and once every four months thereafter if the substance remains part of the patient's treatment. Also, it prohibits the prescriber in prescribing additional Schedule II or Schedule III controlled substances to a patient who already has an existing prescription until there is a legitimate need for it. Additionally, the bill would provide that a prescriber is not in violation of the proposed requirements if at any time the CURES database is suspended or not accessible or there is some form of inability to access the CURES database in a timely manner due to an emergency, when the substance is prescribed to a patient receiving hospice care or when administered to the patient or other circumstances as specified.

ANALYSIS
In amended form, this bill would require the prescribing licensee to consult with the CURES database every four months instead of annually, if the patient is continuing to take the prescribed controlled substance. This would create a burden on the prescribing
licensee; however this does not affect the Dental Board of California (Board). The potential impact of this bill upon the Board is the minor cost of notifying its licensees of the requirement to check the CURES System which is minor and absorbable.

BOARD POSITION
The Board has not taken a position on the bill. The Committee may consider recommending the Board take one of the following actions regarding this bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommends taking a “WATCH” position on this bill.
An act to amend Section 11165.1 of, and to add Section 11165.4 to, the Health and Safety Code, relating to controlled substances.

LEGISLATIVE COUNSEL'S DIGEST

SB 482, as amended, Lara. Controlled substances: CURES database. Existing law classifies certain controlled substances into designated schedules. Existing law requires the Department of Justice to maintain the Controlled Substance Utilization Review and Evaluation System (CURES) for the electronic monitoring of the prescribing and dispensing of Schedule II, Schedule III, and Schedule IV controlled substances by all practitioners authorized to prescribe or dispense these controlled substances. Existing law requires dispensing pharmacies and clinics to report specified information for each prescription of a Schedule II, Schedule III, or Schedule IV controlled substance to the department.

This bill would require a health care practitioner authorized to prescribe, order, administer, furnish, or dispense a controlled substance to consult the CURES database to review a patient's controlled substance history no earlier than 24 hours before prescribing a Schedule II, Schedule III, or Schedule IV controlled substance to the patient for the
first time and at least annually once every 4 months thereafter if the substance remains part of the treatment of the patient. The bill would exempt a veterinarian from this requirement. The bill would also exempt a health care practitioner from this requirement under specified circumstances, including, among others, if prescribing, ordering, administering, furnishing, or dispensing a controlled substance to a patient receiving hospice care, to a patient admitted to a specified facility, or to a patient as part of a treatment for a surgical procedure in a specified facility if the quantity of the controlled substance does not exceed a nonrefillable 5-day supply of the controlled substance that is to be used in accordance with the directions for use. The bill would exempt a health care practitioner from this requirement if it is not reasonably possible for him or her to access the information in the CURES database in a timely manner, another health care practitioner or designee authorized to access the CURES database is not reasonably available, and the quantity of controlled substance prescribed, ordered, administered, furnished, or dispensed does not exceed a nonrefillable 5-day supply of the controlled substance that is to be used in accordance with the directions for use and no refill of the controlled substance is allowed.

The bill would provide that a health care practitioner who knowingly fails to consult the CURES database is required to be referred to the appropriate state professional licensing board solely for administrative sanctions, as deemed appropriate by that board. The bill would make the above-mentioned provisions operative 6 months after the Department of Justice certifies that the CURES database is ready for statewide use.

The bill would also exempt a health care practitioner, pharmacist, and any person acting on behalf of a health care practitioner or pharmacist, when acting with reasonable care and in good faith, from civil or administrative liability arising from any false, incomplete, or inaccurate information submitted, to or reported by, the CURES database or for any resulting failure of the CURES database to accurately or timely report that information.

*The people of the State of California do enact as follows:*

1. **SECTION 1.** Section 11165.1 of the Health and Safety Code is amended to read:
11165.1. (a) (1) (A) (i) A health care practitioner authorized to prescribe, order, administer, furnish, or dispense Schedule II, Schedule III, or Schedule IV controlled substances pursuant to Section 11150 shall, before July 1, 2016, or upon receipt of a federal Drug Enforcement Administration (DEA) registration, whichever occurs later, submit an application developed by the Department of Justice to obtain approval to access information online regarding the controlled substance history of a patient that is stored on the Internet and maintained within the Department of Justice, and, upon approval, the department shall release to that practitioner the electronic history of controlled substances dispensed to an individual under his or her care based on data contained in the CURES Prescription Drug Monitoring Program (PDMP).

(ii) A pharmacist shall, before July 1, 2016, or upon licensure, whichever occurs later, submit an application developed by the Department of Justice to obtain approval to access information online regarding the controlled substance history of a patient that is stored on the Internet and maintained within the Department of Justice, and, upon approval, the department shall release to that pharmacist the electronic history of controlled substances dispensed to an individual under his or her care based on data contained in the CURES PDMP.

(B) An application may be denied, or a subscriber may be suspended, for reasons which include, but are not limited to, the following:

(i) Materially falsifying an application for a subscriber.

(ii) Failure to maintain effective controls for access to the patient activity report.

(iii) Suspended or revoked federal DEA registration.

(iv) Any subscriber who is arrested for a violation of law governing controlled substances or any other law for which the possession or use of a controlled substance is an element of the crime.

(v) Any subscriber accessing information for any other reason than caring for his or her patients.

(C) Any authorized subscriber shall notify the Department of Justice within 30 days of any changes to the subscriber account.

(2) A health care practitioner authorized to prescribe, order, administer, furnish, or dispense Schedule II, Schedule III, or
Schedule IV controlled substances pursuant to Section 11150 or a pharmacist shall be deemed to have complied with paragraph (1) if the licensed health care practitioner or pharmacist has been approved to access the CURES database through the process developed pursuant to subdivision (a) of Section 209 of the Business and Professions Code.

(b) Any request for, or release of, a controlled substance history pursuant to this section shall be made in accordance with guidelines developed by the Department of Justice.

(c) In order to prevent the inappropriate, improper, or illegal use of Schedule II, Schedule III, or Schedule IV controlled substances, the Department of Justice may initiate the referral of the history of controlled substances dispensed to an individual based on data contained in CURES to licensed health care practitioners, pharmacists, or both, providing care or services to the individual.

(d) The history of controlled substances dispensed to an individual based on data contained in CURES that is received by a practitioner or pharmacist from the Department of Justice pursuant to this section is medical information subject to the provisions of the Confidentiality of Medical Information Act contained in Part 2.6 (commencing with Section 56) of Division 1 of the Civil Code.

(e) Information concerning a patient’s controlled substance history provided to a prescriber or pharmacist pursuant to this section shall include prescriptions for controlled substances listed in Sections 1308.12, 1308.13, and 1308.14 of Title 21 of the Code of Federal Regulations.

(f) A health care practitioner, pharmacist, and any person acting on behalf of a health care practitioner or pharmacist, when acting with reasonable care and in good faith, is not subject to civil or administrative liability arising from any false, incomplete, or inaccurate information submitted to, or reported by, the CURES database or for any resulting failure of the CURES database to accurately or timely report that information.
controlled substance history before prescribing a Schedule II, Schedule III, or Schedule IV controlled substance to the patient for the first time and at least annually once every four months thereafter if the substance remains part of the treatment of the patient.

(B) For purposes of this paragraph, “first time” means the initial occurrence in which a health care practitioner, in his or her role as a health care practitioner, intends to prescribe, order, administer, furnish, or dispense a Schedule II, Schedule III, or Schedule IV controlled substance to a patient and has not previously prescribed a controlled substance to the patient.

(2) A health care practitioner shall obtain a patient’s controlled substance history from the CURES database no earlier than 24 hours before he or she prescribes, orders, administers, furnishes, or dispenses a Schedule II, Schedule III, or Schedule IV controlled substance to the patient.

(b) The duty to consult the CURES database, as described in subdivision (a), does not apply to veterinarians.

(c) The duty to consult the CURES database, as described in subdivision (a), does not apply to a health care practitioner in any of the following circumstances:

(1) If a health care practitioner prescribes, orders, or furnishes a controlled substance to be administered or dispensed to a patient while the patient is admitted to any of the following facilities or during an emergency transfer between any of the following facilities:

(A) A licensed clinic, as described in Chapter 1 (commencing with Section 1200) of Division 2.

(B) An outpatient setting, as described in Chapter 1.3 (commencing with Section 1248) of Division 2.

(C) A health facility, as described in Chapter 2 (commencing with Section 1250) of Division 2.

(D) A county medical facility, as described in Chapter 2.5 (commencing with Section 1440) of Division 2.

(2) When a health care practitioner prescribes, orders, administers, furnishes, or dispenses a controlled substance in the emergency department of a general acute care hospital if the quantity of the controlled substance does not exceed a 10-day seven-day supply of the controlled substance to be used in accordance with the directions for use.
(3) If a health care practitioner prescribes, orders, administers, furnishes, or dispenses a controlled substance to a patient as part of the patient’s treatment for a surgical procedure, if the quantity of the controlled substance does not exceed a nonrefillable five-day supply of the controlled substance to be used in accordance with the directions for use, in any of the following facilities:

(A) A licensed clinic, as described in Chapter 1 (commencing with Section 1200) of Division 2.
(B) An outpatient setting, as described in Chapter 1.3 (commencing with Section 1248) of Division 2.
(C) A health facility, as described in Chapter 2 (commencing with Section 1250) of Division 2.
(D) A county medical facility, as described in Chapter 2.5 (commencing with Section 1440) of Division 2.
(E) A place of practice, as defined in Section 1658 of the Business and Professions Code.

(4) If a health care practitioner prescribes, orders, administers, furnishes, or dispenses a controlled substance to a patient currently receiving hospice care, as defined in Section 1339.40.

(5) (A) If all of the following circumstances are satisfied:
(i) It is not reasonably possible for a health care practitioner to access the information in the CURES database in a timely manner.
(ii) Another health care practitioner or designee authorized to access the CURES database is not reasonably available.
(iii) The quantity of controlled substance prescribed, ordered, administered, furnished, or dispensed does not exceed a nonrefillable five-day supply of the controlled substance to be used in accordance with the directions for use and no refill of the controlled substance is allowed.
(B) A health care practitioner who does not consult the CURES database under subparagraph (A) shall document the reason he or she did not consult the database in the patient’s medical record.

(6) If the CURES database is not operational, as determined by the department, or when it cannot be accessed by a health care practitioner because of a temporary technological or electrical failure. A health care practitioner shall, without undue delay, seek to correct any cause of the temporary technological or electrical failure that is reasonably within his or her control.
(7) If the CURES database cannot be accessed because of technological limitations that are not reasonably within the control of a health care practitioner.

(8) If the CURES database cannot be accessed because of exceptional circumstances, as demonstrated by a health care practitioner.

(d) (1) A health care practitioner who knowingly fails to consult the CURES database, as described in subdivision (a), shall be referred to the appropriate state professional licensing board solely for administrative sanctions, as deemed appropriate by that board.

(2) This section does not create a private cause of action against a health care practitioner. This section does not limit a health care practitioner's liability for the negligent failure to diagnose or treat a patient.

(e) This section is not operative until six months after the Department of Justice certifies that the CURES database is ready for statewide use. The department shall notify the Secretary of State and the office of the Legislative Counsel of the date of that certification.

(f) All applicable state and federal privacy laws govern the duties required by this section.

(g) The provisions of this section are severable. If any provision of this section or its application is held invalid, that invalidity shall not affect other provisions or applications that can be given effect without the invalid provision or application.
This bill proposes to require the Department of Consumer Affairs to establish and maintain a program that grants one fee waiver for the application and issuance of a license to an individual who is an honorably discharged veteran who contains satisfactory evidence of his/her “Certificate of Release or Discharge from Active Duty” (DD Form 214). This waiver is not applicable to the following:

- Renewal of a license
- Application for and issuance of an additional license, certificate, registration or permit associated with the initial license
- Application for an examination
- An application of or a license issued to a business or other entity.

At this time it is unknown how many honorably discharged veterans would be applying for licensure with the Dental Board of California (Board) to determine what the potential impact would be should this bill be enacted. It would be too premature to state that the impact of this bill would be negligible and absorbable.

STAFF RECOMMENDATION
The Board took a “WATCH” position on this bill during the May 2016 Board meeting. The Committee may consider recommending the Board to take one of the following actions regarding this bill:

- Support
- Oppose
- Oppose if Amended
- Watch
- Neutral
- No Action

Staff recommends the Board maintain its “WATCH” position on this bill.
AN ACT TO ADD SECTION 114.6 TO THE BUSINESS AND PROFESSIONS CODE, RELATING TO PROFESSIONS AND VOCATIONS.

LEGISLATIVE COUNSEL'S DIGEST

SB 1155, as amended, Morrell. Professions and vocations: licenses: military service.

Existing law provides for the licensure and regulation of various professions and vocations by boards within the Department of Consumer Affairs. Existing law authorizes any licensee whose license expired while he or she was on active duty as a member of the California National Guard or the United States Armed Forces to reinstate his or her license without examination or penalty if certain requirements are met. Existing law also requires the boards to waive the renewal fees, continuing education requirements, and other renewal requirements, if applicable, of any licensee or registrant called to active duty as a member of the United States Armed Forces or the California National Guard, if certain requirements are met. Existing law requires each board to inquire in every application if the individual applying for licensure is serving in, or has previously served in, the military. Existing law, on and after July 1, 2016, requires a board within the Department of Consumer Affairs to expedite, and authorizes a board to assist, the initial licensure
process for an applicant who has served as an active duty member of the United States Armed Forces and was honorably discharged.

This bill, on and after January 1, 2018, would require every board within the Department of Consumer Affairs to grant a fee waiver for the application for and the issuance of an initial license to an individual who is an honorably discharged veteran. An applicant who supplies satisfactory evidence, as defined, to the board that the applicant has served as an active duty member of the California National Guard or the United States Armed Forces and was honorably discharged. The bill would require that a veteran be granted only one fee waiver, except as specified.

The people of the State of California do enact as follows:

SECTION 1. Section 114.6 is added to the Business and Professions Code, to read:

114.6. (a) (1) Notwithstanding any other provision of law, every board within the department shall grant a fee waiver for the application for and issuance of an initial license to an individual who is an honorably discharged veteran who served as an active duty member of the California National Guard or the United States Armed Forces. Under this program, all of the following apply:

(a) An applicant who supplies satisfactory evidence to the board that the applicant has served as an active duty member of the California National Guard or the United States Armed Forces and was honorably discharged.

(2) For purposes of this section, “satisfactory evidence” means a completed “Certificate of Release or Discharge from Active Duty” (DD Form 214).

(b) Under this program, all of the following apply:

(1) A veteran shall be granted only one fee waiver, except as specified in subdivision (b) paragraph (2). After a fee waiver has been issued by any board within the department pursuant to this section, the veteran is no longer eligible for a waiver.
If a board charges a fee for the application for a license and another fee for the issuance of a license, the veteran shall be granted fee waivers for both the application for and issuance of a license.

