President's Message

Building a Stronger Board Through Collaboration

Lilia Larin, DDS,
Board President

As we continue our work this year, I am encouraged by the progress the Dental Board of California (Board) has made in advancing the priorities outlined in our 2026-2029 Strategic Plan. Through the dedication of our board members, Executive Officer Bryce W.A. Docherty, MPA, board staff, and stakeholders, we remain focused on our mission to protect the public while promoting safe, high-quality oral health care throughout California.

One accomplishment I am especially proud of this year is the evolution of our committee structure. Over the past several months, our committees have become more focused and purposeful, with clearly defined goals and work plans aligned with Board strategic priorities. This infrastructure and approach have created greater opportunities for board members to contribute their knowledge and expertise and participate in meaningful discussions that help shape and guide Board work. The result has been stronger engagement, greater collaboration, and a shared sense of responsibility.

Several committees have made significant contributions this year. Our Legislative and Regulatory Committee has actively reviewed legislation, proposed amendments, and evaluated their impact on consumer protection and the dental profession. Their thoughtful analyses provide the Board with insightful bill position recommendations. Building on these efforts, the committee has embraced an opportunity to develop the inaugural Board Legislative Day at the state Capitol in Spring 2027. This initiative will strengthen Board relationships with policymakers and help board members gain a deeper understanding of the legislative process in California.

Our Communications and Editorial Committee has expanded Board public outreach and continues to explore new ways to communicate with licensees, applicants, consumers, and stakeholders. These efforts promote transparency, increase public awareness, and ensure important information is shared in a timely and accessible manner.

Our Examinations Committee is focused on expanding the Board's understanding of evolving licensure and examination practices. Through committee outreach, discussions are underway to potentially hold a board meeting in San Diego next year

Continued on page 2

Continued from page 1

to coincide with the American Board of Dental Examiners (ADEX) national meeting. This educational opportunity will provide board members with valuable insight into the dental licensure examination process and the standards used to assess clinical competency in support of Board licensure responsibilities.