The fee waiver shall apply only to an application of and a license issued to an individual veteran and not to an application of or a license issued to an individual veteran on behalf of a business or other entity.

A waiver shall not be issued for any of the following:

(A) Renewal of a license.
(B) The application for and issuance of an additional license, a certificate, a registration, or a permit associated with the initial license.
(C) The application for an examination.

This section shall become operative on January 1, 2018.
SUMMARY
In amended form, this proposed bill would amend Business and Professions Code (Code) Section 114.5 by requiring, if the governing board authorizes veterans to apply military experience and training towards licensure requirements, to post information on its Internet Website advising veteran applicants about their ability to apply military experience and training towards licensure requirements.

ANALYSIS
This bill would not fiscally impact the Dental Board of California (Board), because the proposed bill would require the Dental Board to post on its Internet Website a statement advising veteran applicants of their ability to apply their military experience and training towards the licensure requirements.

In 2013, the legislature passed and the Governor signed AB 1057 (Medina) requiring licensing boards to ask on every application for licensure if the applicant is serving in or has previously served in the military.

Additionally, current law contains a provision where experience, knowledge, and skills obtained within the armed services should be permitted, if applicable, to apply to the requirements of the regulated profession. Current law requires boards to specify the method of implementation to meet the licensure requirements for the particular business, occupation, or profession regulated and requires boards to consult with the Department of Veteran Affairs and the Military Department before adopting the applicable rules and regulations as required by current law.

This bill intends to close the technical gap in the Code by ensuring veterans receive notification in writing when applying for licensure with boards that accept military experience and training towards their licensure requirements.

REGISTERED SUPPORT/OPPOSITION (As of 6/20/2016)
Support:
California Board of Accountancy

Opposition:
None on file.

BOARD POSITION
The Board took a "WATCH" position on this bill during the May 2016 Board meeting. The Committee may consider recommending the Board take one of the following actions regarding this bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommends taking a "SUPPORT" position on this bill, because it would ensure veterans receive notification that they are apply to apply their military experience and training towards their licensure requirements; and there would be no fiscal impact as a result of implementing the proposed language of the bill.
An act to amend Section 114.5 of the Business and Professions Code, relating to professions and vocations.

LEGISLATIVE COUNSEL’S DIGEST

SB 1348, as amended, Cannella. Licensure applications: military experience.

Existing law provides for the licensure and regulation of various professions and vocations by boards within the Department of Consumer Affairs. Existing law requires each board to inquire in every application for licensure if the individual applying for licensure is serving in, or has previously served in, the military.

This bill would require each board, with a governing law authorizing veterans to apply military experience and training towards licensure requirements, to modify their application for licensure to advise veteran applicants post information on the board’s Internet Web site about their the ability of veteran applicants to apply that their military experience and training towards licensure requirements.

The people of the State of California do enact as follows:

SEC. 1. Section 114.5 of the Business and Professions Code is amended to read:
114.5. (a) Each board shall inquire in every application for
licensure if the individual applying for licensure is serving in, or
has previously served in, the military.
(b) If a board’s governing law authorizes veterans to apply
military experience and training towards licensure requirements,
that board shall modify their application for licensure to advise
veteran applicants post information on the board’s Internet Web
site about their the ability of veteran applicants to apply military
experience and training towards licensure requirements.
SUMMARY
The Legislature through this bill finds and declares that in the last four years malware and hacking attacks have risen dramatically and account for a vast majority of the records that have been breached and have resulted in the greatest risk for massive disclosure of sensitive personal information.

This bill proposes to require state agencies that own or license computerized data that includes personal information to prepare a computerized personal information security plan that details the agency’s strategy to respond to a security breach of a computerized personal information and associated consequences caused by the such a disclosure.

The bill would require the computerized personal information security plan to include the following:

- A statement of purposes and objectives for the plan
- An inventory of the computerized personal information stored or transmitted by the agency
- Identification of resources necessary to implement the plan
- Identification of an incident response team tasked with mitigating and responding to a breach or an imminent threat of a breach
- Communication procedures with the incident response team, the agency and those outside of the agency in the event of a breach
- Policies for training the incident response team and the agency on implementation of this proposal
- Process to review and improve the plan

The amended bill would define “personal information” as consistent with Civil Code Sections 1798.3(a) and 1798.29(g).

ANALYSIS
This would require the Department of Consumer Affairs (DCA) to create an incident response team and implement a strategy to respond to a security breach. Under existing law, state agencies have a duty to protect personal information entrusted to their care from a data breach and this bill would require state agencies like DCA to develop a response team and a strategy in addressing such breaches should they occur. Since, the Dental Board and its licensees utilize BreEZe for day to day functions and processing of licensure and permitting applications, personal information is constantly utilized and inputted.

Though the bill does not require the Dental Board to create and implement a team and strategy, the actions to be taken by DCA as a result of this bill would impact the Dental Board.

REGISTERED SUPPORT/Opposition
To date, there is no registered support or opposition on file.

BOARD POSITION
The Board took a “WATCH” position on this bill during the May 2016 Board meeting. The Committee may consider recommending the Board take one of the following actions regarding this bill:

- Support
- Support if Amended
- Oppose
- Watch
- Neutral
- No Action

Staff recommends continuing to maintain the “WATCH” position on this bill, because it is still undetermined how it would affect the Board.
An act to add Section 1798.21.5 to the Civil Code, relating to personal information.

LEGISLATIVE COUNSEL'S DIGEST

SB 1444, as amended, Hertzberg. State government: computerized personal information security plans.

The Information Practices Act of 1977 requires an agency, as defined, to maintain in its records only that personal information, as defined, that is relevant and necessary to accomplish a purpose of the agency required or authorized by the California Constitution or statute or mandated by the federal government. That law requires each agency to establish appropriate and reasonable administrative, technical, and physical safeguards to ensure compliance with this law, to ensure the security and confidentiality of records, and to protect against anticipated threats or hazards to the security or integrity of the records that could result in any injury. Existing law requires an agency that owns or licenses computerized data that includes personal information to disclose a breach of the security of the system in the most expedient time possible and without unreasonable delay, as specified.

This bill would require an agency that owns or licenses computerized data that includes personal information to prepare a computerized personal information security plan that details the agency’s strategy to respond to a security breach of computerized personal information and
associated consequences caused by the disclosed personal information. The bill would make legislative findings and declarations in this regard.

The people of the State of California do enact as follows:

SECTION 1. The Legislature finds and declares all of the following:

(a) The Attorney General reported that since 2012, 657 data breaches of the kind affecting more than 500 Californians have exposed over 49 million records to fraudulent use.

(b) Malware and hacking attacks have risen dramatically in the past four years and account for a vast majority of the records that have been breached. These types of attacks present the greatest risk for massive disclosure of sensitive personal information, including, among others, social security numbers, driver’s licenses, and dates of birth.

(c) Numerous state agencies hold records of millions of Californians and present the potential for large breaches of personal information in the future.

(d) Information technology professionals consider data breaches to be inevitable for organizations of all sizes and recommend the development and regular updating of plans and procedures designed to detect and halt breaches, notify affected Californians, and mitigate the damage caused by the data breaches.

SEC. 2. Section 1798.21.5 is added to the Civil Code, to read:

1798.21.5. (a) An agency that owns or licenses computerized data that includes personal information shall prepare a computerized personal information security plan that details the agency’s strategy to respond to a security breach of computerized personal information and associated consequences caused by the disclosed personal information. A computerized personal information security plan shall include, but is not limited to, all of the following:

(1) A statement of the purpose and objectives for the plan.

(2) An inventory of the computerized personal information stored or transmitted by the agency.
(e) Identification of resources necessary to implement the plan.

(d) Identification of an incident response team tasked with mitigating and responding to a breach, or an imminent threat of a breach, to the security of computerized personal information.

(e) Procedures for communications within the incident response team and between the incident response team, other individuals within the agency, and individuals outside the agency that need to be notified in the event of a breach of the security of computerized personal information.

(f) Policies for training the incident response team and the agency on the implementation of the computerized personal information security plan, including, but not limited to, the use of practice drills.

(g) A process to review and improve the computerized personal information security plan.

(b) For purposes of this section, “personal information” includes information described in subdivision (a) of Section 1798.3 and subdivision (g) of Section 1798.29.
Bill Number: Senate Bill 1478
Author: Senate Committee of Business, Professions, and Economic Development
Sponsor: 
Introduced: 3/10/2016
Bill Status: 6/30 Ordered to third reading
Bill Location: Assembly
Subject: Healing Arts
Related Bills: 

Summary
This bill would delete the provision relating to the establishment of the Task Force on Culturally and Linguistically Competent Physicians and Dentists and its corresponding tasks.

Additionally, this bill amends Business and Professions Code (Code) Sections 1632(a) and 1634.1(d) to make a technical update to the name of a Board required national examination for licensure due to the integration of the two parts of the National Board Dental Examination that is due to become effective in 2017.

Analysis
The proposal to delete the provision relating to the Task Force on Culturally and Linguistically Competent Physicians and Dentists is a technical non-substantive change that would not impact the Dental Board, as this Task Force has not been active for some time.

Additionally, the amendment relating to the integration of the two parts of the National Board Dental Examination would be a technical non-substantive change in order to address the change that will take place in 2017 and as a result, it would not impact the Board.

Registered Support/Opposition
To date, there is no registered support or opposition on file.

Board Position
The Board took a “SUPPORT” position on the bill during the May 2016 Board meeting.
SENATE BILL

No. 1478

Introduced by Committee on Business, Professions and Economic Development (Senators Hill (Chair), Bates, Berryhill, Block, Galgiani, Hernandez, Jackson, Mendoza, and Wieckowski)

March 10, 2016

An act to amend Sections 1632, 1634.1, 2467, 4980.36, 4980.37, 4980.43, 4980.78, 4980.79, 4992.05, 4996.18, 4996.23, 4999.12, 4999.40, 4999.47, 4999.52, 4999.60, 4999.61, and 4999.120 of, to add Sections 4980.09 and 4999.12.5 to, to repeal Sections 852, 2029, 4980.40.5, and 4999.54 of, and to repeal Article 16 (commencing with Section 2380) of Chapter 5 of Division 2 of, the Business and Professions Code, relating to healing arts.

LEGISLATIVE COUNSEL’S DIGEST

SB 1478, as introduced, Committee on Business, Professions and Economic Development. Healing arts.

Existing law provides for the licensure and regulation of healing arts professions and vocations by boards within the Department of Consumer Affairs.

(1) Existing law establishes the Task Force on Culturally and Linguistically Competent Physicians and Dentists. Existing law requires the task force to develop recommendations for a continuing education program that includes language proficiency standards of foreign language to be acquired to meet linguistic competency, identify the key cultural elements necessary to meet cultural competency by physicians, dentists, and their offices and assess the need for voluntary certification standards and examinations for cultural and linguistic competency.

This bill would delete those provisions.

(2) The Dental Practice Act provides for the licensure and regulation of dentists by the Dental Board of California. Existing law requires
each applicant to, among other things, successfully complete the Part I and Part II written examinations of the National Board Dental Examination of the Joint Commission on National Dental Examinations.

This bill would instead require the applicant to successfully complete the written examination of the National Board Dental Examination of the Joint Commission on National Dental Examinations.

(3) The Medical Practice Act provides for the licensure and regulation of physicians and surgeons by the Medical Board of California.

Existing law requires the board to keep a copy of a complaint it receives regarding the poor quality of care rendered by a licensee for 10 years from the date the board receives the complaint, as provided.

This bill would delete that requirement.

Existing law creates the Bureau of Medical Statistics within the board. Under existing law, the purpose of the bureau is to provide the board with statistical information necessary to carry out their functions of licensing, medical education, medical quality, and enforcement.

This bill would abolish that bureau.

(4) Under existing law, the California Board of Podiatric Medicine is responsible for the certification and regulation of the practice of podiatric medicine. Existing law requires the board to annually elect one of its members to act as president and vice president.

This bill would instead require the board to elect from its members a president, a vice president, and a secretary.

(5) The Board of Behavioral Sciences is responsible for administering, among others, the Licensed Marriage and Family Therapist Act, the Clinical Social Worker Practice Act, and the Licensed Professional Clinical Counselor Act.

(A) Existing law, the Licensed Marriage and Family Therapist Act, provides for the regulation of the practice of marriage and family therapy by the Board of Behavioral Sciences. A violation of the act is a crime. Existing law requires the licensure of marriage and family therapists and the registration of marriage and family therapist interns. Under existing law, an “intern” is defined as an unlicensed person who has earned his or her master’s or doctoral degree qualifying him or her for licensure and is registered with the board. Existing law prohibits the abbreviation “MFTI” from being used in an advertisement unless the title “marriage and family therapist registered intern” appears in the advertisement.

Existing law, the Licensed Professional Clinical Counselor Act, provides for the regulation of the practice of professional clinical
counseling by the Board of Behavioral Sciences. Existing law requires
the licensure of professional clinical counselors and the registration of
professional clinical counselor interns. Under existing law, an “intern”
is defined as an unlicensed person who meets specified requirements
for registration and is registered with the board.

This bill, commencing January 1, 2018, would provide that certain
specified titles using the term “intern” or any reference to the term
“intern” in those acts shall be deemed to be a reference to an “associate,”
as specified. Because this bill would change the definition of a crime,
it would impose a state-mandated local program.

(B) The Licensed Marriage and Family Therapist Act generally
requires specified applicants for licensure and registration to meet certain
educational degree requirements, including having obtained that degree
from a school, college, or university that, among other things, is
accredited by a regional accrediting agency recognized by the United
States Department of Education.

This bill would authorize that accreditation to be by a regional or
national institutional accrediting agency recognized by the United States
Department of Education.

Under the Licensed Marriage and Family Therapist Act, a specified
doctoral or master’s degree approved by the Bureau for Private
Postsecondary and Vocational Education as of June 30, 2007, is
considered by the Board of Behavioral Sciences to meet the specified
licensure and registration requirements if the degree is conferred on or
before July 1, 2010. As an alternative, existing law requires the Board
of Behavioral Sciences to accept those doctoral or master’s degrees as
equivalent degrees if those degrees are conferred by educational
institutions accredited by specified associations.

This bill would delete those provisions.

(C) Under the Licensed Marriage and Family Therapist Act, an
applicant for licensure is required to complete experience related to the
practice of marriage and family therapy under the supervision of a
supervisor. Existing law requires applicants, trainees who are unlicensed
persons enrolled in an educational program to qualify for licensure, and
interns who are unlicensed persons who have completed an educational
program and is registered with the board to be at all times under the
supervision of a supervisor. Existing law requires interns and trainees
to only gain supervised experience as an employee or volunteer and
prohibits experience from being gained as an independent contractor.
Similarly, the Licensed Professional Clinical Counselor Act requires
clinical counselor trainees, interns, and applicants to perform services
only as an employee or as a volunteer. The Licensed Professional
Clinical Counselor Act prohibits gaining mental health experience by
interns or trainees as an independent contractor.

The Clinical Social Worker Practice Act requires applicants to
complete supervised experience related to the practice of clinical social
work.

This bill would prohibit these persons from being employed as
independent contractors and from gaining experience for work
performed as an independent contractor reported on a specified tax
form.

(D) The Licensed Professional Clinical Counselor Act defines the
term “accredited” for the purposes of the act to mean a school, college,
or university accredited by the Western Association of Schools and
Colleges, or its equivalent regional accrediting association. The act
requires each educational institution preparing applicants to qualify for
licensure to notify each of its students in writing that its degree program
is designed to meet specified examination eligibility or registration
requirements and to certify to the Board of Behavioral Sciences that it
has provided that notice.

This bill would re-define “accredited” to mean a school, college, or
university accredited by a regional or national institutional accrediting
agency that is recognized by the United States Department of Education.
The bill would additionally require an applicant for registration or
licensure to submit to the Board of Behavioral Sciences a certification
from the applicant’s educational institution specifying that the
curriculum and coursework complies with those examination eligibility
or registration requirements.

(6) This bill would additionally delete various obsolete provisions,
make conforming changes, and make other nonsubstantive changes.

(7) The California Constitution requires the state to reimburse local
agencies and school districts for certain costs mandated by the state.
Statutory provisions establish procedures for making that reimbursement.

This bill would provide that no reimbursement is required by this act
for a specified reason.

State-mandated local program: yes.
The people of the State of California do enact as follows:

SECTION 1. Section 852 of the Business and Professions Code is repealed.

852. (a) The Task Force on Culturally and Linguistically Competent Physicians and Dentists is hereby created and shall consist of the following members:

(1) The State Director of Health Services and the Director of Consumer Affairs, who shall serve as cochairs of the task force.

(2) The Executive Director of the Medical Board of California.

(3) The Executive Director of the Dental Board of California.

(4) One member appointed by the Senate Committee on Rules.

(5) One member appointed by the Speaker of the Assembly.

(b) Additional task force members shall be appointed by the Director of Consumer Affairs, in consultation with the State Director of Health Services, as follows:

(1) Representatives of organizations that advocate on behalf of California licensed physicians and dentists.

(2) California licensed physicians and dentists that provide health services to members of language and ethnic minority groups.

(3) Representatives of organizations that advocate on behalf of, or provide health services to, members of language and ethnic minority groups.

(4) Representatives of entities that offer continuing education for physicians and dentists.

(5) Representatives of California’s medical and dental schools.

(6) Individuals with experience in developing, implementing, monitoring, and evaluating cultural and linguistic programs.

(c) The duties of the task force shall include the following:

(1) Developing recommendations for a continuing education program that includes language proficiency standards of foreign language to be acquired to meet linguistic competency.

(2) Identifying the key cultural elements necessary to meet cultural competency by physicians, dentists, and their offices.

(3) Assessing the need for voluntary certification standards and examinations for cultural and linguistic competency.

(d) The task force shall hold hearings and convene meetings to obtain input from persons belonging to language and ethnic minority groups to determine their needs and preferences for having culturally competent medical providers. These hearings and
meetings shall be convened in communities that have large populations of language and ethnic minority groups.

(e) The task force shall report its findings to the Legislature and appropriate licensing boards within two years after creation of the task force.

(f) The Medical Board of California and the Dental Board of California shall pay the state administrative costs of implementing this section.

(g) Nothing in this section shall be construed to require mandatory continuing education of physicians and dentists.

SEC. 2. Section 1632 of the Business and Professions Code is amended to read:

1632. (a) The board shall require each applicant to successfully complete the Part I and Part II written examinations of the National Board Dental Examination of the Joint Commission on National Dental Examinations.

(b) The board shall require each applicant to successfully complete an examination in California law and ethics developed and administered by the board. The board shall provide a separate application for this examination. The board shall ensure that the law and ethics examination reflects current law and regulations, and ensure that the examinations are randomized. Applicants shall submit this application and required fee to the board in order to take this examination. In addition to the aforementioned application, the only other requirement for taking this examination shall be certification from the dean of the qualifying dental school attended by the applicant that the applicant has graduated, or will graduate, or is expected to graduate. Applicants who submit completed applications and certification from the dean at least 15 days prior to a scheduled examination shall be scheduled to take the examination. Successful results of the examination shall, as established by board regulation, remain valid for two years from the date that the applicant is notified of having passed the examination.

(c) Except as otherwise provided in Section 1632.5, the board shall require each applicant to have taken and received a passing score on one of the following:

1. A portfolio examination of the applicant’s competence to enter the practice of dentistry. This examination shall be conducted while the applicant is enrolled in a dental school program at a...
board-approved school located in California. This examination shall utilize uniform standards of clinical experiences and competencies, as approved by the board pursuant to Section 1632.1.

The applicant shall pass a final assessment of the submitted portfolio at the end of his or her dental school program. Before any portfolio assessment may be submitted to the board, the applicant shall remit the required fee to the board to be deposited into the State Dentistry Fund, and a letter of good standing signed by the dean of his or her dental school or his or her delegate stating that the applicant has graduated or will graduate with no pending ethical issues.

(A) The portfolio examination shall not be conducted until the board adopts regulations to carry out this paragraph. The board shall post notice on its Internet Web site when these regulations have been adopted.

(B) The board shall also provide written notice to the Legislature and the Legislative Counsel when these regulations have been adopted.

(2) A clinical and written examination administered by the Western Regional Examining Board, which board shall determine the passing score for that examination.

(d) Notwithstanding subdivision (b) of Section 1628, the board is authorized to do either of the following:

(1) Approve an application for examination from, and to examine an applicant who is enrolled in, but has not yet graduated from, a reputable dental school approved by the board.

(2) Accept the results of an examination described in paragraph (2) of subdivision (c) submitted by an applicant who was enrolled in, but had not graduated from, a reputable dental school approved by the board at the time the examination was administered.

In either case, the board shall require the dean of that school or his or her delegate to furnish satisfactory proof that the applicant will graduate within one year of the date the examination was administered or as provided in paragraph (1) of subdivision (c).

SEC. 3. Section 1634.1 of the Business and Professions Code is amended to read:

1634.1. Notwithstanding Section 1634, the board may grant a license to practice dentistry to an applicant who submits all of the following to the board:
(a) A completed application form and all fees required by the
board.
(b) Satisfactory evidence of having graduated from a dental
school approved by the board or by the Commission on Dental
Accreditation of the American Dental Association.
(c) Satisfactory evidence of having completed a clinically based
advanced education program in general dentistry or an advanced
education program in general practice residency that is, at
minimum, one year in duration and is accredited by either the
Commission on Dental Accreditation of the American Dental
Association or a national accrediting body approved by the board.
The advanced education program shall include a certification of
clinical residency program completion approved by the board, to
be completed upon the resident’s successful completion of the
program in order to evaluate his or her competence to practice
dentistry in the state.
(d) Satisfactory evidence of having successfully completed the
written examination of the National Board Dental
Examination of the Joint Commission on National Dental
Examinations.
(e) Satisfactory evidence of having successfully completed an
examination in California law and ethics.
(f) Proof that the applicant has not failed the examination for
licensure to practice dentistry under this chapter within five years
prior to the date of his or her application for a license under this
chapter.
SEC. 4. Section 2029 of the Business and Professions Code is
repealed.
2029. The board shall keep a copy of a complaint it receives
regarding the poor quality of care rendered by a licensee for 10
years from the date the board receives the complaint. For retrieval
purposes, these complaints shall be filed by the licensee’s name
and license number.
SEC. 5. Article 16 (commencing with Section 2380) of Chapter
5 of Division 2 of the Business and Professions Code is repealed.
SEC. 6. Section 2467 of the Business and Professions Code is
amended to read:
2467. (a) The board may convene from time to time as it deems
necessary.
(b) Four members of the board constitute a quorum for the
transaction of business at any meeting.
(c) It shall require the affirmative vote of a majority of those
members present at a meeting, those members constituting at least
a quorum, to pass any motion, resolution, or measure.
(d) The board shall annually elect one of its members to
act as president and a member to act as a president, a vice president,
and a secretary who shall hold their respective positions
at the pleasure of the board. The president may call meetings of
the board and any duly appointed committee at a specified time
and place.

SEC. 7. Section 4980.09 is added to the Business and
Professions Code, to read:

4980.09. (a) The title “marriage and family therapist intern”
or “marriage and family therapist registered intern” is hereby
renamed “associate marriage and family therapist” or “registered
associate marriage and family therapist,” respectively. Any
reference in statute or regulation to a “marriage and family therapist
intern” or “marriage and family therapist registered intern” shall
be deemed a reference to an “associate marriage and family
therapist” or “registered associate marriage and family therapist.”
(b) Nothing in this section shall be construed to expand or
constrict the scope of practice of a person licensed or registered
pursuant to this chapter.
(c) This section shall become operative January 1, 2018.

SEC. 8. Section 4980.36 of the Business and Professions Code
is amended to read:

4980.36. (a) This section shall apply to the following:
(1) Applicants for licensure or registration who begin graduate
study before August 1, 2012, and do not complete that study on
or before December 31, 2018.
(2) Applicants for licensure or registration who begin graduate
study before August 1, 2012, and who graduate from a degree
program that meets the requirements of this section.
(3) Applicants for licensure or registration who begin graduate
study on or after August 1, 2012.
(b) To qualify for a license or registration, applicants shall
possess a doctoral or master’s degree meeting the requirements of
this section in marriage, family, and child counseling, marriage
and family therapy, couple and family therapy, psychology, clinical
psychology, counseling psychology, or counseling with an
emphasis in either marriage, family, and child counseling or
marriage and family therapy, obtained from a school, college, or
university approved by the Bureau for Private Postsecondary
Education, or accredited by either the Commission on Accreditation
for Marriage and Family Therapy Education, or a regional or
national institutional accrediting agency that is recognized by the
United States Department of Education. The board has the authority
to make the final determination as to whether a degree meets all
requirements, including, but not limited to, course requirements,
regardless of accreditation or approval.

(c) A doctoral or master’s degree program that qualifies for
licensure or registration shall do the following:
(1) Integrate all of the following throughout its curriculum:
(A) Marriage and family therapy principles.
(B) The principles of mental health recovery-oriented care and
methods of service delivery in recovery-oriented practice
environments, among others.
(C) An understanding of various cultures and the social and
psychological implications of socioeconomic position, and an
understanding of how poverty and social stress impact an
individual’s mental health and recovery.
(2) Allow for innovation and individuality in the education of
marriage and family therapists.
(3) Encourage students to develop the personal qualities that
are intimately related to effective practice, including, but not
limited to, integrity, sensitivity, flexibility, insight, compassion,
and personal presence.
(4) Permit an emphasis or specialization that may address any
one or more of the unique and complex array of human problems,
symptoms, and needs of Californians served by marriage and
family therapists.
(5) Provide students with the opportunity to meet with various
consumers and family members of consumers of mental health
services to enhance understanding of their experience of mental
illness, treatment, and recovery.
(d) The degree described in subdivision (b) shall contain no less
than 60 semester or 90 quarter units of instruction that includes,
but is not limited to, the following requirements:
(1) Both of the following:
(A) No less than 12 semester or 18 quarter units of coursework in theories, principles, and methods of a variety of psychotherapeutic orientations directly related to marriage and family therapy and marital and family systems approaches to treatment and how these theories can be applied therapeutically with individuals, couples, families, adults, including elder adults, children, adolescents, and groups to improve, restore, or maintain healthy relationships.

(B) Practicum that involves direct client contact, as follows:

(i) A minimum of six semester or nine quarter units of practicum in a supervised clinical placement that provides supervised fieldwork experience.

(ii) A minimum of 150 hours of face-to-face experience counseling individuals, couples, families, or groups.

(iii) A student must be enrolled in a practicum course while counseling clients, except as specified in subdivision (c) of Section 4980.42.

(iv) The practicum shall provide training in all of the following areas:

(I) Applied use of theory and psychotherapeutic techniques.

(II) Assessment, diagnosis, and prognosis.

(III) Treatment of individuals and premarital, couple, family, and child relationships, including trauma and abuse, dysfunctions, healthy functioning, health promotion, illness prevention, and working with families.

(IV) Professional writing, including documentation of services, treatment plans, and progress notes.

(V) How to connect people with resources that deliver the quality of services and support needed in the community.

(v) Educational institutions are encouraged to design the practicum required by this subparagraph to include marriage and family therapy experience in low income and multicultural mental health settings.

(vi) In addition to the 150 hours required in clause (ii), 75 hours of either of the following, or a combination thereof:

(I) Client centered advocacy, as defined in Section 4980.03.

(II) Face-to-face experience counseling individuals, couples, families, or groups.

(2) Instruction in all of the following:
(A) Diagnosis, assessment, prognosis, and treatment of mental disorders, including severe mental disorders, evidence-based practices, psychological testing, psychopharmacology, and promising mental health practices that are evaluated in peer reviewed literature.

(B) Developmental issues from infancy to old age, including instruction in all of the following areas:

(i) The effects of developmental issues on individuals, couples, and family relationships.

(ii) The psychological, psychotherapeutic, and health implications of developmental issues and their effects.

(iii) Aging and its biological, social, cognitive, and psychological aspects. This coursework shall include instruction on the assessment and reporting of, as well as treatment related to, elder and dependent adult abuse and neglect.

(iv) A variety of cultural understandings of human development.

(v) The understanding of human behavior within the social context of socioeconomic status and other contextual issues affecting social position.

(vi) The understanding of human behavior within the social context of a representative variety of the cultures found within California.

(vii) The understanding of the impact that personal and social insecurity, social stress, low educational levels, inadequate housing, and malnutrition have on human development.

(C) The broad range of matters and life events that may arise within marriage and family relationships and within a variety of California cultures, including instruction in all of the following:

(i) A minimum of seven contact hours of training or coursework in child abuse assessment and reporting as specified in Section 28, and any regulations promulgated thereunder.

(ii) Spousal or partner abuse assessment, detection, intervention strategies, and same gender abuse dynamics.

(iii) Cultural factors relevant to abuse of partners and family members.

(iv) Childbirth, child rearing, parenting, and stepparenting.

(v) Marriage, divorce, and blended families.

(vi) Long-term care.

(vii) End of life and grief.

(viii) Poverty and deprivation.
(ix) Financial and social stress.

(x) Effects of trauma.

(xi) The psychological, psychotherapeutic, community, and health implications of the matters and life events described in clauses (i) to (x), inclusive.

(D) Cultural competency and sensitivity, including a familiarity with the racial, cultural, linguistic, and ethnic backgrounds of persons living in California.

(E) Multicultural development and cross-cultural interaction, including experiences of race, ethnicity, class, spirituality, sexual orientation, gender, and disability, and their incorporation into the psychotherapeutic process.

(F) The effects of socioeconomic status on treatment and available resources.