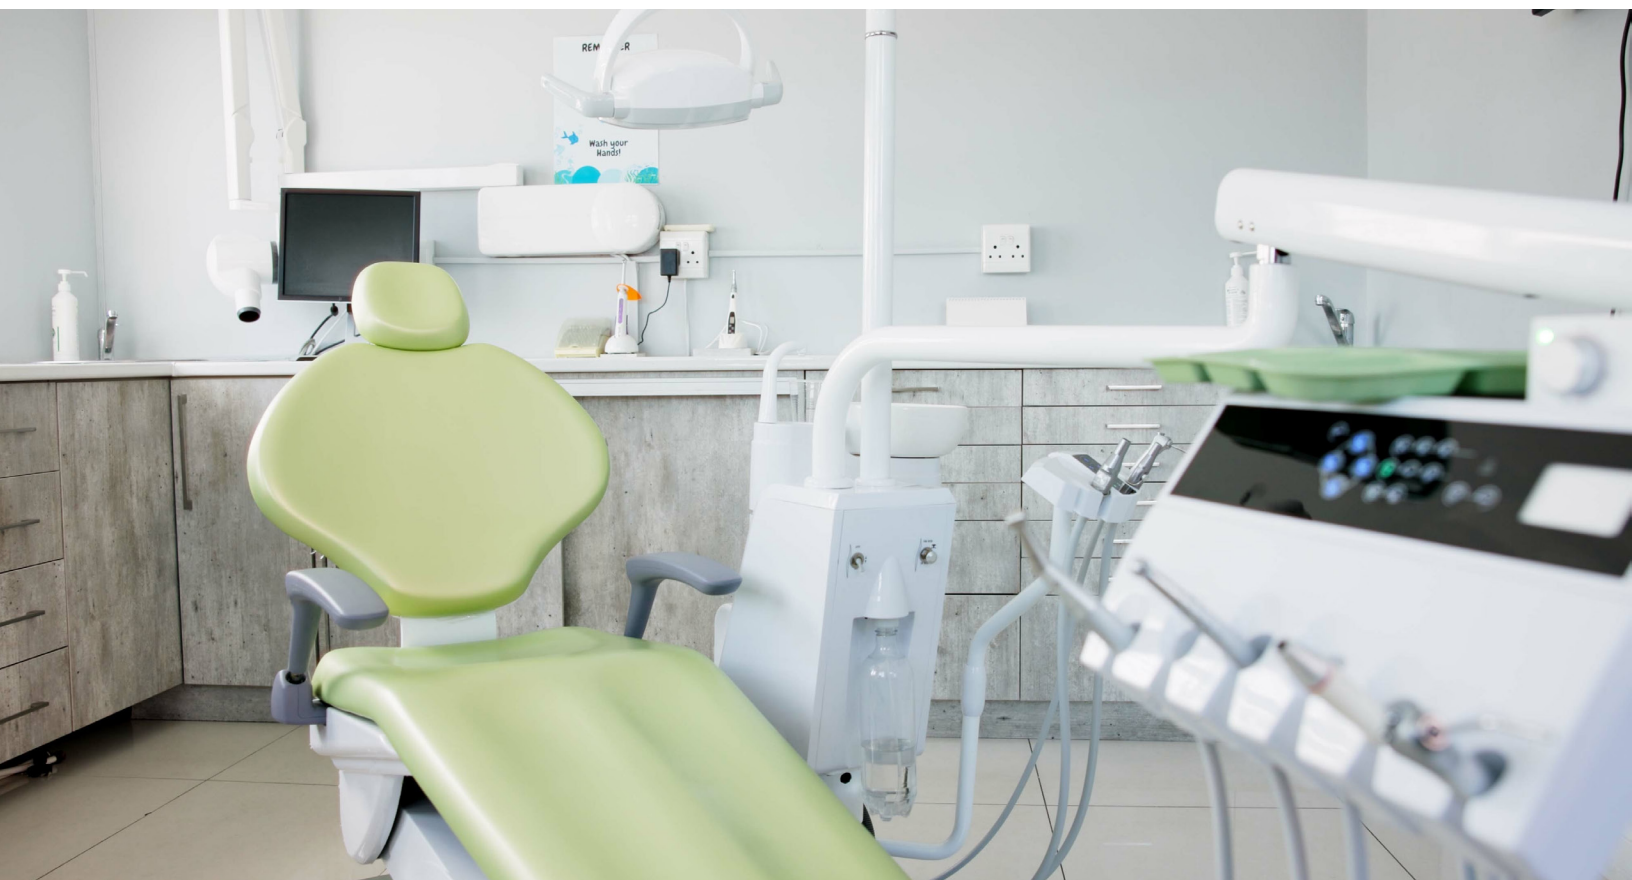

Our Access to Care Committee continues to address barriers to oral health services throughout California. As part of its work, the committee has invited several stakeholders to present before the Board on statewide oral health initiatives and efforts to improve access to dental care. These valuable insights help inform the Board as it addresses workforce challenges and access-to-care issues.

Every committee has played an essential role in advancing our mission to protect and promote the health and safety of California dental consumers. Whether the Board is addressing licensure, examinations, enforcement, access to care, communications, legislation, or administrative matters, each committee has contributed valuable expertise and thoughtful insights. I extend my sincere appreciation to every committee chair and member for their dedication, preparation, and professionalism.

As the dental profession continues to evolve through advances in technology, evolving educational pathways, workforce challenges, and new models of care, the Board remains committed to thoughtful, balanced decision-making while maintaining strong regulatory standards and responding to the needs of the profession and the diverse communities we serve.

I also want to thank our stakeholders for their continued participation in board meetings, committee discussions, and the regulatory process. Your engagement provides valuable perspectives that strengthen our work.

Serving as board president continues to be both an honor and a privilege. I am truly grateful for the opportunity to work alongside such dedicated board members and staff, and I look forward to the progress we will continue to achieve together. Through collaboration, innovation, and open dialogue, I am confident we will continue to strengthen consumer protection standards, enhance public trust, and advance excellence in oral health care for all Californians.

Executive Officer's Message

Thank you for your service!

Bryce Docherty

As my first year as the Board's executive officer comes to a close, I am in awe of our board members' and staff's dedication and insatiable commitment to protecting California dental consumers. Getting it right is paramount to all of us. Licensing nearly 110,000 dental professionals, 950 dental assisting courses and programs, and processing close to 10,000 consumer complaints a year is

an "all hands on deck" effort.

Perhaps the most committed public servant in Board history to exemplify this consumer protection pledge is one of our very own full-time dental consultants, Dr. Patrick Schenk, who has served the Board for 42 years. As Dr. Schenk retires from state service, we are reminded of the important work happening behind the scenes to ensure California consumers have access to the highest level of quality dental care possible.