(G) Resilience, including the personal and community qualities that enable persons to cope with adversity, trauma, tragedy, threats, or other stresses.

(H) Human sexuality, including the study of physiological, psychological, and social cultural variables associated with sexual behavior and gender identity, and the assessment and treatment of psychosexual dysfunction.

(I) Substance use disorders, co-occurring disorders, and addiction, including, but not limited to, instruction in all of the following:

(i) The definition of substance use disorders, co-occurring disorders, and addiction. For purposes of this subparagraph, “co-occurring disorders” means a mental illness and substance abuse diagnosis occurring simultaneously in an individual.

(ii) Medical aspects of substance use disorders and co-occurring disorders.

(iii) The effects of psychoactive drug use.

(iv) Current theories of the etiology of substance abuse and addiction.

(v) The role of persons and systems that support or compound substance abuse and addiction.

(vi) Major approaches to identification, evaluation, and treatment of substance use disorders, co-occurring disorders, and addiction, including, but not limited to, best practices.

(vii) Legal aspects of substance abuse.
(viii) Populations at risk with regard to substance use disorders and co-occurring disorders.
(ix) Community resources offering screening, assessment, treatment, and followup for the affected person and family.
(x) Recognition of substance use disorders, co-occurring disorders, and addiction, and appropriate referral.
(xi) The prevention of substance use disorders and addiction.
(J) California law and professional ethics for marriage and family therapists, including instruction in all of the following areas of study:
(i) Contemporary professional ethics and statutory, regulatory, and decisional laws that delineate the scope of practice of marriage and family therapy.
(ii) The therapeutic, clinical, and practical considerations involved in the legal and ethical practice of marriage and family therapy, including, but not limited to, family law.
(iii) The current legal patterns and trends in the mental health professions.
(iv) The psychotherapist-patient privilege, confidentiality, the patient dangerous to self or others, and the treatment of minors with and without parental consent.
(v) A recognition and exploration of the relationship between a practitioner’s sense of self and human values and his or her professional behavior and ethics.
(vi) Differences in legal and ethical standards for different types of work settings.
(vii) Licensing law and licensing process.
(e) The degree described in subdivision (b) shall, in addition to meeting the requirements of subdivision (d), include instruction in case management, systems of care for the severely mentally ill, public and private services and supports available for the severely mentally ill, community resources for persons with mental illness and for victims of abuse, disaster and trauma response, advocacy for the severely mentally ill, and collaborative treatment. This instruction may be provided either in credit level coursework or through extension programs offered by the degree-granting institution.
(f) The changes made to law by this section are intended to improve the educational qualifications for licensure in order to better prepare future licentiates for practice, and are not intended
to expand or restrict the scope of practice for marriage and family therapists.

SEC. 9. Section 4980.37 of the Business and Professions Code is amended to read:

4980.37. (a) This section shall apply to applicants for licensure or registration who begin graduate study before August 1, 2012, and complete that study on or before December 31, 2018. Those applicants may alternatively qualify under paragraph (2) of subdivision (a) of Section 4980.36.

(b) To qualify for a license or registration, applicants shall possess a doctor’s or master’s degree in marriage, family, and child counseling, marriage and family therapy, couple and family therapy, psychology, clinical psychology, counseling psychology, or counseling with an emphasis in either marriage, family, and child counseling or marriage and family therapy, obtained from a school, college, or university accredited by a regional or national institutional accrediting agency that is recognized by the United States Department of Education or approved by the Bureau for Private Postsecondary Education. The board has the authority to make the final determination as to whether a degree meets all requirements, including, but not limited to, course requirements, regardless of accreditation or approval. In order to qualify for licensure pursuant to this section, a doctor’s or master’s degree program shall be a single, integrated program primarily designed to train marriage and family therapists and shall contain no less than 48 semester or 72 quarter units of instruction. This instruction shall include no less than 12 semester units or 18 quarter units of coursework in the areas of marriage, family, and child counseling, and marital and family systems approaches to treatment. The coursework shall include all of the following areas:

1. The salient theories of a variety of psychotherapeutic orientations directly related to marriage and family therapy, and marital and family systems approaches to treatment.

2. Theories of marriage and family therapy and how they can be utilized in order to intervene therapeutically with couples, families, adults, children, and groups.

3. Developmental issues and life events from infancy to old age and their effect on individuals, couples, and family relationships. This may include coursework that focuses on specific family life events and the psychological, psychotherapeutic, and
health implications that arise within couples and families, including, but not limited to, childbirth, child rearing, childhood, adolescence, adulthood, marriage, divorce, blended families, stepparenting, abuse and neglect of older and dependent adults, and geropsychology.

(4) A variety of approaches to the treatment of children.

The board shall, by regulation, set forth the subjects of instruction required in this subdivision.

(c) (1) In addition to the 12 semester or 18 quarter units of coursework specified in subdivision (b), the doctor’s or master’s degree program shall contain not less than six semester or nine quarter units of supervised practicum in applied psychotherapeutic technique, assessments, diagnosis, prognosis, and treatment of premarital, couple, family, and child relationships, including dysfunctions, healthy functioning, health promotion, and illness prevention, in a supervised clinical placement that provides supervised fieldwork experience within the scope of practice of a marriage and family therapist.

(2) For applicants who enrolled in a degree program on or after January 1, 1995, the practicum shall include a minimum of 150 hours of face-to-face experience counseling individuals, couples, families, or groups.

(3) The practicum hours shall be considered as part of the 48 semester or 72 quarter unit requirement.

(d) As an alternative to meeting the qualifications specified in subdivision (b), the board shall accept as equivalent degrees those master’s or doctor’s degrees granted by educational institutions whose degree program is approved by the Commission on Accreditation for Marriage and Family Therapy Education.

(e) In order to provide an integrated course of study and appropriate professional training, while allowing for innovation and individuality in the education of marriage and family therapists, a degree program that meets the educational qualifications for licensure or registration under this section shall do all of the following:

(1) Provide an integrated course of study that trains students generally in the diagnosis, assessment, prognosis, and treatment of mental disorders.

(2) Prepare students to be familiar with the broad range of matters that may arise within marriage and family relationships.
(3) Train students specifically in the application of marriage and family relationship counseling principles and methods.

(4) Encourage students to develop those personal qualities that are intimately related to the counseling situation such as integrity, sensitivity, flexibility, insight, compassion, and personal presence.

(5) Teach students a variety of effective psychotherapeutic techniques and modalities that may be utilized to improve, restore, or maintain healthy individual, couple, and family relationships.

(6) Permit an emphasis or specialization that may address any one or more of the unique and complex array of human problems, symptoms, and needs of Californians served by marriage and family therapists.

(7) Prepare students to be familiar with cross-cultural mores and values, including a familiarity with the wide range of racial and ethnic backgrounds common among California’s population, including, but not limited to, Blacks, Hispanics, Asians, and Native Americans.

(f) Educational institutions are encouraged to design the practicum required by this section to include marriage and family therapy experience in low income and multicultural mental health settings.

(g) This section shall remain in effect only until January 1, 2019, and as of that date is repealed, unless a later enacted statute, that is enacted before January 1, 2019, deletes or extends that date.

SEC. 10. Section 4980.40.5 of the Business and Professions Code is repealed.

4980.40.5. (a) A doctoral or master’s degree in marriage, family, and child counseling, marital and family therapy, couple and family therapy, psychology, clinical psychology, counseling psychology, or counseling with an emphasis in either marriage, family, and child counseling, or marriage and family therapy, obtained from a school, college, or university approved by the Bureau for Private Postsecondary Education as of June 30, 2007, shall be considered by the board to meet the requirements necessary for licensure as a marriage and family therapist and for registration as a marriage and family therapist intern provided that the degree is conferred on or before July 1, 2010.

(b) As an alternative to meeting the qualifications specified in subdivision (a) of Section 4980.40, the board shall accept as equivalent degrees those doctoral or master’s degrees that otherwise
meet the requirements of this chapter and are conferred by educational institutions accredited by any of the following associations:
(1) Northwest Commission on Colleges and Universities.
(2) Middle States Association of Colleges and Secondary Schools.
(3) New England Association of Schools and Colleges.
(5) Southern Association of Colleges and Schools.

SEC. 11. Section 4980.43 of the Business and Professions Code is amended to read:

4980.43. (a) To qualify for licensure as specified in Section 4980.40, each applicant shall complete experience related to the practice of marriage and family therapy under a supervisor who meets the qualifications set forth in Section 4980.03. The experience shall comply with the following:
(1) A minimum of 3,000 hours of supervised experience completed during a period of at least 104 weeks.
(2) A maximum of 40 hours in any seven consecutive days.
(3) A minimum of 1,700 hours obtained after the qualifying master’s or doctoral degree was awarded.
(4) A maximum of 1,300 hours obtained prior to the award date of the qualifying master’s or doctoral degree.
(5) A maximum of 750 hours of counseling and direct supervisor contact prior to the award date of the qualifying master’s or doctoral degree.
(6) No hours of experience may be gained prior to completing either 12 semester units or 18 quarter units of graduate instruction.
(7) No hours of experience may be gained more than six years prior to the date the application for examination eligibility was filed, except that up to 500 hours of clinical experience gained in the supervised practicum required by subdivision (c) of Section 4980.37 and subparagraph (B) of paragraph (1) of subdivision (d) of Section 4980.36 shall be exempt from this six-year requirement.
(8) A minimum of 1,750 hours of direct counseling with individuals, groups, couples, or families, that includes not less than 500 total hours of experience in diagnosing and treating couples, families, and children.
(9) A maximum of 1,250 hours of nonclinical practice, consisting of direct supervisor contact, administering and evaluating psychological tests, writing clinical reports, writing progress or process notes, client centered advocacy, and workshops, seminars, training sessions, or conferences directly related to marriage and family therapy that have been approved by the applicant’s supervisor.

(10) It is anticipated and encouraged that hours of experience will include working with elders and dependent adults who have physical or mental limitations that restrict their ability to carry out normal activities or protect their rights.

This subdivision shall only apply to hours gained on and after January 1, 2010.

(b) An individual who submits an application for examination eligibility between January 1, 2016, and December 31, 2020, may alternatively qualify under the experience requirements that were in place on January 1, 2015.

(c) All applicants, trainees, and registrants shall be at all times under the supervision of a supervisor who shall be responsible for ensuring that the extent, kind, and quality of counseling performed is consistent with the training and experience of the person being supervised, and who shall be responsible to the board for compliance with all laws, rules, and regulations governing the practice of marriage and family therapy. Supervised experience shall be gained by an intern or trainee only as an employee or as a volunteer. The requirements of this chapter regarding gaining hours of experience and supervision are applicable equally to employees and volunteers. Experience shall not be gained by an intern or trainee as an independent contractor. Associates and trainees shall not be employed as independent contractors, and shall not gain experience for work performed as an independent contractor, reported on an IRS Form 1099, or both.

(1) If employed, an intern shall provide the board with copies of the corresponding W-2 tax forms for each year of experience claimed upon application for licensure.

(2) If volunteering, an intern shall provide the board with a letter from his or her employer verifying the intern’s employment as a volunteer upon application for licensure.

(d) Except for experience gained by attending workshops, seminars, training sessions, or conferences as described in
paragraph (9) of subdivision (a), supervision shall include at least one hour of direct supervisor contact in each week for which experience is credited in each work setting, as specified:

(1) A trainee shall receive an average of at least one hour of direct supervisor contact for every five hours of client contact in each setting. No more than six hours of supervision, whether individual or group, shall be credited during any single week.

(2) An individual supervised after being granted a qualifying degree shall receive at least one additional hour of direct supervisor contact for every week in which more than 10 hours of client contact is gained in each setting. No more than six hours of supervision, whether individual or group, shall be credited during any single week.

(3) For purposes of this section, “one hour of direct supervisor contact” means one hour per week of face-to-face contact on an individual basis or two hours per week of face-to-face contact in a group.

(4) Direct supervisor contact shall occur within the same week as the hours claimed.

(5) Direct supervisor contact provided in a group shall be provided in a group of not more than eight supervisees and in segments lasting no less than one continuous hour.

(6) Notwithstanding paragraph (3), an intern working in a governmental entity, a school, a college, or a university, or an institution that is both nonprofit and charitable may obtain the required weekly direct supervisor contact via two-way, real-time videoconferencing. The supervisor shall be responsible for ensuring that client confidentiality is upheld.

(7) All experience gained by a trainee shall be monitored by the supervisor as specified by regulation.

(8) The six hours of supervision that may be credited during any single week pursuant to paragraphs (1) and (2) shall apply to supervision hours gained on or after January 1, 2009.

(e) (1) A trainee may be credited with supervised experience completed in any setting that meets all of the following:

(A) Lawfully and regularly provides mental health counseling or psychotherapy.

(B) Provides oversight to ensure that the trainee’s work at the setting meets the experience and supervision requirements set forth
in this chapter and is within the scope of practice for the profession as defined in Section 4980.02.

(C) Is not a private practice owned by a licensed marriage and family therapist, a licensed professional clinical counselor, a licensed psychologist, a licensed clinical social worker, a licensed physician and surgeon, or a professional corporation of any of those licensed professions.

(2) Experience may be gained by the trainee solely as part of the position for which the trainee volunteers or is employed.

(f) (1) An intern may be credited with supervised experience completed in any setting that meets both of the following:

(A) Lawfully and regularly provides mental health counseling or psychotherapy.

(B) Provides oversight to ensure that the intern’s work at the setting meets the experience and supervision requirements set forth in this chapter and is within the scope of practice for the profession as defined in Section 4980.02.

(2) An applicant shall not be employed or volunteer in a private practice, as defined in subparagraph (C) of paragraph (1) of subdivision (e), until registered as an intern.

(3) While an intern may be either a paid employee or a volunteer, employers are encouraged to provide fair remuneration to interns.

(4) Except for periods of time during a supervisor’s vacation or sick leave, an intern who is employed or volunteering in private practice shall be under the direct supervision of a licensee that has satisfied subdivision (g) of Section 4980.03. The supervising licensee shall either be employed by and practice at the same site as the intern’s employer, or shall be an owner or shareholder of the private practice. Alternative supervision may be arranged during a supervisor’s vacation or sick leave if the supervision meets the requirements of this section.

(5) Experience may be gained by the intern solely as part of the position for which the intern volunteers or is employed.

(g) Except as provided in subdivision (h), all persons shall register with the board as an intern to be credited for postdegree hours of supervised experience gained toward licensure.

(h) Postdegree hours of experience shall be credited toward licensure so long as the applicant applies for the intern registration within 90 days of the granting of the qualifying master’s or doctoral
degree and is thereafter granted the intern registration by the board. An applicant shall not be employed or volunteer in a private practice until registered as an intern by the board.

(i) Trainees, interns, and applicants shall not receive any remuneration from patients or clients, and shall only be paid by their employers.