You will learn much more about Dr. Schenk later in this issue's article that celebrates his legacy of dedication and service not only to the Board but also to American freedom. Dr. Schenk is the epitome of service, having also completed a tour of duty in the Vietnam War after being drafted in 1967 during his freshman year of dental school. For the first five months, he was recruited and stationed just one mile from the Vietnam border to count infiltrations from North Vietnam into South Vietnam.

We will certainly miss his vast knowledge and expertise in dentistry, but most of all his kindhearted nature and witty sense of humor.

Thank you for your service, Dr. Schenk. Enjoy the beach and grandkids. You will be missed by your Dental Board of California family.

We will honor the legacy of Dr. Schenk by continuing to assertively implement the [Dental Board of California 2026-2029 Strategic Plan](#). The Board will also be focused on our Sunset Review Report, which will be submitted to the Legislature by the end of 2027.

Lastly, we are proud of numerous Board successes this year. Not least of which is the passage and enactment of Board-sponsored AB 1760 (Arambula). This legislation provides numerous important updates to the Dental Practice Act by fixing outdated language, resolving various operational inconsistencies, and improving administrative efficiency. Key elements include technical clarifications to licensing pathways, updates to dental auxiliary training and standards, as well as other housekeeping changes needed to align statute with current regulatory practice. These fixes allow the Board to operate more effectively, reduce unnecessary delays, and maintain a high-level of consumer protection.

Board Awards

Board Member Dr. Stephen Chan has been selected by the National Dental Association (NDA) to receive the 2026 Chairman's Award for Access and Inclusion. He received this prestigious award during the Opening Ceremony of the 113th National Convention in Richmond, VA, on Thursday, July 16. Dr. Chan is being honored for his "visionary leadership in advancing access and inclusion, and for championing policies that have expanded opportunity and increased minority representation."

Additionally, Board Member Dr. Jaskiran K. Grewal recently accepted an invitation to become a fellow of the American College of Dentists. This distinguished recognition honors exceptional leadership, integrity, professionalism, and contributions to advancing dentistry and oral health. Becoming a fellow in the American College of Dentists is a highly selective distinction conferred through peer recognition of a dentist's commitment to the highest ethical standards and service to the profession and the community.

Board Member Spotlight: Meet Ram M. Vaderhobli, M.S., DDS

Ram M. Vaderhobli, M.S., DDS, was appointed to the Board by Governor Gavin Newsom on September 17, 2025, as the governor-appointed educator representative. He is a clinical professor in the Department of Preventive and Restorative Dental Sciences at the University of California, San Francisco (UCSF) School of Dentistry, where he has served on

the faculty since 2007. He is the director of the Advanced Education in General Dentistry Postgraduate Residency Program at UCSF and regional director for Northern California with NYU Langone Medical Center. An accomplished clinician educator and researcher, Dr. Vaderhobli's expertise includes evidence-based restorative dentistry, adhesive dentistry, biomaterials, CAD/CAM technologies, and artificial intelligence applications in clinical dentistry. He lectures nationally and internationally and provides continuing education courses focused on the clinical application of contemporary dental materials and digital crown restoration workflows. He also serves as a clinical materials evaluator for multiple dental manufacturers. Dr. Vaderhobli earned his bachelor of dental surgery degree from R.V. Dental College in Bangalore, India, and his master of science in biomaterials from Alfred University in New York.

He completed research fellowships at the ADA Paffenbarger Research Center and advanced clinical training at the University of Rochester Eastman Dental Center. His honors include the 2026 ADEA Excellence in Teaching Award, the California Dental Association Foundation's Dr. Arthur A. Dugoni Faculty Award, the American College of Dentists Distinguished Faculty Award, and induction into the Academy of Medical Educators. He is a Fellow of the Pierre Fauchard Academy, the American College of Dentists, and the International College of Dentists. Dr. Vaderhobli maintains active faculty practice at UCSF and has mentored predoctoral and postgraduate general dentistry learners for nearly two decades. Dr. Vaderhobli also serves as chair of the Board's Enforcement Committee.

Late last year, Dr. Vaderhobli accepted a fellowship invitation from the International College of Dentists at their Convocation Ceremony at the Manchester Grand Hyatt in San Diego. The college has honored the world's leading dentists since 1920 and is the oldest and largest international dental honor society, with more than 12,000 members designated as fellows in more than 140 countries. Fellowship in the college is by invitation only and is granted in recognition of an individual dentist's outstanding professional achievement, meritorious service, and dedication to the continued progress of dentistry for the benefit of humankind. Congratulations, Dr. Vaderhobli, on this outstanding achievement.