(j) Trainees, interns, and applicants shall only perform services at the place where their employers regularly conduct business, which may include performing services at other locations, so long as the services are performed under the direction and control of their employer and supervisor, and in compliance with the laws and regulations pertaining to supervision. For purposes of paragraph (3) of subdivision (a) of Section 2290.5, interns and trainees working under licensed supervision, consistent with subdivision (c), may provide services via telehealth within the scope authorized by this chapter and in accordance with any regulations governing the use of telehealth promulgated by the board. Trainees and interns shall have no proprietary interest in their employers’ businesses and shall not lease or rent space, pay for furnishings, equipment, or supplies, or in any other way pay for the obligations of their employers.

(k) Trainees, interns, or applicants who provide volunteered services or other services, and who receive no more than a total, from all work settings, of five hundred dollars ($500) per month as reimbursement for expenses actually incurred by those trainees, interns, or applicants for services rendered in any lawful work setting other than a private practice shall be considered employees and not independent contractors. The board may audit applicants who receive reimbursement for expenses, and the applicants shall have the burden of demonstrating that the payments received were for reimbursement of expenses actually incurred.

(l) Each educational institution preparing applicants for licensure pursuant to this chapter shall consider requiring, and shall encourage, its students to undergo individual, marital or conjoint, family, or group counseling or psychotherapy, as appropriate. Each supervisor shall consider, advise, and encourage his or her interns and trainees regarding the advisability of undertaking individual, marital or conjoint, family, or group counseling or psychotherapy, as appropriate. Insofar as it is deemed appropriate and is desired by the applicant, the educational institution and supervisors are
encouraged to assist the applicant in locating that counseling or psychotherapy at a reasonable cost.

SEC. 12. Section 4980.78 of the Business and Professions Code is amended to read:

4980.78. (a) This section applies to persons who apply for licensure or registration on or after January 1, 2016, and who do not hold a license as described in Section 4980.72.

(b) For purposes of Section 4980.74, education is substantially equivalent if all of the following requirements are met:

(1) The degree is obtained from a school, college, or university accredited by an a regional or national institutional accrediting agency that is recognized by the United States Department of Education and consists of, at a minimum, the following:

(A) (i) For an applicant who obtained his or her degree within the timeline prescribed by subdivision (a) of Section 4980.36, the degree shall contain no less than 60 semester or 90 quarter units of instruction.

(ii) Up to 12 semester or 18 quarter units of instruction may be remediated, if missing from the degree. The remediation may occur while the applicant is registered as an intern.

(B) For an applicant who obtained his or her degree within the timeline prescribed by subdivision (a) of Section 4980.37, the degree shall contain no less than 48 semester units or 72 quarter units of instruction.

(C) Six semester or nine quarter units of practicum, including, but not limited to, a minimum of 150 hours of face-to-face counseling, and an additional 75 hours of either face-to-face counseling or client-centered advocacy, or a combination of face-to-face counseling and client-centered advocacy.

(D) Twelve semester or 18 quarter units in the areas of marriage, family, and child counseling and marital and family systems approaches to treatment, as specified in subparagraph (A) of paragraph (1) of subdivision (d) of Section 4980.36.

(2) The applicant shall complete coursework in California law and ethics as follows:

(A) An applicant who completed a course in law and professional ethics for marriage and family therapists as specified in paragraph (7) of subdivision (a) of Section 4980.81, that did not contain instruction in California law and ethics, shall complete an 18-hour course in California law and professional ethics. The
content of the course shall include, but not be limited to, advertising, scope of practice, scope of competence, treatment of minors, confidentiality, dangerous patients, psychotherapist-patient privilege, recordkeeping, patient access to records, state and federal laws relating to confidentiality of patient health information, dual relationships, child abuse, elder and dependent adult abuse, online therapy, insurance reimbursement, civil liability, disciplinary actions and unprofessional conduct, ethics complaints and ethical standards, termination of therapy, standards of care, relevant family law, therapist disclosures to patients, differences in legal and ethical standards in different types of work settings, and licensing law and licensing process. This coursework shall be completed prior to registration as an intern.

(B) An applicant who has not completed a course in law and professional ethics for marriage and family therapists as specified in paragraph (7) of subdivision (a) of Section 4980.81 shall complete this required coursework. The coursework shall contain content specific to California law and ethics. This coursework shall be completed prior to registration as an intern.

(3) The applicant completes the educational requirements specified in Section 4980.81 not already completed in his or her education. The coursework may be from an accredited school, college, or university as specified in paragraph (1), from an educational institution approved by the Bureau for Private Postsecondary Education, or from a continuing education provider that is acceptable to the board as defined in Section 4980.54. Undergraduate courses shall not satisfy this requirement.

(4) The applicant completes the following coursework not already completed in his or her education from an accredited school, college, or university as specified in paragraph (1) from an educational institution approved by the Bureau for Private Postsecondary Education, or from a continuing education provider that is acceptable to the board as defined in Section 4980.54. Undergraduate courses shall not satisfy this requirement.

(A) At least three semester units, or 45 hours, of instruction regarding the principles of mental health recovery-oriented care and methods of service delivery in recovery-oriented practice environments, including structured meetings with various consumers and family members of consumers of mental health
services to enhance understanding of their experience of mental illness, treatment, and recovery.

(B) At least one semester unit, or 15 hours, of instruction that includes an understanding of various California cultures and the social and psychological implications of socioeconomic position.

(5) An applicant may complete any units and course content requirements required under paragraphs (3) and (4) not already completed in his or her education while registered as an intern, unless otherwise specified.

(6) The applicant’s degree title need not be identical to that required by subdivision (b) of Section 4980.36.

SEC. 13. Section 4980.79 of the Business and Professions Code is amended to read:

4980.79. (a) This section applies to persons who apply for licensure or registration on or after January 1, 2016, and who hold a license as described in Section 4980.72.

(b) For purposes of Section 4980.72, education is substantially equivalent if all of the following requirements are met:

(1) The degree is obtained from a school, college, or university accredited by an regional or national institutional accrediting agency recognized by the United States Department of Education and consists of, at a minimum, the following:

(A) (i) For an applicant who obtained his or her degree within the timeline prescribed by subdivision (a) of Section 4980.36, the degree shall contain no less than 60 semester or 90 quarter units of instruction.

(ii) Up to 12 semester or 18 quarter units of instruction may be remediated, if missing from the degree. The remediation may occur while the applicant is registered as an intern.

(B) For an applicant who obtained his or her degree within the timeline prescribed by subdivision (a) of Section 4980.37, the degree shall contain no less than 48 semester or 72 quarter units of instruction.

(C) Six semester or nine quarter units of practicum, including, but not limited to, a minimum of 150 hours of face-to-face counseling, and an additional 75 hours of either face-to-face counseling or client-centered advocacy, or a combination of face-to-face counseling and client-centered advocacy.
An out-of-state applicant who has been licensed for at least two years in clinical practice, as verified by the board, is exempt from this requirement.

(ii) An out-of-state applicant who has been licensed for less than two years in clinical practice, as verified by the board, who does not meet the practicum requirement, shall remediate it by obtaining 150 hours of face-to-face counseling, and an additional 75 hours of either face-to-face counseling or client-centered advocacy, or a combination of face-to-face counseling and client-centered advocacy. These hours are in addition to the 3,000 hours of experience required by this chapter, and shall be gained while registered as an intern.

(D) Twelve semester or 18 quarter units in the areas of marriage, family, and child counseling and marital and family systems approaches to treatment, as specified in subparagraph (A) of paragraph (1) of subdivision (d) of Section 4980.36.

(2) An applicant shall complete coursework in California law and ethics as follows:

(A) An applicant who completed a course in law and professional ethics for marriage and family therapists as specified in paragraph (7) of subdivision (a) of Section 4980.81 that did not include instruction in California law and ethics, shall complete an 18-hour course in California law and professional ethics. The content of the course shall include, but not be limited to, advertising, scope of practice, scope of competence, treatment of minors, confidentiality, dangerous patients, psychotherapist-patient privilege, recordkeeping, patient access to records, state and federal laws relating to confidentiality of patient health information, dual relationships, child abuse, elder and dependent adult abuse, online therapy, insurance reimbursement, civil liability, disciplinary actions and unprofessional conduct, ethics complaints and ethical standards, termination of therapy, standards of care, relevant family law, therapist disclosures to patients, differences in legal and ethical standards in different types of work settings, and licensing law and licensing process. This coursework shall be completed prior to registration as an intern.

(B) An applicant who has not completed a course in law and professional ethics for marriage and family therapists as specified in paragraph (7) of subdivision (a) of Section 4980.81 shall complete this required coursework. The coursework shall include
content specific to California law and ethics. An applicant shall complete this coursework prior to registration as an intern.

(3) The applicant completes the educational requirements specified in Section 4980.81 not already completed in his or her education. The coursework may be from an accredited school, college, or university as specified in paragraph (1), from an educational institution approved by the Bureau for Private Postsecondary Education, or from a continuing education provider that is acceptable to the board as defined in Section 4980.54. Undergraduate coursework shall not satisfy this requirement.

(4) The applicant completes the following coursework not already completed in his or her education from an accredited school, college, or university as specified in paragraph (1) above, from an educational institution approved by the Bureau for Private Postsecondary Education, or from a continuing education provider that is acceptable to the board as defined in Section 4980.54. Undergraduate coursework shall not satisfy this requirement.

(A) At least three semester units, or 45 hours, of instruction pertaining to the principles of mental health recovery-oriented care and methods of service delivery in recovery-oriented practice environments, including structured meetings with various consumers and family members of consumers of mental health services to enhance understanding of their experience of mental illness, treatment, and recovery.

(B) At least one semester unit, or 15 hours, of instruction that includes an understanding of various California cultures and the social and psychological implications of socioeconomic position.

(5) An applicant's degree title need not be identical to that required by subdivision (b) of Section 4980.36.

(6) An applicant may complete any units and course content requirements required under paragraphs (3) and (4) not already completed in his or her education while registered as an intern, unless otherwise specified.

SEC. 14. Section 4992.05 of the Business and Professions Code is amended to read:

4992.05. (a) Effective January 1, 2016, an applicant for licensure as a clinical social worker shall pass the following two examinations as prescribed by the board:

(1) A California law and ethics examination.

(2) A clinical examination.
(b) Upon registration with the board, an associate clinical social worker registrant shall, within the first year of registration, take an examination on California law and ethics.

(c) A registrant may take the clinical examination only upon meeting all of the following requirements:

1. Completion of all education requirements.
2. Passage of the California law and ethics examination.
3. Completion of all required supervised work experience.

(d) This section shall become operative on January 1, 2016.

SEC. 15. Section 4996.18 of the Business and Professions Code is amended to read:

4996.18. (a) A person who wishes to be credited with experience toward licensure requirements shall register with the board as an associate clinical social worker prior to obtaining that experience. The application shall be made on a form prescribed by the board.

(b) An applicant for registration shall satisfy the following requirements:

1. Possess a master’s degree from an accredited school or department of social work.
2. Have committed no crimes or acts constituting grounds for denial of licensure under Section 480.
3. Commencing January 1, 2014, have completed training or coursework, which may be embedded within more than one course, in California law and professional ethics for clinical social workers, including instruction in all of the following areas of study:

   (A) Contemporary professional ethics and statutes, regulations, and court decisions that delineate the scope of practice of clinical social work.
   (B) The therapeutic, clinical, and practical considerations involved in the legal and ethical practice of clinical social work, including, but not limited to, family law.
   (C) The current legal patterns and trends in the mental health professions.
   (D) The psychotherapist-patient privilege, confidentiality, dangerous patients, and the treatment of minors with and without parental consent.
   (E) A recognition and exploration of the relationship between a practitioner’s sense of self and human values, and his or her professional behavior and ethics.
(F) Differences in legal and ethical standards for different types of work settings.

(G) Licensing law and process.

(c) An applicant who possesses a master’s degree from a school or department of social work that is a candidate for accreditation by the Commission on Accreditation of the Council on Social Work Education shall be eligible, and shall be required, to register as an associate clinical social worker in order to gain experience toward licensure if the applicant has not committed any crimes or acts that constitute grounds for denial of licensure under Section 480. That applicant shall not, however, be eligible to take the clinical examination until the school or department of social work has received accreditation by the Commission on Accreditation of the Council on Social Work Education.

(d) All applicants and registrants shall be at all times under the supervision of a supervisor who shall be responsible for ensuring that the extent, kind, and quality of counseling performed is consistent with the training and experience of the person being supervised, and who shall be responsible to the board for compliance with all laws, rules, and regulations governing the practice of clinical social work.

(e) Any experience obtained under the supervision of a spouse or relative by blood or marriage shall not be credited toward the required hours of supervised experience. Any experience obtained under the supervision of a supervisor with whom the applicant has a personal relationship that undermines the authority or effectiveness of the supervision shall not be credited toward the required hours of supervised experience.

(f) An applicant who possesses a master’s degree from an accredited school or department of social work shall be able to apply experience the applicant obtained during the time the accredited school or department was in candidacy status by the Commission on Accreditation of the Council on Social Work Education toward the licensure requirements, if the experience meets the requirements of Section 4996.23. This subdivision shall apply retroactively to persons who possess a master’s degree from an accredited school or department of social work and who obtained experience during the time the accredited school or department was in candidacy status by the Commission on Accreditation of the Council on Social Work Education.
(g) An applicant for registration or licensure trained in an educational institution outside the United States shall demonstrate to the satisfaction of the board that he or she possesses a master’s of social work degree that is equivalent to a master’s degree issued from a school or department of social work that is accredited by the Commission on Accreditation of the Council on Social Work Education. These applicants shall provide the board with a comprehensive evaluation of the degree and shall provide any other documentation the board deems necessary. The board has the authority to make the final determination as to whether a degree meets all requirements, including, but not limited to, course requirements regardless of evaluation or accreditation.

(h) A registrant shall not provide clinical social work services to the public for a fee, monetary or otherwise, except as an employee.

(i) A registrant shall inform each client or patient prior to performing any professional services that he or she is unlicensed and is under the supervision of a licensed professional.

SEC. 16. Section 4996.23 of the Business and Professions Code is amended to read:

4996.23. (a) To qualify for licensure as specified in Section 4996.2, each applicant shall complete 3,200 hours of post-master’s degree supervised experience related to the practice of clinical social work. The experience shall comply with the following:

(1) At least 1,700 hours shall be gained under the supervision of a licensed clinical social worker. The remaining required supervised experience may be gained under the supervision of a licensed mental health professional acceptable to the board as defined by a regulation adopted by the board.

(2) A minimum of 2,000 hours in clinical psychosocial diagnosis, assessment, and treatment, including psychotherapy or counseling.

(3) A maximum of 1,200 hours in client centered advocacy, consultation, evaluation, research, direct supervisor contact, and workshops, seminars, training sessions, or conferences directly related to clinical social work that have been approved by the applicant’s supervisor.

(4) Of the 2,000 clinical hours required in paragraph (2), no less than 750 hours shall be face-to-face individual or group
psychotherapy provided to clients in the context of clinical social work services.