1. Dr. Vaderhobli, what motivated you to accept the appointment to the Board, and how do you see this role contributing to the advancement of dentistry in the state?

I never really woke up one day thinking, "I want to serve on the Dental Board." It evolved over the years of teaching, practicing, and seeing where dentistry can improve. Eventually, I realized that if I wanted to help shape the profession beyond my own clinic and classroom, the Board was where I could make the greatest impact. Along the way, I was fortunate to be guided by Dr. Ariane Terlet, whose trailblazing work in dental policy, regulation, and professional leadership showed me how thoughtful governance can elevate both the profession and the protection of the public. Her example reinforced my belief that meaningful contributions to dentistry extend well beyond direct patient care and education. I've spent almost 20 years in the classroom and the clinic, first as an educator, then as director of the AEGD residency program at UCSF School of Dentistry. I've also spent a good part of that time on the road as a CE speaker, talking to practicing dentists about adhesive dentistry — the science of it, but also the practical, hands-on side of getting it right at the chair. Somewhere along the way, I realized I wanted to have a hand in something bigger than my own program or my own lecture circuit. The Board felt like the right place for that. It's where the standards get set for every dentist in this state, and every patient who sits in their chair. I see my job on the Board as bringing a working clinician's eye to policy. I want to make sure that what we ask of dentists in California is grounded in real evidence and real patient outcomes, because that's what protects the public best. That's the whole point of the Board, and it's the part of the job I take most seriously.

Continued on page 5

Continued from page 4

2. With nearly two decades of experience mentoring students and residents, what has been the most rewarding aspect of guiding the next generation of dental professionals?

There's a specific moment I look for with every learner, and it never gets old. Early on, they know the basics. But there's a gap between knowing something and being able to do it under pressure with a real patient in front of them who's nervous and asking questions. My job is to help close that gap. I remember watching a learner work through a complicated adhesive composite repair case — the kind of case that has a dozen ways to go wrong — and get through it clean and then explain back to me exactly why the learner made each decision along the way. Not because the learner memorized what to say. Because they actually understood it now. That's the moment. That's what I'm here for. It's the same thing when I'm speaking at a CE course to dentists who've been out of school for 10 or 25 years. Somebody comes up afterward and says, "I've been doing this a certain way for years, and now I understand why it works, or why it doesn't." That's mentorship, too. It doesn't stop at graduation."

3. Outside of your busy professional life, what activities or interests do you pursue that help you maintain a work-life balance, and how do these influence your approach to dentistry?

People are sometimes surprised by this one. I ride motorcycles, and I'm currently competing at the level required to earn my professional card as a natural physique athlete. Neither of those has anything to do with dentistry on the surface. But they're both about the same thing, underneath. When you're on a motorcycle, you don't get to think about anything else. Your attention has to be completely on the road and the traffic. There's no room for distraction. That kind of focus is exactly what I need at the operator, especially with adhesive procedures, where the margin for error is small, and the sequence matters. The physique training is a slower burn. It's not one dramatic moment of focus — it's showing up every single day. Early mornings. Meal prep. Tracking progress over months, not days. That's the same mindset I try to instill in my learners: dentistry, like this, isn't just one great appointment. It's about a daily discipline that adds up over the years. You can be an expert in one room and still be a beginner in another. I think that's a good thing for an educator to remember.

Unit Spotlight: Orange Office

The Board's Southern California Enforcement Unit, located in Orange, is responsible for investigating consumer complaints, inspecting facilities, and monitoring licensees whose licenses have been disciplined in Southern California. The unit includes sworn investigators, non-sworn investigators, inspectors, and analysts. Examples of cases investigated by this unit include unlicensed practice of dentistry, treatment below the standard of care, hospitalizations, and unsafe and unsanitary conditions.

The Board sends any complaints about licensees located from the Southern California Valley down to the California–Mexico border to our Southern California Unit. Enforcement Unit staff travel throughout the assigned geographical area to conduct on-site investigations, conduct interviews, gather and review records, and prepare detailed investigative reports. Based on the outcome of the investigations, the complaints may be closed if no deviations from the standard of care are found. Investigations may also result in an issuance of a citation for minor violation(s) and up to and including the revocation of a license for serious violation(s) of the Dental Practice Act.