(5) A minimum of two years of supervised experience is required to be obtained over a period of not less than 104 weeks and shall have been gained within the six years immediately preceding the date on which the application for licensure was filed.

(6) Experience shall not be credited for more than 40 hours in any week.

(b) An individual who submits an application for examination eligibility between January 1, 2016, and December 31, 2020, may alternatively qualify under the experience requirements that were in place on January 1, 2015.

(c) “Supervision” means responsibility for, and control of, the quality of clinical social work services being provided. Consultation or peer discussion shall not be considered to be supervision.

(d) (1) Prior to the commencement of supervision, a supervisor shall comply with all requirements enumerated in Section 1870 of Title 16 of the California Code of Regulations and shall sign under penalty of perjury the “Responsibility Statement for Supervisors of an Associate Clinical Social Worker” form.

(2) Supervised experience shall include at least one hour of direct supervisor contact for a minimum of 104 weeks. For purposes of this subdivision, “one hour of direct supervisor contact” means one hour per week of face-to-face contact on an individual basis or two hours of face-to-face contact in a group conducted within the same week as the hours claimed.

(3) An associate shall receive at least one additional hour of direct supervisor contact for every week in which more than 10 hours of face-to-face psychotherapy is performed in each setting in which experience is gained. No more than six hours of supervision, whether individual or group, shall be credited during any single week.

(4) Supervision shall include at least one hour of direct supervisor contact during each week for which experience is gained in each work setting. Supervision is not required for experience gained attending workshops, seminars, training sessions, or conferences as described in paragraph (3) of subdivision (a).
(5) The six hours of supervision that may be credited during any single week pursuant to paragraph (3) shall apply only to supervision hours gained on or after January 1, 2010.

(6) Group supervision shall be provided in a group of not more than eight supervisees and shall be provided in segments lasting no less than one continuous hour.

(7) Of the 104 weeks of required supervision, 52 weeks shall be individual supervision, and of the 52 weeks of required individual supervision, not less than 13 weeks shall be supervised by a licensed clinical social worker.

(8) Notwithstanding paragraph (2), an associate clinical social worker working for a governmental entity, school, college, or university, or an institution that is both a nonprofit and charitable institution, may obtain the required weekly direct supervisor contact via live two-way videoconferencing. The supervisor shall be responsible for ensuring that client confidentiality is preserved.

(e) The supervisor and the associate shall develop a supervisory plan that describes the goals and objectives of supervision. These goals shall include the ongoing assessment of strengths and limitations and the assurance of practice in accordance with the laws and regulations. The associate shall submit to the board the initial original supervisory plan upon application for licensure.

(f) Experience shall only be gained in a setting that meets both of the following:

(1) Lawfully and regularly provides clinical social work, mental health counseling, or psychotherapy.

(2) Provides oversight to ensure that the associate’s work at the setting meets the experience and supervision requirements set forth in this chapter and is within the scope of practice for the profession as defined in Section 4996.9.

(g) Experience shall not be gained until the applicant has been registered as an associate clinical social worker.

(h) Employment in a private practice as defined in subdivision (i) shall not commence until the applicant has been registered as an associate clinical social worker.

(i) A private practice setting is a setting that is owned by a licensed clinical social worker, a licensed marriage and family therapist, a licensed psychologist, a licensed professional clinical counselor, a licensed physician and surgeon, or a professional corporation of any of those licensed professions.
(j) Associates shall not be employed as independent contractors, and shall not gain experience for work performed as an independent contractor, reported on an IRS Form 1099, or both.

(k) If volunteering, the associate shall provide the board with a letter from his or her employer verifying his or her voluntary status upon application for licensure.

(l) If employed, the associate shall provide the board with copies of his or her W-2 tax forms for each year of experience claimed upon application for licensure.

(m) While an associate may be either a paid employee or volunteer, employers are encouraged to provide fair remuneration to associates.

(n) An associate shall not do the following:

1. Receive any remuneration from patients or clients and shall only be paid by his or her employer.

2. Have any proprietary interest in the employer’s business.

3. Lease or rent space, pay for furnishings, equipment, or supplies, or in any other way pay for the obligations of his or her employer.

(o) An associate, whether employed or volunteering, may obtain supervision from a person not employed by the associate’s employer if that person has signed a written agreement with the employer to take supervisory responsibility for the associate’s social work services.

(p) Notwithstanding any other provision of law, associates and applicants for examination shall receive a minimum of one hour of supervision per week for each setting in which he or she is working.

SEC. 17. Section 4999.12 of the Business and Professions Code is amended to read:

4999.12. For purposes of this chapter, the following terms have the following meanings:

(a) “Board” means the Board of Behavioral Sciences.
(b) “Accredited” means a school, college, or university accredited by the Western Association of Schools and Colleges, or its equivalent regional accrediting association; a regional or national institutional accrediting agency that is recognized by the United States Department of Education.

(c) “Approved” means a school, college, or university that possessed unconditional approval by the Bureau for Private Postsecondary Education at the time of the applicant’s graduation from the school, college, or university.

(d) “Applicant” means an unlicensed person who has completed a master’s or doctoral degree program, as specified in Section 4999.32 or 4999.33, as applicable, and whose application for registration as an intern is pending or who has applied for examination eligibility, or an unlicensed person who has completed the requirements for licensure specified in this chapter and is no longer registered with the board as an intern.

(e) “Licensed professional clinical counselor” or “LPCC” means a person licensed under this chapter to practice professional clinical counseling, as defined in Section 4999.20.

(f) “Intern” means an unlicensed person who meets the requirements of Section 4999.42 and is registered with the board.

(g) “Clinical counselor trainee” means an unlicensed person who is currently enrolled in a master’s or doctoral degree program, as specified in Section 4999.32 or 4999.33, as applicable, that is designed to qualify him or her for licensure under this chapter, and who has completed no less than 12 semester units or 18 quarter units of coursework in any qualifying degree program.

(h) “Approved supervisor” means an individual who meets the following requirements:

1. Has documented two years of clinical experience as a licensed professional clinical counselor, licensed marriage and family therapist, licensed clinical psychologist, licensed clinical social worker, or licensed physician and surgeon who is certified in psychiatry by the American Board of Psychiatry and Neurology.
2. Has received professional training in supervision.
3. Has not provided therapeutic services to the clinical counselor trainee or intern.
4. Has a current and valid license that is not under suspension or probation.
(i) “Client centered advocacy” includes, but is not limited to, researching, identifying, and accessing resources, or other activities, related to obtaining or providing services and supports for clients or groups of clients receiving psychotherapy or counseling services.

(j) “Advertising” or “advertise” includes, but is not limited to, the issuance of any card, sign, or device to any person, or the causing, permitting, or allowing of any sign or marking on, or in, any building or structure, or in any newspaper or magazine or in any directory, or any printed matter whatsoever, with or without any limiting qualification. It also includes business solicitations communicated by radio or television broadcasting. Signs within church buildings or notices in church bulletins mailed to a congregation shall not be construed as advertising within the meaning of this chapter.

(k) “Referral” means evaluating and identifying the needs of a client to determine whether it is advisable to refer the client to other specialists, informing the client of that judgment, and communicating that determination as requested or deemed appropriate to referral sources.

(l) “Research” means a systematic effort to collect, analyze, and interpret quantitative and qualitative data that describes how social characteristics, behavior, emotion, cognitions, disabilities, mental disorders, and interpersonal transactions among individuals and organizations interact.

(m) “Supervision” includes the following:

(1) Ensuring that the extent, kind, and quality of counseling performed is consistent with the education, training, and experience of the person being supervised.

(2) Reviewing client or patient records, monitoring and evaluating assessment, diagnosis, and treatment decisions of the clinical counselor trainee.

(3) Monitoring and evaluating the ability of the intern or clinical counselor trainee to provide services to the particular clientele at the site or sites where he or she will be practicing.

(4) Ensuring compliance with laws and regulations governing the practice of licensed professional clinical counseling.

(5) That amount of direct observation, or review of audio or videotapes of counseling or therapy, as deemed appropriate by the supervisor.
SEC. 18. Section 4999.12.5 is added to the Business and Professions Code, to read:

4999.12.5. (a) The title “professional clinical counselor intern” or “professional clinical counselor registered intern” is hereby renamed “associate professional clinical counselor” or “registered associate professional clinical counselor,” respectively. Any reference in any statute or regulation to a “professional clinical counselor intern” or “professional clinical counselor registered intern” shall be deemed a reference to an “associate professional clinical counselor” or “registered associate professional clinical counselor.”

(b) Nothing in this section shall be construed to expand or constrict the scope of practice of a person licensed or registered pursuant to this chapter.

(c) This section shall become operative January 1, 2018.

SEC. 19. Section 4999.40 of the Business and Professions Code is amended to read:

4999.40. (a) Each educational institution preparing applicants to qualify for licensure shall notify each of its students by means of its public documents or otherwise in writing that its degree program is designed to meet the requirements of Section 4999.32 or 4999.33 and shall certify to the board that it has so notified its students.

(b) An applicant for registration or licensure shall submit to the board a certification by the applicant’s educational institution that the institution’s required curriculum for graduation and any associated coursework completed by the applicant does one of the following:

(1) Meets all of the requirements set forth in Section 4999.32.

(2) Meets all of the requirements set forth in Section 4999.33.

(c) An applicant trained at an educational institution outside the United States shall demonstrate to the satisfaction of the board that he or she possesses a qualifying degree that is equivalent to a degree earned from an institution of higher education that is accredited or approved. These applicants shall provide the board with a comprehensive evaluation of the degree performed by a foreign credential evaluation service that is a member of the National Association of Credential Evaluation Services and shall provide any other documentation the board deems necessary.
SEC. 20. Section 4999.47 of the Business and Professions Code is amended to read:

4999.47. (a) Clinical counselor trainees, interns, and applicants shall perform services only as an employee or as a volunteer. The requirements of this chapter regarding gaining hours of clinical mental health experience and supervision are applicable equally to employees and volunteers. Experience shall not be gained by interns or trainees as an independent contractor. Associates and trainees shall not be employed as independent contractors, and shall not gain experience for work performed as an independent contractor, reported on an IRS Form 1099, or both.

(1) If employed, a clinical counselor intern shall provide the board with copies of the corresponding W-2 tax forms for each year of experience claimed upon application for licensure as a professional clinical counselor.

(2) If volunteering, a clinical counselor intern shall provide the board with a letter from his or her employer verifying the intern’s employment as a volunteer upon application for licensure as a professional clinical counselor.

(b) Clinical counselor trainees, interns, and applicants shall not receive any remuneration from patients or clients, and shall only be paid by their employers.

(c) While an intern may be either a paid employee or a volunteer, employers are encouraged to provide fair remuneration.

(d) Clinical counselor trainees, interns, and applicants who provide voluntary services or other services, and who receive no more than a total, from all work settings, of five hundred dollars ($500) per month as reimbursement for expenses actually incurred by those clinical counselor trainees, interns, and applicants for services rendered in any lawful work setting other than a private practice shall be considered an employee and not an independent contractor.

(e) The board may audit an intern or applicant who receives reimbursement for expenses and the intern or applicant shall have the burden of demonstrating that the payments received were for reimbursement of expenses actually incurred.

(f) Clinical counselor trainees, interns, and applicants shall only perform services at the place where their employer regularly conducts business and services, which may include other locations,
as long as the services are performed under the direction and
control of the employer and supervisor in compliance with the
laws and regulations pertaining to supervision. Clinical counselor
trainees, interns, and applicants shall have no proprietary interest
in the employer’s business.

(g) Each educational institution preparing applicants for
licensure pursuant to this chapter shall consider requiring, and
shall encourage, its students to undergo individual, marital or
conjunct, family, or group counseling or psychotherapy, as
appropriate. Each supervisor shall consider, advise, and encourage
his or her interns and clinical counselor trainees regarding the
advisability of undertaking individual, marital or conjoint, family,
or group counseling or psychotherapy, as appropriate. Insofar as
it is deemed appropriate and is desired by the applicant, the
educational institution and supervisors are encouraged to assist
the applicant in locating that counseling or psychotherapy at a
reasonable cost.

SEC. 21. Section 4999.52 of the Business and Professions
Code is amended to read:

4999.52. (a) Except as provided in Section 4999.54, every
applicant for a license as a professional clinical counselor
shall be examined by the board. The board shall examine the
candidate with regard to his or her knowledge and professional
skills and his or her judgment in the utilization of appropriate
techniques and methods.

(b) The examinations shall be given at least twice a year at a
time and place and under supervision as the board may determine.

(c) The board shall not deny any applicant who has submitted
a complete application for examination admission to the licensure
examinations required by this section if the applicant meets the
educational and experience requirements of this chapter, and has
not committed any acts or engaged in any conduct that would
constitute grounds to deny licensure.

(d) The board shall not deny any applicant whose application
for licensure is complete admission to the examinations specified
by paragraph (2) of subdivision (a) of Section 4999.53, nor shall
the board postpone or delay this examination for any applicant or
delay informing the candidate of the results of this examination,
solely upon the receipt by the board of a complaint alleging acts
or conduct that would constitute grounds to deny licensure.
(e) If an applicant for the examination specified by paragraph (2) of subdivision (a) of Section 4999.53, who has passed the California law and ethics examination, is the subject of a complaint or is under board investigation for acts or conduct that, if proven to be true, would constitute grounds for the board to deny licensure, the board shall permit the applicant to take this examination, but may notify the applicant that licensure will not be granted pending completion of the investigation.

(f) Notwithstanding Section 135, the board may deny any applicant who has previously failed either the California law and ethics examination, or the examination specified by paragraph (2) of subdivision (a) of Section 4999.53, permission to retake either examination pending completion of the investigation of any complaints against the applicant.

(g) Nothing in this section shall prohibit the board from denying an applicant admission to any examination, withholding the results, or refusing to issue a license to any applicant when an accusation or statement of issues has been filed against the applicant pursuant to Section 11503 or 11504 of the Government Code, respectively, or the application has been denied in accordance with subdivision (b) of Section 485.

(h) Notwithstanding any other provision of law, the board may destroy all examination materials two years following the date of an examination.

(i) On and after January 1, 2016, the examination specified by paragraph (2) of subdivision (a) of Section 4999.53 shall be passed within seven years of an applicant's initial attempt.

(j) A passing score on the clinical examination shall be accepted by the board for a period of seven years from the date the examination was taken.

(k) No applicant shall be eligible to participate in the examination specified by paragraph (2) of subdivision (a) of Section 4999.53, if he or she fails to obtain a passing score on this examination within seven years from his or her initial attempt. If the applicant fails to obtain a passing score within seven years of initial attempt, he or she shall obtain a passing score on the current version of the California law and ethics examination in order to be eligible to retake this examination.

(l) This section shall become operative on January 1, 2016.
SEC. 22. Section 4999.54 of the Business and Professions Code is repealed.

4999.54. (a) Notwithstanding Section 4999.50, the board may issue a license to any person who submits an application for a license between January 1, 2011, and December 31, 2011, provided that all documentation is submitted within 12 months of the board’s evaluation of the application, and provided he or she meets one of the following sets of criteria:

(1) He or she meets all of the following requirements:

(A) Has a master’s or doctoral degree from a school, college, or university as specified in Section 4999.32, that is counseling or psychotherapy in content. If the person’s degree does not include all the graduate coursework in all nine core content areas as required by paragraph (1) of subdivision (c) of Section 4999.32, a person shall provide documentation that he or she has completed the required coursework prior to licensure pursuant to this chapter. Except as specified in clause (ii), a qualifying degree must include the supervised practicum or field study experience as required in paragraph (3) of subdivision (c) of Section 4999.32.

(i) A counselor educator whose degree contains at least seven of the nine required core content areas shall be given credit for coursework not contained in the degree if the counselor educator provides documentation that he or she has taught the equivalent of the required core content areas in a graduate program in counseling or a related area.

(ii) Degrees issued prior to 1996 shall include a minimum of 30 semester units or 45 quarter units and at least six of the nine required core content areas specified in paragraph (1) of subdivision (c) of Section 4999.32 and three semester units or four and one-half quarter units of supervised practicum or field study experience. The total number of units shall be no less than 48 semester units or 72 quarter units.

(iii) Degrees issued in 1996 and after shall include a minimum of 48 semester units or 72 quarter units and at least seven of the nine core content areas specified in paragraph (1) of subdivision (c) of Section 4999.32.

(B) Has completed all of the coursework or training specified in subdivision (e) of Section 4999.32.

(C) Has at least two years, full time or the equivalent, of postdegree counseling experience, that includes at least 1,700 hours.
of experience in a clinical setting supervised by a licensed marriage and family therapist, a licensed clinical social worker, a licensed psychologist, a licensed physician and surgeon specializing in psychiatry, a professional clinical counselor or a person who is licensed in another state to independently practice professional clinical counseling, as defined in Section 4999.20, or a master's level counselor or therapist who is certified by a national certifying or registering organization, including, but not limited to, the National Board for Certified Counselors or the Commission on Rehabilitation Counselor Certification.

(D) Has a passing score on the following examinations:

(i) The National Counselor Examination for Licensure and Certification or the Certified Rehabilitation Counselor Examination.

(ii) The National Clinical Mental Health Counselor Examination.

(iii) A California jurisprudence and ethics examination, when developed by the board.

(2) Is currently licensed as a marriage and family therapist in the State of California, meets the coursework requirements described in subparagraph (A) of paragraph (1), and passes the examination described in subdivision (b):

(3) Is currently licensed as a clinical social worker in the State of California, meets the coursework requirements described in subparagraph (A) of paragraph (1), and passes the examination described in subdivision (b).

(b) (1) The board and the Office of Professional Examination Services shall jointly develop an examination on the differences, if any differences exist, between the following:

(A) The practice of professional clinical counseling and the practice of marriage and family therapy.

(B) The practice of professional clinical counseling and the practice of clinical social work.

(2) If the board, in consultation with the Office of Professional Examination Services, determines that an examination is necessary pursuant to this subdivision, an applicant described in paragraphs (2) and (3) of subdivision (a) shall pass the examination as a condition of licensure.

(c) Nothing in this section shall be construed to expand or constrict the scope of practice of professional clinical counseling, as defined in Section 4999.20.
SEC. 23. Section 4999.60 of the Business and Professions Code is amended to read:

4999.60. (a) This section applies to persons who are licensed outside of California and apply for examination eligibility on or after January 1, 2016.

(b) The board may issue a license to a person who, at the time of submitting an application for a license pursuant to this chapter, holds a valid license as a professional clinical counselor, or other counseling license that allows the applicant to independently provide clinical mental health services, in another jurisdiction of the United States, if all of the following conditions are satisfied:

1. The applicant’s education is substantially equivalent, as defined in Section 4999.63.
2. The applicant complies with subdivision (b) (c) of Section 4999.40, if applicable.
3. The applicant’s supervised experience is substantially equivalent to that required for a license under this chapter. The board shall consider hours of experience obtained outside of California during the six-year period immediately preceding the date the applicant initially obtained the license described above. If the applicant has less than 3,000 hours of qualifying supervised experience, time actively licensed as a professional clinical counselor shall be accepted at a rate of 100 hours per month up to a maximum of 1,200 hours if the applicant’s degree meets the practicum requirement described in subparagraph (C) of paragraph (1) of subdivision (b) of Section 4999.63 without exemptions or remediation.
4. The applicant passes the examinations required to obtain a license under this chapter. An applicant who obtained his or her license or registration under another jurisdiction may apply for licensure with the board without taking the clinical examination if both of the following conditions are met:

   A. The applicant obtained a passing score on the licensing examination set forth in regulation as accepted by the board.
   B. The applicant’s license or registration in that jurisdiction is in good standing at the time of his or her application and is not revoked, suspended, surrendered, denied, or otherwise restricted or encumbered.

SEC. 24. Section 4999.61 of the Business and Professions Code is amended to read:
4999.61. (a) This section applies to persons who apply for
examination eligibility or registration on or after January 1, 2016,
and who do not hold a license as described in Section 4999.60.
(b) The board shall accept education gained while residing
outside of California for purposes of satisfying licensure or
registration requirements if the education is substantially
equivalent, as defined in Section 4999.62, and the applicant
complies with subdivision (c) of Section 4999.40, if applicable.
(c) The board shall accept experience gained outside of
California for purposes of satisfying licensure or registration
requirements if the experience is substantially equivalent to that
required by this chapter.
SEC. 25. Section 4999.120 of the Business and Professions
Code is amended to read:
4999.120. The board shall assess fees for the application for
and the issuance and renewal of licenses and for the registration
of interns to cover administrative and operating expenses of the
board related to this chapter. Fees assessed pursuant to this section
shall not exceed the following:
(a) The fee for the application for examination eligibility shall
be up to two hundred fifty dollars ($250).
(b) The fee for the application for intern registration shall be up
to one hundred fifty dollars ($150).
(c) The fee for the application for licensure shall be up to one
hundred eighty dollars ($180).
(d) The fee for the board-administered clinical examination, if
the board chooses to adopt this examination in regulations, shall
be up to two hundred fifty dollars ($250).
(e) The fee for the law and ethics examination shall be up to
one hundred fifty dollars ($150).
(f) The fee for the examination described in subdivision (b) of
Section 4999.54 shall be up to one hundred dollars ($100).
(g) The fee for the issuance of a license shall be up to two
hundred fifty dollars ($250).
(h) The fee for annual renewal of an intern registration shall be
up to one hundred fifty dollars ($150).
(h) The fee for two-year renewal of licenses shall be up to two hundred fifty dollars ($250).

(i) The fee for issuance of a retired license shall be forty dollars ($40).

(j) The fee for rescoring an examination shall be twenty dollars ($20).

(k) The fee for issuance of a replacement license or registration shall be twenty dollars ($20).

(l) The fee for issuance of a certificate or letter of good standing shall be twenty-five dollars ($25).

SEC. 26. No reimbursement is required by this act pursuant to Section 6 of Article XIIIB of the California Constitution because the only costs that may be incurred by a local agency or school district will be incurred because this act creates a new crime or infraction, eliminates a crime or infraction, or changes the penalty for a crime or infraction, within the meaning of Section 17556 of the Government Code, or changes the definition of a crime within the meaning of Section 6 of Article XIII B of the California Constitution.
MEMORANDUM

DATE July 12, 2016

TO Legislative & Regulatory Committee Members

FROM Lusine M Sarkisyan, Legislative and Regulatory Analyst

SUBJECT Agenda Item 19C: Update on 2016 Pending Regulatory Packages

Abandonment of Applications (California Code of Regulations, Title 16, Section 1004):
During the May 2013 meeting, the Dental Board of California (Board) approved proposed regulatory language relative to the abandonment of applications and directed staff to initiate the rulemaking. Board staff filed the initial rulemaking documents with the Office of Administrative Law (OAL) on July 23, 2015 and the proposal was published in the California Regulatory Notice Register on Friday, August 7, 2015. The 45-day public comment period began on August 7, 2015 and ended on September 21, 2015. A public regulatory hearing was held in Sacramento on September 22, 2015. The Board did not receive comments. Since, there were no comments the Board adopted the proposed language and directed staff to finalize the rulemaking file.

Staff submitted the final rulemaking file to the Department of Consumer Affairs (Department) on September 28, 2015. Final rulemaking files were approved by the Director of the Department on May 12, 2016, and the Secretary of the Business, Consumer Services, and Housing Agency (Agency) on June 24, 2016. Currently, it is pending signature approval by the Director of the Department of Finance (Finance).

Final rulemaking files are required to be approved by the Director of the Department, the Agency Secretary, and the Finance Director. Once approval signatures are obtained, the final rulemaking file will be submitted to the OAL. The OAL will have thirty (30) working days to review the file. Once approved, the rulemaking will be filed with the Secretary of State. Beginning January 1, 2013, new quarterly effective dates for regulations will be dependent upon the timeframe an OAL approved rulemaking is filed with the Secretary of State, as follows:

- The regulation would take effect on January 1 if the OAL approved rulemaking is filed with the Secretary of State on September 1 to November 30, inclusive.
The regulation would take effect on April 1 if the OAL approved rulemaking is filed with the Secretary of State on December 1 to February 29, inclusive.

The regulation would take effect on July 1 if the OAL approved rulemaking is filed with the Secretary of State on March 1 to May 31, inclusive.

The regulation would take effect on October 1 if the OAL approved regulation is filed on June 1 to August 31, inclusive.

The deadline to submit this final rulemaking file to the Office of Administrative Law for review and determination of approval is August 6, 2016.

**Dental Assisting Comprehensive Regulatory Proposal:**
The Dental Assisting Council (Council) held multiple regulatory development workshops as part of the Dental Assisting Comprehensive Regulatory Proposal: March 18, 2016 worked on the Radiation Safety Course Requirements and Minimum Standards for Infection Control; April 29, 2016 worked on Minimum Standards for Infection Control and regulatory language relating to the Approval of Pit & Fissure Sealant, Coronal Polishing, and Ultrasonic Scaling Courses; June 10, 2016 worked on Orthodontic Assistant Permits; and July 15, 2016 worked on the Registered Dental Assistant program. The workshops resulted in fruitful discussions and feedback from the Council and stakeholders. Board staff scheduled the next workshop for September 16, 2016 to develop proposed regulatory language to present to the Board at a future meeting. Once the workshops are completed, the rulemaking will consist of proposed amendments that will impact educational program and course requirements, examination requirements, and licensure requirements relating to dental assisting. This rulemaking will be presented to the Board at a future meeting.

**Elective Facial Cosmetic Surgery Permit Application Requirements and Renewal:**
Regulations were deemed necessary to interpret and specify the provisions contained in Business and Professions Code Section 1638.1 relating to the application and approval process requirements for the issuance of an Elective Facial Cosmetic Surgery permit. Board staff scheduled a teleconference in October where further discussions took place regarding regulatory language. On April 20, 2016, the Elective Facial Cosmetic Surgery (EFCS) Permit Credentialing Committee considered the proposed language, however directed staff to add additional language relating to operative reports. The EFCS Committee was scheduled to meet on July 13, 2016, however because no permit applications were received the meeting was canceled. The next Committee meeting is scheduled on October 19, 2016 at which time the Committee will consider the proposed language and recommend to the Board to proceed with the rulemaking.

**Licensure by Credential Application Requirements:**
The Board added this rulemaking to its list of priorities for Fiscal Year (FY) 2015-16. Staff worked with Board Legal Counsel to identify issues and develop regulatory language to implement, interpret, and specify the application requirements for the Licensure by Credential pathway to licensure. The Board appointed a subcommittee (Drs. Whitcher and Woo) to work with staff to draft regulatory language and to determine if statutory changes are necessary. Staff met with the subcommittee and the Board’s Legal Counsel in October 2015 and as a result of that meeting, staff presented a few policy issues to the Board for recommendation during the December 2015 Board meeting. Staff is working to incorporate the recommendations in the development of the regulatory language to proceed forward in the rulemaking process which will be presented to the Board at a future meeting.
Continuing Education Requirements and Basic Life Support Equivalency Standards:
In March 2013, the Board’s Executive Officer received a letter from Mr. Ralph Shenefelt, Senior Vice President of the Health and Safety Institute, petitioning the Board to amend California Code of Regulations, Title 16, Sections 1016(b)(1)(C) and 1017(d) such that a Basic Life Support (BLS) certification issued by the American Safety and Health Institute (ASHI), which is a brand of the Health and Safety Institute, would satisfy the mandatory BLS certification requirement for license renewal, and the required advanced cardiac life support course required for the renewal of a general anesthesia permit. Additionally, the letter requested an amendment to Section 1017(d) to specify that an advanced cardiac life support course which is approved by the American Heart Association or the ASHI include an examination on the materials presented in the course or any other advanced cardiac life support course which is identical in all respects, except for the omission of materials that relate solely to hospital emergencies or neonatology, to the most recent “American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care” published by the American Heart Association.

Additionally, AB 836 (Skinner Chapter 299, statutes of 2013) restricted the continuing education requirement hours for active-retired dentists who provide only uncompensated care at a maximum of 60% of that required for non-retired active dentists, and requires the Board to report on the status of retired active dentists who provide only uncompensated care during its next sunset report. These new requirements were implemented as part of its rulemaking proposal.

Board staff is working on the development of proposed language and will present it to the Board for consideration at a future meeting.

Mobile and Portable Dental Unit Registration Requirements (California Code of Regulations, Title 16, Section 1049):
Senate Bill 562 (Galgiani Chapter 562, Statute of 2013) eliminated the one mobile dental clinic or unit limit and required a mobile dental unit or a dental practice that routinely uses portable dental units, a defined, to be registered and operated in accordance with the regulations of the Board. The bill required any regulations adopted by the board pertaining to this matter to require the registrant to identify a licensed dentist responsible for the mobile dental unit or portable practice, and to include requirements for availability to follow-up and emergency care, maintenance and availability of provider and patient records, and treatment information to be provided to patients and other appropriate parties. At its November 2014 meeting, the Board directed staff to add Mobile and Portable Dental Units to its list of regulatory priorities in order to interpret and specify the provisions relating to the registration requirements for the issuance of a mobile and portable dental unit. In December 2015, staff met and worked with the California Dental Association (CDA) to further develop regulatory language which was presented to the Board for consideration during the March 2016 meeting.

During the March 2016 Board meeting, the Board approved proposed regulatory language for the Mobile Dental Clinic and Portable Dental Unit Registration Requirements. Board staff is currently drafting the initial rulemaking documents for submittal to OAL.
Dentistry and Dental Assisting Licensing and Permitting Fee Increase (California Code of Regulation, Title 16, Sections 1021 and 1022):
On May 12, 2016, the Board approved the proposed regulatory language relative to dentistry and dental assisting licensing and permitting fees and directed staff to initiate the rulemaking. Board staff filed the initial rulemaking documents with the Office of Administrative Law (OAL) on June 14, 2016 and the proposal was published in the California Regulatory Notice Register on Friday, June 24, 2016. The 45-day public comment period began on June 24, 2016 and ended on August 8, 2016. A public regulatory hearing was held in Sacramento on August 9, 2016.