Probation Monitoring: Licensees located in Southern California who have their licenses disciplined for violations of the Dental Practice Act and placed on probation are monitored by our Southern California Enforcement Unit to ensure compliance with probation terms and conditions, protect consumers, and assist with the rehabilitation of our licensees. The probation monitors conduct regular reviews and check-ins with licensees placed on probation and audit completion of all required terms and conditions of their probation.

Inspections: Business and Professions Code Section 1611.5 permits Board staff to inspect dental facilities when complaints are received regarding unsafe and unsanitary conditions. The Southern California Unit responds to these complaints and conducts timely unannounced on-site inspections to ensure compliance. Facilities inspected by the Enforcement Unit include dental offices, mobile units, dental schools, and portable units. Inspections may include a thorough review of practice facilities, review of records, and interviews with licensees and staff.

Did You Know?—Notes From the Enforcement Unit

Important Updates to Prescription Procedures for California Dental Care

The Enforcement Unit has reviewed multiple cases involving dentists prescribing medications to patients after dental treatments. New procedures have been implemented to enhance consumer safety and accountability. The transition from paper prescriptions to electronic prescribing marks a significant shift toward more regulated practices.

CURES Registration Requirements

Dentists authorized to prescribe, order, administer, furnish, or dispense Schedule II to V controlled substances and who have a Drug Enforcement Administration (DEA) registration certificate are required to register for the Controlled Substance Utilization Review and Evaluation System (CURES).

California law (Health and Safety Code Section 11165.1) requires all California licensed health care practitioners who are authorized to prescribe controlled substances in Schedules II through V to register for access to CURES. This registration is required upon the issuance of a DEA Controlled Substance Registration Certificate. California licensed pharmacists must register for access to CURES when they receive their California State Board of Pharmacy Pharmacist License.

The process for prescriber and pharmacist registration to access CURES is straightforward and fully automated. Both groups can easily register by accessing the [CURES User Registration portal](#).

CURES Mandatory Consultation

Dentists must consult the CURES system to confirm patient prescribing history. This is to ensure patient safety and diminish the potential for abuse. Section 11165.4 of the Health and Safety Code outlines the mandatory consultation requirements for CURES before prescribing. For further details about these requirements, practitioners and pharmacists should consult their respective state licensing boards.

E-Prescribing Requirements

Prescriptions must now be sent electronically to the pharmacy.

All California State Board of Pharmacy licensees must adhere to e-prescribing requirements established by Assembly Bill (AB) 2789 (Wood, 2018). Starting January 1, 2022, every prescription issued by a licensed healthcare practitioner to a California pharmacy must be submitted electronically. Furthermore, all California pharmacies are required to have the capability to receive electronic prescriptions.

Consequences of non-compliance

Failure to comply with prescribing requirements may result in license discipline.

Business and Professions Code 688 (j) specifies that any health care practitioner, pharmacist, or pharmacy that fails to meet the applicable requirements of these new prescribing procedures will be referred to the appropriate state professional licensing board. The Board will determine administrative sanctions as deemed appropriate for the violation.

More information is available at: <https://oag.ca.gov/cures>

Annual Dental Board Licensing Presentation for Universities & Students

Over the past several years, the Board has strengthened its collaboration with dental schools and professionals by providing an informative annual presentation about the licensing process. The 2025 session proved particularly impactful, contributing to noticeable improvements during the 2026 graduation season, including better overall outcomes and more efficient processing times.

Building on recent successes, the Board hosted its annual presentation in October 2026, emphasizing enhanced support for university administration. The presentation covered essential topics such as dean certification and residency completion forms and letters, recent updates to regulations and laws impacting the application process, instructions for navigating the BreEZe system, and an

overview of the Board's website. During the presentation, the Board also announced a new student licensing preparation webinar scheduled for February 2027.

The student licensing preparation webinar will offer a comprehensive overview of the steps to obtain dental licensure, equip students with information about required forms, documentation, and deadlines, clarify regulatory requirements and protocols for the application process, and guide students in accessing valuable resources and support from their university and the Board's website.

Together, these presentations continue the Board's outreach efforts to support both institutions and students through a clear, efficient, and well-guided graduation and licensure process.

Courtesy Email Notification

In April 2026, the Board began sending courtesy email notifications when a licensee's renewal period opens. Emails are sent in addition to the standard renewal reminder postcard.

Important: Courtesy emails will be sent to the email address listed in the address of record for your license or permit.

To ensure you receive these notifications, please log in to your BreEZe account and verify that your email address is current.