Defining Discovery and Filing (California Code of Regulation, Title 16, Sections 1001.1 and 1001.2):
During the March 2016 Board meeting, Assistant Executive Officer, Sarah Wallace, discussed the advisement of the Attorney General’s Office regarding the promulgation of regulations, as done by the Medical Board of California, to define the terms “discovery” and “filing” as found in the Business and Professions Code Section 1670.2. Staff worked with the Board’s Legal Counsel to draft language in defining “discovery” and “filing”, which was presented during the May 2016 Board meeting. The Board initiated the rulemaking file for this regulatory package. Board staff drafted the initial rulemaking documents which will be submitted to OAL.

Action Requested:

<td>SUBJECT</td>
<td>Agenda Item 19D: Discussion and Possible Action Regarding Fiscal Year 2016-17 Regulatory Priorities</td>
</tr>
</tbody>
</table>

**Background:**
At the beginning of each Fiscal Year (FY), staff requests the Dental Board of California (Board) set its priorities for the promulgation of new regulatory proposals for the duration of the year so that staff may manage the workload associated with meeting the Board’s goals accordingly. In 2015, the Board set the following priorities, in priority order, for FY 2015-16:

1. Delegation of Authority to the Board’s Executive Officer;
2. Abandonment of Applications;
3. Dental Assisting Comprehensive Rulemaking
4. Licensure by Credential Application Requirements;
5. Continuing Education Requirements and Basic Life Support Equivalency Standards;
6. Mobile and Portable Dental Unit Registration Requirements;
7. Elective Facial Cosmetic Surgery (EFCS) Permit Requirements;
8. Dentistry and Dental Assisting Fee increase; and

The following is a list of regulatory proposals that were approved by Office of Administrative Law (OAL):

**1. Delegation of Authority to the Executive Officer (California Code of Regulations, Title 16, Section 1001):**
At its May 2014 meeting, the Board approved proposed regulatory language to delegate authority to the Board’s Executive Officer to approve settlement agreements for the revocation, surrender, or interim suspension of a license without requiring the Board to vote to adopt the settlement. Board staff filed the initial rulemaking documents with OAL on February 10, 2015 and the proposal was published in the California Regulatory Notice on February 20, 2015. The 45-day
public comment period began on February 20, 2015 and ended on April 6, 2015. A regulatory hearing was held on April 7, 2015 in Sacramento. No public comments were received in response to the proposal.

Staff submitted the final rulemaking file to the Department of Consumer Affairs (Department) on June 17, 2015. Final rulemaking files were approved by the Director of the Department, the Secretary of the Business, Consumer Services, and Housing Agency (Agency) and the Director of the Department of Finance (Finance). On January 22, 2016, the final rulemaking file was submitted to the OAL. The OAL reviewed the file and approved the rulemaking on March 7, 2016, which was filed with the Secretary of State. The rulemaking has become effective as of July 1, 2016. Status: Rulemaking has been approved.

The following is a list of regulatory proposals that staff has been working on over the last year:

1. Abandonment of Applications (California Code of Regulations, Title 16, Section 1004):
   At its May 2013 meeting, the Dental Board of California (Board) approved proposed regulatory language relative to the abandonment of applications and directed staff to initiate the rulemaking. Board staff filed the initial rulemaking documents with the Office of Administrative Law (OAL) on July 23, 2015 and the proposal was published in the California Regulatory Notice Register on Friday, August 7, 2015. The 45-day public comment period began on August 7, 2015 and ended on September 21, 2015. A public regulatory hearing was held in Sacramento on September 22, 2015. No public comments were received in response to the proposal.

   Staff submitted the final rulemaking file to the Department of Consumer Affairs (Department) on September 28, 2015. Final rulemaking files were approved by the Director of the Department on May 12, 2016, and the Secretary of the Business, Consumer Services, and Housing Agency (Agency) on June 24, 2015. Currently, it is pending signature approval by the Director of the Department of Finance (Finance). Once all the necessary approval signatures are obtained, the final rulemaking file will be submitted to the Office of Administrative Law. The Office of Administrative Law will have thirty (30) working days to review the file. Once approved, the rulemaking will be filed with the Secretary of State. Beginning January 1, 2013, new quarterly effective dates for regulations will be dependent upon the timeframe an OAL approved rulemaking is filed with the Secretary of State. The deadline to submit this final rulemaking file to the Office of Administrative Law review and determination of approval is August 6, 2016. Status: Pending signature approval by Finance.

2. Dental Assisting Comprehensive Regulatory Proposal:
   The Dental Assisting Council (Council) has held multiple regulatory development workshops throughout the year to work on various components of the Dental Assisting Comprehensive Regulatory Proposal. Board staff anticipates presenting the proposed regulatory language to the Board at a future meeting. Once completed, this rulemaking will include educational program and course requirements, examination requirements, and licensure requirements relating to dental assisting.
Status: Pending further development of regulatory language by the Dental Assisting Council.

3. Licensure by Credential Application Requirements:
The Board added this rulemaking to its list of priorities for Fiscal Year (FY) 2015-16. Staff worked with Board Legal Counsel to identify issues and develop regulatory language to implement, interpret, and specify the application requirements for the Licensure by Credential pathway to licensure. The Board appointed a subcommittee (Drs. Whitcher and Woo) to work with staff to draft regulatory language and to determine if statutory changes are necessary. Staff met with the subcommittee and the Board’s Legal Counsel in October 2015 and as a result of that meeting, staff presented a few policy issues to the Board for recommendation during the December 2015 Board meeting. Staff is working to incorporate the recommendations in the development of the regulatory language to proceed forward in the rulemaking process. Status: Pending additional language development by Board subcommittee, staff, and Legal Counsel.

4. Continuing Education Requirements and Basic Life Support Equivalency Standards:
In March 2013, the Board’s Executive Officer received a letter from Mr. Ralph Shenefelt, Senior Vice President of the Health and Safety Institute, petitioning the Board to amend California Code of Regulations, Title 16, Sections 1016(b)(1)(C) and 1017(d) such that a Basic Life Support (BLS) certification issued by the American Safety and Health Institute (ASHI), which is a brand of the Health and Safety Institute, would satisfy the mandatory BLS certification requirement for license renewal, and the required advanced cardiac life support course required for the renewal of a general anesthesia permit. Additionally, the letter requested an amendment to Section 1017(d) to specify that an advanced cardiac life support course which is approved by the American Heart Association or the ASHI include an examination on the materials presented in the course or any other advanced cardiac life support course which is identical in all respects, except for the omission of materials that relate solely to hospital emergencies or neonatology, to the most recent “American Heart Association Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care” published by the American Heart Association.

Additionally, AB 836 (Skinner Chapter 299, statutes of 2013) restricted the continuing education requirement hours for active-retired dentists who provide only uncompensated care at a maximum of 60% of that required for non-retired active dentists, and requires the Board to report on the status of retired active dentists who provide only uncompensated care during its next sunset report. These new requirements were implemented as part of its rulemaking proposal.

Board staff is working on the development of proposed language and will present it to the Board for consideration at a future meeting. Status: Pending development of proposed language for Board consideration.

5. Mobile and Portable Dental Unit Registration Requirements:
Senate Bill 562 (Galgiani Chapter 562, Statute of 2013) eliminated the one mobile dental clinic or unit limit and required a mobile dental unit or a dental practice that routinely uses portable dental units, a defined, to be registered and operated in
accordance with the regulations of the Board. The bill required any regulations adopted by the board pertaining to this matter to require the registrant to identify a licensed dentist responsible for the mobile dental unit or portable practice, and to include requirements for availability to follow-up and emergency care, maintenance and availability of provider and patient records, and treatment information to be provided to patients and other appropriate parties. At its November 2014 meeting, the Board directed staff to add Mobile and Portable Dental Units to its list of regulatory priorities in order to interpret and specify the provisions relating to the registration requirements for the issuance of a mobile and portable dental unit. In December 2015, staff met and worked with the California Dental Association (CDA) to further develop regulatory language which was presented to the Board for consideration during the March 2016 meeting.

During the March 2016 Board meeting, the Board approved proposed regulatory language for the Mobile Dental Clinic and Portable Dental Unit Registration Requirements. Board staff is currently drafting the initial rulemaking documents for submittal to OAL. **Status: Pending submission of rulemaking documents to OAL.**

**6. Elective Facial Cosmetic Surgery Permit Application Requirements and Renewal:**
Regulations were deemed necessary to interpret and specify the provisions contained in Business and Professions Code Section 1638.1 relating to the application and approval process requirements for the issuance of an Elective Facial Cosmetic Surgery permit. Board staff scheduled a teleconference in October where further discussions took place regarding regulatory language. On April 20, 2016, the Elective Facial Cosmetic Surgery (EFCS) Permit Credentialing Committee considered the proposed language, however directed staff to add additional language relating to operative reports. The EFCS Committee was scheduled to meet on July 13, 2016, however because no permit applications were received the meeting was canceled. The next Committee meeting is scheduled on October 19, 2016 at which time the Committee will consider the proposed language and recommend to the Board to proceed with the rulemaking. **Status: Pending approval of regulatory language by the EFCS Permit Credentialing Committee.**

**7. Dentistry and Dental Assisting Licensing and Permitting Fee Increase (California Code of Regulation, Title 16, Sections 1021 and 1022):**
On May 12, 2016, the Board approved the proposed regulatory language relative to dentistry and dental assisting licensing and permitting fees and directed staff to initiate the rulemaking. Board staff filed the initial rulemaking documents with the Office of Administrative Law (OAL) on June 14, 2016 and the proposal was published in the California Regulatory Notice Register on Friday, June 24, 2016. The 45-day public comment period began on June 24, 2016 and ended on August 8, 2016. A public regulatory hearing was held in Sacramento on August 9, 2016. **Status: Pending 45-day public comment period.**

**8. Defining Discovery and Filing (California Code of Regulation, Title 16, Sections 1001.1 and 1001.2):**
At the March 2016 Board meeting the advisement of the Attorney General’s Office was discussed regarding the promulgation of regulations, as done by the Medical
Board of California, to define the terms “discovery” and “filing” as found in the Business and Professions Code Section 1670.2. On May 12, 2016, Board approved the proposed regulatory language and directed staff to initiate the rulemaking. **Status:** Pending submission of rulemaking documents to OAL.

Board staff maintains a list of needed regulations for the Board to consider when prioritizing regulatory proposals each fiscal year. This list includes regulatory proposals that would not need legislative amendments prior to promulgation. The following is a list of needed regulatory proposals for the Board’s consideration:

1. Memo Requesting Change Without Regulatory Effect to California Code of Regulations, Title 16, Sections 1023.16 and 1023.7

2. Institutional Standards (Cal. Code of Regs., Title 16, Section 1024.1)

3. Interim Therapeutic Restoration (ITR) Competency Standards for Instruction (New Regulations)

**Staff Recommendation**
Staff recommends the Board consider maintaining the same regulatory priorities it established in FY 2015-16 as the regulatory priorities for FY 2016-17 to allow the opportunity to complete what is currently pending.

**Action Requested:**
Staff requests the Board review the list of issues that require rulemakings and establish a priority list to assist staff with determining workload for FY 2016-2017.

MEMORANDUM

DATE August 2, 2016

TO Dental Board Members

FROM Lusine M Sarkisyan, Legislative and Regulatory Analyst

SUBJECT Agenda Item 20(A): Discussion and Possible Action Regarding Comments Received During the 45-Day Public Comment Period for the Board’s Proposed Rulemaking to Amend §1021 and 1022 of Title 16 of the California Code of Regulations Relating to Dentistry and Dental Assisting Licensing and Permitting Fee Increase

Background:
At its May 2016 meeting, the Dental Board of California (Board) approved proposed regulatory language relative to dentistry and dental assisting licensing and permitting fee increase and directed staff to initiate the rulemaking. Board staff filed the initial rulemaking documents with the Office of Administrative Law (OAL) on June 14th and the proposal was published in the California Regulatory Notice Register on Friday, June 24, 2016. The 45-day public comment period began on Friday, June 24, 2016. The comment period will end on Monday, August 8, 2016.

After the scheduled regulatory hearing in Sacramento on Monday, August 8, 2016, a supplemental document will be presented to the Board which will include any written comments received during the regulatory hearing for the Board to take action and recommended responses.
MEMORANDUM

DATE          August 2, 2016

TO            Dental Board Members

FROM          Lusine M Sarkisyan, Legislative and Regulatory Analyst

SUBJECT       Agenda Item 20(B): Discussion and Possible Action Regarding Adoption of Proposed Amendments to California Code of Regulations, Title 16, Sections 1021 and 1022 Relevant to a Dentistry and Dental Assisting Fee Increase

Background:
The Board may consider comments received during the 45-day public comment period, hold discussion, and take action to adopt proposed amendments to California Code of Regulations, Title 16, Sections 1021 and 1022 relevant to the dentistry and dental assisting fee increase.

Action Requested:
The Board may hold discussion regarding adverse comments received during the 45-day public comment period and may take one of the following actions:

A. If the Board rejects the comments received during the 45-day public comment period, and does not vote to modify the text in response to comments, then the Board would:

Direct staff to take all steps necessary to complete the rulemaking process, including the filing of the final rulemaking package with the Office of Administrative Law and authorize the Executive Officer to make any non-substantive changes to the proposed regulations before completing the rulemaking process, and adopt the proposed amendments to California Code of Regulations, Title 16, Sections 1021 and 1022 relevant the dentistry fee increase as noticed in the proposed text.

B. If the Board accepts any comments received during the 45-day public comment period, or modifies the text in response to comments, then the Board would:

Modify the text in response to the comments received and direct staff to take all steps necessary to complete the rulemaking process, including preparing the modified text for a 15-day public comment period, which includes the amendments accepted by the board at this meeting. If after the 15-day public comment period,
no adverse comments are received, authorize the Executive Officer to make any non-substantive changes to the proposed regulations before completing the rulemaking process, and adopt the proposed amendments to California Code of Regulations, Title 16, Section 1021 and 1022 relevant to the dentistry and dental assisting fee increase as noticed in the modified text.
Public Comment on Items Not on the Agenda.

The Board may not discuss or take action on any matter raised during the Public Comment section that is not included on this agenda, except whether to decide to place the matter on the agenda of a future meeting (Government Code §§ 11125 and 11125.7(a)).
Board Member Comments on Items Not on the Agenda.

The Board may not discuss or take action on any matter raised during the Board Member Comments section that is not included on this agenda, except whether to decide to place the matter on the agenda of a future meeting (Government Code §§ 11125 and 11125.7(a)).
ADJOURNMENT