How to update your information:

1. Visit www.breeze.ca.gov.
2. Log in to your BreEZe account.
 - a. If you do not have an account, select "New User" to create one.
3. Select "Change of Address" from the drop-down menu.
4. Click on "Address of Record" in the "Contact Details" section to update your information.

For renewal requirements, including continuing education information, please visit:

www.dbc.ca.gov/licensees/index.shtml

Celebrating Dr. Schenk

A Legacy of Dedication and Service to the Dental Board of California

As Dr. Schenk retires after an impressive 42 years of service to the Board, we take a moment to reflect on his remarkable journey, contributions, and impact on the field of dentistry.

Inspiration and Career Path

Dr. Schenk's journey into dentistry began with an unexpected pivot during his undergraduate studies as a biochemistry major. "I thought my future would be in medicine or pharmaceuticals," he recalls. However, he noticed that dentists seemed to enjoy a happier lifestyle compared to many physicians he encountered. On a whim, he decided to take the Dental Aptitude Test and a dexterity test. The results spoke for themselves, leading to his acceptance at St. Louis University as the youngest member of his class.

His path took another turn when the Board recognized his expertise as a clinical dental examiner and invited him to join the Board as a consultant. "I had no idea what a consultant was initially, but I was eager to learn and contribute," he said.

Reflections on Working with the Board

Reflecting on his tenure, Dr. Schenk describes his experience with the Board as a blend of education, challenges, and rewards. "It has been educational, sometimes frustrating, and often rewarding." He particularly enjoyed the role of an expert witness, relishing the challenges that came with testifying in court. "The individuals I worked with were motivated and supportive, helping me navigate the intricacies of the Board's operations," he commented, sharing his appreciation for their patience in teaching him about technology.

Continued on page 9

Continued from page 8

Proudest Accomplishments

Among his many achievements, Dr. Schenk takes pride in being appointed as a clinical floor examiner during California's state examination era. Working alongside some of the brightest minds in the field, he gained invaluable experiences that have shaped his career. Additionally, he fondly recalls his collaboration with Dr. Jo to calibrate the Consultant and Expert Reports, thereby enhancing the Board's enforcement capabilities.

Looking Forward to Retirement

As he approaches retirement, Dr. Schenk looks forward to a new chapter filled with adventures alongside his wife of more than 50 years, Debbie. "I can't wait to leave my watch and phone at home and explore destinations we've always dreamed of visiting, as well as embark on day trips we've put off for too long," he shared enthusiastically. He also anticipates diving into a stack of books unrelated to dentistry, a much-deserved break.

An Impactful Journey

Beyond his professional life, Dr. Schenk reflects on a significant event that shaped him personally. Drafted in 1967 while still in dental school, he served on a hospital ship in Danang Harbor during the Vietnam War. His experiences treating villagers in South Vietnam provided him with profound insights and accelerated his maturity in ways that have influenced his approach to life and work.

A Lasting Legacy

As we bid farewell to Dr. Schenk, we celebrate not just his long-standing commitment to the Board, but also the profound impact he has had on the dental community. His passion for dentistry, dedication to service, and willingness to embrace challenges have set a high standard for those who follow in his footsteps.

We wish Dr. Schenk all the best in this new chapter of life, filled with exploration, adventure, and relaxation. Thank you, Dr. Schenk, for your outstanding service and leadership over the past 42 years!

thank you

Did You Know?—Notes from the Licensing and Examinations Unit: A Reminder for Dentist Applicants

The Licensing and Examination Unit (LEU) would like to inform all dental applicants that, effective April 1, 2026, the LEU transitioned to email-only communication for all correspondence related to dental application statuses. Hard-copy letters will no longer be mailed.

All dental application status updates will be sent to the email address listed in your application. Please make sure you are

checking your spam or junk folder regularly to avoid missing important application updates.

If your email address has changed, please update your contact information as soon as possible to continue receiving important updates regarding your application. As always, you may contact the Board at Dentalboard@dca.ca.gov.

Stay Connected

The Hot Sheet

Board Enforcement Actions January–June, 2026

The Board's Enforcement Unit investigates reported criminal and administrative violations in the dental profession. Suspected violators are referred for administrative disciplinary proceedings or prosecution if violations are substantiated.

Note: The table below shows administrative disciplinary actions taken in the most recently completed half of the fiscal year. To see current actions taken, visit the Board's [Hot Sheets](#) webpage.
